PROVO UTAH

PREFACE

THE Type and Borders shown in this specimen book excel in design—the chief merit of type—and their durability is assured by the use of the celebrated Copper Alloy Type Metal.

A printing office completely supplied with the products of this Company is worth far more for either use or sale than one made up from the productions of incomplete type foundries.

It is conceded that the Type made by this Company is the standard for excellence throughout the world. Every endeavor is made to advance that standard.

As the largest purchaser of Printing Machinery and Materials in the world, this Company commands the best of everything for the printer, and has unsurpassed facilities for meeting the requirements of printing offices.

AMERICAN TYPE
FOUNDERS COMPANY

A. D. 1897.

AMERICAN TYPE FOUNDERS COMPANY

ELECTROTYPED CUTS

There is this advantage in purchasing electrotyped cuts from this Company: Nearly all its cuts are original, and electrotypes are furnished from the original engravings. The great majority of the cuts shown in all specimen books were originated by Branches of the

American Type Founders Company

INDEX TO THE PRICE LIST OF PRINTING MACHINERY AND MATERIALS

For the Composing Room, see pages	771 to 829
For the Press Room, see pages	830 to 887
For the Stock Room and Bindery, see pages	888 to 927
For the Mailing Department, see pages	928 to 930
Miscellaneous, see pages	931 to 934

DIPLOMA OF AWARD

ONE OF FIVE DIPLOMAS OF AWARD

AWARDED BY THE BOARD OF INTERNATIONAL JUDGES OF THE WORLD'S COLUMBIAN EXPOSITION, CHICAGO, 1893, TO THE AMERICAN TYPE FOUNDERS' COMPANY.

EXHIBIT: PROCESS OF MANUFACTURING, AND FINISHED TYPE
AWARD

For Exhibition of Machinery, Appliances and Processes for the Manufacture of Movable Metal Type, beginning with the perfectly constructed and minutely adjusted Benton Punch-Cutting Machine, and ending with the well-designed and highly efficient Barth Automatic Steam-Power Type-Casting and Type-Finishing Machine, in the production of Copper Alloy Type of the correct proportions of Toughness, Hardness, Uniform Accuracy and High Degree of Utility.

Roman and German Body Type is put up in fonts of 25, 50 and 100 pounds, or some multiple of these weights. Included in each 25 pounds are 5 pounds of Spaces and Quads, and same proportions in larger fonts.

Italic and Accents will not be sent with Roman fonts unless specially ordered. Smallest font of Italic furnished weighs 5 pounds. A pair of full-size cases holds 50 pounds of body type.

Spaces and Quads in Job Fonts

5 Point \$1 40	15 Point \$0 60	40 Point \$0 60
5½ " 1 00	16 " 0 55	42 " 0 60

14 " 0 60	36 " 0 55	120 " 1 40

Allowance for Old Type and other Metals

Old type (clean and unmixed with other metals), electrotypes, leads and brass, delivered at foundry free, will be taken at current prices in even exchange for new type or printing material.

Customers sending in old metal are requested to mark their names on all packages, and to forward by mail a shipping receipt or bill of lading, with the net weight of each kind of material, as soon as shipment is made. Compliance with this request will aid in identifying shipments, and prevent errors. Ship as "old metal" to secure low freight rate.

SPECIAL NOTICE.—Zinc plates, metal containing zinc, or type and other plates mixed with zinc plates, and stereotype plates, will not be received at any price. Type, electrotypes plates, leads and brass, must be packed separately, as the value of each differs.

Type Standards

The following is the standard adopted by the International Typographical Union. The basis of measurement is the lower-case alphabet, from a to z inclusive, and the ems used are the same body as the type measured:

	EMS		EMS
4½ Point . . .	18	8 Point . . .	14
5 " . . .	17	9 " . . .	13
5½ " . . .	16	10 " . . .	13
6 " . . .	15	11 " . . .	13
7 " . . .	14	12 " . . .	13

How to Estimate

To ascertain the quantity of body type required for a publication, find the number of square inches and divide the same by four, and the quotient will be the approximate weight of type required; but, as it is impossible to set the cases entirely clear, it is necessary to add 25 per cent. to the weight of large fonts, and 33½ per cent. to small fonts, to allow for dead letter.

Number of Ems in One Pound of Type

Two by two inches (four square inches) solid type weighs approximately one pound.

	EMS		EMS
5 Point . . .	829	9 Point . . .	256
5½ " . . .	685	10 " . . .	207
6 " . . .	576	11 " . . .	171
7 " . . .	423	12 " . . .	144
8 " . . .	324		

Useful in Ordering Sorts

The following table shows what each box in the type case will hold:

LETTERS.	WEIGHT IN FULL BOX.
a c d i s m n h o u t r . .	2 pounds.
f b l v g y p w	15 ounces.
k j z x q and all figs. . .	6 " "
e	3 pounds.
Caps and Small Caps . . .	5 ounces.

American Point System

The following table gives the names of the old bodies and their new designation by points:

3½ Point . . .	Brilliant.
4½ " . . .	Diamond.
5 " . . .	Pearl.
5½ " . . .	Agate.
6 " . . .	Nonpareil.
7 " . . .	Minion.
8 " . . .	Brevier.
9 " . . .	Bourgeois.
10 " . . .	Long Primer.
11 " . . .	Small Pica.
12 " . . .	Pica.
14 " . . .	2-line Minion or English.
16 " . . .	2-line Brevier.
18 " . . .	Great Primer.
20 " . . .	2-line Long Prim. or Paragon
22 " . . .	2-line Small Pica.
24 " . . .	2-line Pica.
28 " . . .	2-line English.
30 " . . .	5-line Nonpareil.
32 " . . .	4-line Brevier.
36 " . . .	2-line Great Primer.
40 " . . .	Double Paragon.
42 " . . .	7-line Nonpareil.
44 " . . .	4-line Small Pica or Canon.
48 " . . .	4-line Pica.
54 " . . .	9-line Nonpareil.
60 " . . .	5-line Pica.
72 " . . .	6-line Pica.

Standard Sizes of Newspapers

This table of sizes is based upon the standard sizes of newspapers, with columns 13 twelve-point ems wide and six-point column rules. The adoption of these sizes is advisable especially in starting newspapers or putting in new outfits, thereby gaining desirable uniformity:

	Standard Size of Paper. INCHES.	Size of Each Page. INCHES.	* Face Length of 6 Pt. Col. Rules. INCHES.	Length of Head Rules required.
4-Column Quarto . . .	22 × 30 . . .	8½ × 14 . . .	13¾ . . .	53½ Pica ems.
5 " " . . .	26 × 40 . . .	11½ × 18 . . .	17¾ . . .	67 " "
6 " " . . .	30 × 44 . . .	13¾ × 20 . . .	19¾ . . .	80½ " "
7 " " . . .	35 × 48 . . .	15¾ × 22 . . .	21¾ . . .	94 " "
8 " " . . .	40 × 52 . . .	17½ × 24 . . .	23¾ . . .	107½ " "
5 " Folio . . .	20 × 26 . . .	11½ × 18 . . .	17¾ . . .	67 " "
6 " " . . .	22 × 30 . . .	13¾ × 20 . . .	19¾ . . .	80½ " "
7 " " . . .	24 × 35 . . .	15¾ × 22 . . .	21¾ . . .	94 " "
8 " " . . .	26 × 40 . . .	17½ × 24 . . .	23¾ . . .	107½ " "
9 " " . . .	28 × 44 . . .	20½ × 26 . . .	25¾ . . .	121 " "

* Length of column rules for first page determined by size of headings, or say about two inches shorter than full length.

COPPER ALLOY TYPE

NEWSPAPER MEASUREMENTS

Table showing the number of ems of the different sizes of Newspaper Type in a line, the number of lines necessary to make 1000 ems, and the length in inches.
Also the number of ems in the regular lengths of column.

13 EMS PICA, WIDTH OF STANDARD COLUMN.	5½ POINT.	6 POINT.	7 POINT.	8 POINT.	9 POINT.	10 POINT.

Sorts, 25 cents per lb.

Attention is invited to the new design of this furniture. The strain-bearing braces have been increased in number and placed in the best possible positions, increasing the strength while not increasing the weight.

REVERSIBLE METAL FURNITURE

This Labor-Saving Reversible Furniture is our invention, and is unsurpassed for its strength and accuracy. It is made on the Point System of Bodies, and is useful for making up and blank-

ing out forms and for general imposition. It is cast in lengths of 16½ inches, and 2, 3, 4, 5, 6, 8, 9 and 10 ems Pica wide, and is cut to such lengths as may be ordered. Not put up in fonts.

Price per pound, cut to measure, 25 cents.

Labor-Saving Quotation Furniture

Finished with the strictest regard for accuracy. Made 2, 3 and 4 ems Pica wide, and 4, 8, 12, 16 and 20 ems Pica long.

12 pound fonts	\$3 00	50 pound fonts	\$12 50

Sorts, 25 cents per pound. Additional sizes, 2×5, 2×6, 3×5, 3×6, 4×5, 4×6, 5×5, 5×6, and 6×6, cast accurately to Pica ems, per pound, 25 cents.

ANGULAR QUADS

These quads, introduced by us, are for setting rules and lines at an angle. When there is occasion for their use they are invaluable time-savers. They are of ordinary space and quad height.

Fonts, four of all sizes.	\$1 50	36 Point, set of four	\$0 25

CIRCULAR QUADS

Each font is put up in a wooden box, containing four pieces each of twenty different curves. Each curve mortised as shown in examples above. Fonts, \$3 50.

CORNER QUADS

These insure a better junction of mitered corners, by preventing them from slipping past each other. Made on 6, 10 and 12 Point bodies.

Metal, 6, 10 or 12 Point, per set of four	\$0 15
Brass, 3 Point, per set of four	15

Where Accuracy is Most Needed.

Special attention is invited to the superior accuracy of our Metal and Quotation Furniture, illustrated on page 44. Purchasers of this material are insured against the annoyances and loss of time which result from the use of inferior products.

In ordering sorts quote No. as well as letter. No sorts for less than 75 cents, net																						

The Greek alphabet contains twenty-four letters: seventeen consonants and seven vowels. The only duplicate characters are σ and s , the latter being used as a final letter only. The accents and breathings are:

° Smooth	° Rough	° Smooth acute	° Rough grave	° Diæresis
° Acute	° Grave	° Smooth grave	° Smooth circumflex	° Diæresis acute
° Circumflex		° Rough acute	° Rough circumflex	° Diæresis grave

The sign of interrogation is made by a [?], the colon by an inverted full point [·]; the other points are the same as in English. The kerned letters are seldom required, and are only supplied to a font to make up any deficiency in accented sorts. Accented caps have the accent before them, thus [Œ]. The figures are the same as in English, and are *not* put up with job fonts. Compositors should bear in mind that no accent can be placed over any other than one of the last three syllables of a word. The grave accent never occurs but on the last syllable; this being the case, the rough grave [˘] and smooth grave [˙] can only be used for a few monosyllables. No vowel can have a breathing excepting at the beginning of a word, and *ρ* is the only consonant marked by a breathing. Almost every word has an accent, but very few more than one.

Time-Saving Mail List Type

Every character is cast on en-quad (5 Point) set and only en-quads and 4-to-em spaces are used for spacing, but will be furnished on 4½ and 4 Points set when specially ordered. By setting sticks to a multiple of 10 Point, spacing and justification become mere child's play—in fact, this type is self-spacing. Although the face is large, on examination it will be found that Time-Saving Mail List Type is quite as condensed on the average as ordinary Mail List Type. Prices, same as for 10 Point Roman.

EXAMPLE, USED WITHOUT LOGOTYPES	EXAMPLE, IN COMBINATION WITH MAIL LIST LOGOTYPES No. 120 AND 10 POINT CLARENDON

Description of Self Spacing Type

The common widths of book pages, miscellaneous jobs and newspaper columns are some number of Pica ems, therefore the Pica em is taken as the basis for Self Spacing type. The thinnest space in all fonts is some exact fraction of a Pica, and this fraction of Pica is called the unit of measure. All characters, spaces and quads in the font are made some exact multiple of this unit in width, so that the sizes of all faces will work perfectly together in the regular labor-saving measures. This unit of measure may be one-sixth, one-seventh, one-eighth, one-ninth, etc., of a Pica em, as may be desired, to produce condensed, medium or extended faces. The following table gives the sizes of bodies, units of measure and lengths of alphabets. In the first column will be found the various sizes of bodies; in the second, the number of units contained in one em Pica, and in the third the measurements of a lower case alphabet in the ems of each particular body.

BODY	Number Units to Pica em	Length of Alphabet
5½ Point (Agate).....	12	16⅞
6 Point (Nonpareil) .	12	15½
6 Point (Nonpareil) .	11	17
7 Point (Minion)	11	14½
7 Point (Minion)	10	16
8 Point (Brevier)	11	12⅝
8 Point (Brevier)	10	14⅞
8 Point (Brevier)	9	15½
9 Point (Bourgeois) .	10	12⅜
9 Point (Bourgeois) .	9	13¾
10 Point (Lg. Primer) .	9	12⅜
10 Point (Lg. Primer) .	8	14
11 Point (Small Pica) .	8	12⅔
11 Point (Small Pica) .	7	14½
12 Point (Pica).....	7	13¼

In the accompanying table will be found a Nonpareil with one-twelfth of Pica as the unit of measure. This is one-sixth of the body of Nonpareil, or the six-to-em space, and preserves in this particular font the old three-to-em space and the old en and em quads. The same is true of the Brevier on one-ninth, Bourgeois on one-eighth, and Pica on one-sixth of Pica. In a complete font of the old kind of body type there are about 190 widths of bodies. Appended is a table showing the

different widths of bodies of Self Spacing. It will be readily seen that there are but nine widths of bodies all told, and that the four-unit width predominates largely over any other, there being fifty-nine characters of this width. We omit the Italic characters from the table, as they go on the same widths of bodies and are interchangeable with the Roman:

1 unit—Space	1
2 units—Space, f i j l . ; , - ' ! I J '	16
3 units—Quad, c e r s t z s z I J ? ([* † ‡ § ¶ ¨ °	22
4 units—Quad, a b d g h k n o p q u v x y f i l f f £ 1 2 3 4 5 6 7 8 9 0 A B C D E F G L N O P Q R T U V X Y & S Z .. - J { } \ /	59
5 units—æ A B C D E F G L N O P Q R T U V Y H K M	21

7 units—W M	2
8 units—œ æ	2
12 units—Quad, —  	5
9 sizes.	
Roman characters.....	155
Italic characters.....	77
Total.....	232

Any compositor can see that no combination of units can be made that will not come within a certain number of exact units of filling a line. If a line of matter lacks, it must lack one or more exact units. Self Spacing type sets line for line with the ordinary Roman, where the lengths of the alphabets are the same. Repeated experiments with the new type have shown that the average compositor gains about twenty-five per cent. in speed, with no trouble in justification whatever. In the matter of the correction of proofs the gain is enormous. Say there is an "a" for an "e"; as "a" is four units wide and "e" three, "e" and one unit space justify the line perfectly. Even this measure of trouble is avoided in many instances. As twenty-eight of the most common lower case characters are of the same width, they can be substituted for one another without the change of a space. This type is of greater durability, as it is always on its feet and is therefore not worn by "pounding." In tabular work there is a great gain in speed and neatness. By the addition of a new character, viz: "|", it is easy to set perpendicular lines of any length, line upon line. It may be repeated that the compositor has nothing to learn in handling Self Spacing type. There is but one direction to be given—to set that which looks like the em quad (six unit quad) with the nick out. Whoever will study the principle on which Self Spacing type is based, will readily admit that it is bound to secure easy and perfect justification, greatly increased speed and consequent enormous saving, simplicity and rapidity of proof correction, and increased accuracy and ease in the setting of tables. All these points are beyond question, as certainly as the proposition that two and two are four is not open to argument. No rational person can

doubt them. This piece of composition was done in a 13-em measure stick, and set line upon line in the ordinary manner of straight reading matter, the lower part being leaded to show the method of setting. To further explain and illustrate the ease with which table work is done with Self Spacing type, we show above an example of

miscellaneous justifications, which is absolutely impossible to accomplish with the old kind of type. In column No. 1 the first line begins with the lower case "i", two units wide, which is followed by the upright dash "|", two units, and the characters "a", four units, "n", four units, "d", four units, comprising sixteen units to accurately fill the column. The second line begins with the letter "s", three units wide, which throws the space rule one unit further to the right than in the preceding line. In each succeeding line lower case characters are used to the total width of sixteen units, and such characters are chosen for the first part thereof as will admit of advancing the space rule to the right exactly one unit in each succeeding line.

In the other columns the same plan is followed, the only change being in the substitution of caps, small caps, figures, etc., for the lower case characters, all columns coming perfectly justified inside the perpendicular lines.

Self Spacing Modern Roman

5½ POINT NO. 19¼

THE INVENTION OF PRINTING has always been recognized by educated men as a subject of importance: there is no mechanical art, nor are there any of the fine arts, about whose early history so many books have been written. The subject is as mysterious as it is inviting. There is an unusual degree of obscurity about the origin of the first printed books and the lives and works of the early printers. There are records and traditions which cannot be reconciled of at least three distinct inventions of printing. Its early history is entangled with a controversy about rival inventors which has lasted for more than three centuries, and is not yet fully determined. In the management of this controversy a subject intrinsically attractive has been made repulsive. The history of the invention of printing has been written to please national pride.

6 POINT NO. 42

Auf keinem Gebiete waren die Fortschritte seit vier Jahrhunderten so gering wie in der Kunst des Schriftsetzens. Die hier und da in Gebrauch befindlichen Maschinen sind durchaus unvollkommen; die bei weitem größte Masse der üblichen Schrift ist noch genau der Art wie vor vierhundert Jahren. Wenn Franklin heute wieder vor dem Kasten stände, würde er nichts Neues zu lernen haben. Die Schriftgießerei ist hinter der wunderbaren Vervollkommnung der Pressen vollständig zurückgeblieben; die vergrößerte Geschwindigkeit im Schriftsetzen beruht ausschließlich in der Vermehrung der Kästen. Alle Bemühungen, diesem Übelstande abzuhelpen, gingen darauf hinaus, Setzmaschinen zu erfinden, statt die Art und Weise des Handsatzens zu verbessern. Eins der Haupthindernisse, welches den Setzmaschinen im Wege stand, ist die Nothwendigkeit, mit der Hand zu „justiren“. Daran scheiterte hauptsächlich die Einführung dieser Maschinen. Es liegt daher auf der Hand, daß jeder Plan zur Verbesserung unserer Setz-Methoden in erster Linie die Justirung zu vereinfachen hat, denn da dies der Punkt ist, um den sich die Sache dreht, so muß durch eine Vereinfachung des Ausschließens und Justirens die Leichtigkeit und Geschwindigkeit des Hand-Schriftsetzens wachsen. Dies geschieht durch Benton's selbst-ausschließende Schrift. Genau genommen, kann man nicht eigentlich von Selbst-Ausschließen sprechen, jedoch diese Arbeit ist durch die Erfindung so einfach und leicht geworden, daß der

3½ POINT No. 17

THE INVENTION OF PRINTING has always been recognized by educated men as a subject of importance: there is no mechanical art, nor are there any of the fine arts, about whose early history so many volumes have been written. The subject is as mysterious as it is inviting. There is an unusual degree of obscurity about the origin of the first printed books and the lives and works of the early printers. There are records and traditions which cannot be reconciled of at least three distinct inventions of printing. Its early history is entangled with a controversy about rival inventors which has lasted for more than three centuries, and is not yet fully determined. In the management of this controversy, a subject intrinsically attractive has been made repulsive. The history of the invention of printing has been written to please national pride. German authors assert the claims of Gutenberg and discredit traditions about Coster. Dutch authors insist on the priority of Coster and charge Gutenberg with stealing the invention. Partisans on each side say that their opponents have perverted the records and suppressed the truth. The quarrel has spread. English and French authors who had no national prejudices to gratify, and who should have considered the question without passion, have wrangled over the subject with all the bitterness of Germans or Hollanders. In this, as in other quarrels, there are amusing features, but to the general reader the controversy seems unfortunate and is certainly wearisome. It is a greater misfortune that all the early chronicles of printing were written in a dead language. Wolf's collection of Typographic Monuments, which includes nearly every paper of value written before 1740, is in Latin; the valuable books of Meerman, Maittaire, and Schoepfin are also in Latin. To the general reader these are sealed books: to the student who seeks exact knowledge of the methods of the first printers, they are tiresome books. Written for the information of librarians rather than of printers, it is but proper that these books should devote the largest space to a review of the controversy or a description of early editions; but it is strange that they should so imperfectly describe the construction and appearance of early types and the usages of the early printers. The mechanical features of typography were, apparently, neglected as of little importance, and beneath the dignity of history. A failure to

6 POINT OLD STYLE No. 84

THE INVENTION OF PRINTING has always been recognized by educated men as a subject of great importance; there is no mechanical art, nor are there any of the fine arts, about whose history so many books have been written. The subject is as mysterious as it is inviting. There is an unusual degree of obscurity about the origin of the first printed books and the lives and works of the early printers. There are records and traditions which cannot be reconciled of at least *three distinct inventions* of printing. Its early history is entangled with a controversy about rival inventors which has lasted more than three centuries, and is not yet fully determined. In the management of this controversy, a subject intrinsically attractive has been made repulsive. The history of the invention of printing has been written to please national pride. German authors assert the claims of Gutenberg and discredit traditions about Coster. Dutch authors must insist upon the

8 POINT FRENCH OLD STYLE No. 2

THE INVENTION OF PRINTING has always been recognized by educated men as a subject of importance: there is no mechanical art, nor are there any of the fine arts, about whose early history so *many volumes* have been written. The subject is as mysterious as it is inviting. There is an *unusual degree* of obscurity about the origin of the first printed books and the lives and works of the early printers. There are records and traditions which cannot be reconciled of at least three distinct inventions of printing. Its early history is entangled with a controversy about rival inventors which has

SIMPLEST FASHIONS

Artistic decorations rarely
are the most elaborate, but
should display the \$1234

12 POINT

12A 28a \$3 00

SUPERIOR TYPOGRAPHY

We would call the attention of all
printers and publishers to this new
series, which is especially adapted
for use on editions de luxe and
other artistic books and \$1234567

10 POINT

16A 36a \$2 75

APPROBATION IS MERITED

That this is the handsomest of all the light-
face Romans every printer will admit at
first glance, which leads us to expect a
large number of orders for fonts of all sizes
and will appreciate useful face \$123456

8 POINT

20A 44a \$2 75

PLAIN AND CHASTE STYLE SHOWN

Many printers and not a few of their customers
have complained that the type faces produced
of late were much too grotesque. It has always
been our endeavor to satisfy all tastes, and there-
fore this new Roman is now offered \$123456789

**MEMORY IT IS SAID IS INDISPENSABLE TO MORAL ECONOMY
WITHOUT MYSTERIOUS PRIVATE SECRETARY**

The faculty of memory, which receives and retains ideas and images and which exhibits them again with or without the exercise of volition, early became the subject of philosophical research. There are very many curious phenomena connected with this power of the mind; it is sometimes as recreant to its trust when most its service may be wanted, as the veriest bankrupt 567843

SKETCH OF THE TYPES AND TYPEFOUND- ING OF THE FIRST PRINTERS.***

FOR four centuries the noise of controversy has raged round the cradle of Typography. Volumes have been written, lives have been spent, fortunes have been wasted, communities have been stirred, societies have been organized, a literature has been developed, to find an answer to the famous triple question: "when, where, and by whom was found out the unspeakably useful art of printing books?" And yet the world to-day is little nearer a finite answer to the question than it was when Ulric Zel indited his memorable narrative to the Cologne Chronicle in the year 1499. Indeed, the dust of battle has added to, rather than diminished, the mysterious clouds which envelop the problem, and we are tempted to seek refuge in an agnosticism which almost refuses to believe that printing ever had an inventor. It would be neither suitable nor profitable to encumber an investigation of that part of the History of Typography which relates to the types and typemaking of the fifteenth century by any attempt to discuss the vexed question of the invention of the Art. The man who invented Typography was doubtless the man who invented movable types. Where the one is discovered, we have also found the other. But, meanwhile, it is possible to avail ourselves of whatever evidence exists as to the nature of the types he and his successors used, and as to the methods by which those types were produced, and possibly to arrive at some conclusions respecting the earliest practices of the Art of Typefounding in the land and in the age in which it first saw the light. No one has done more to clear the way for a free investigation of all questions relating to the origin of printing than Dr. Van der Linde

DR. VAN DER LINDE ON THE ORIGIN AND DEVELOPMENT OF PRINTING. ❁❁❁❁❁❁

CANNOT say often enough that, when we speak of Typography and its invention, nothing is meant, or rather nothing must be meant, but printing with loose (separate, movable) types (be they letters, musical notes, or figures), which therefore, in distinction from letters cut on wooden or metal plates, may be put together or separated according to inclination. One thing therefore is certain: he who did not invent printing with movable types, did, as far as Typography goes, invent nothing. What material was used first in this invention; of what metal the first letters, the patrices (engraved punches) and matrices were made; by whom and when the leaden matrices and brass patrices were replaced by brass matrices and steel patrices; all this belongs to the secondary question of the technical execution of the principal idea: multiplication of books by means of multiplication of letters, multiplication of letters by means of their durability, and repeated use of the same letters, i. e., by means of the independence (looseness) of each individual letter (movableness). If this principle be adopted — and we can hardly imagine it questioned — it will be obvious that a large class of works which usually occupy a most prominent place in inquiries into the origin of Printing, have but slight bearing on the history of Typography. The block books of the fifteenth century had little direct connection with the art.

No. 4259 \$1.25

10 POINT JENSON OLD STYLE 25A 30a \$3 00

MOVABLE TYPES

IT is reasonable to suppose that the first idea of movable type may have been a suggestion to the mind of the inventor by a study of the works of an old xylographic printer, and an observation of the cumbersome and wearisome method which was adopted in producing his books. The toil involved in first painfully tracing the characters and figures, reversed, on the wood, then of engraving them, and finally of printing them with the froton, would appear—in the case, at any rate, of the small school-books, for the production of which this process was largely resorted to—scarcely less tedious than copying the required number by the deft pen of a scribe. And even if at a later period, the bookmaker so far facilitated their labors as to write their text in the ordinary manner on prepared paper, or with prepared ink, and so transfer their copy on to the wood, the labor expended in proportion to the result, and the uselessness of the blocks when once their work was done, would doubtless impress an inventive genius with a sense of dissatisfaction and impatience

FIRST STAGE BETWEEN XYLO-
GRAPHY AND TYPOGRAPHY.

CE can imagine him examining the first page of an Abecedarium, upon which would be engraved in three lines, with a clear space between each character, the letters of the alphabet, and speculating, as Cicero had speculated centuries before, on the possibilities presented by the combination in indefinite variety of those twenty-five symbols. Being a practical man as well as a theorist, we may suppose he would attempt to experiment on the little wood block in his hand, and by sawing off first the lines, and then some of the letters in the lines, attempt to arrange his little types into a few short words. A momentous experiment, and fraught with the greatest revolution the world has ever known! No question has aroused more interest, or excited keener discussion in the history of printing, than that of the use of movable wooden types as a first stage in the passage from Xylography to Typography.

14 POINT JENSON OLD STYLE 15A 25a \$3 50

HOSE WHO WRITE on the affirmative side of the question profess to see in the earlier typographical works, as well as in historical statements handed down by the old authorities, the clearest evidence that wooden types were used, and that several of the most famous works of the first printers were executed by their means. As regards the latter source of their confidence, it is at least remarkable that no single writer of the fifteenth century makes the slightest allusion to the use of wooden types. Indeed, it was not till Bibliander, in the year 1548, first mentioned and described these letters.

24 POINT JENSON OLD STYLE

10A 15a \$4 50

FIRST THEY CUT their letters, he says, on wood blocks the size of an entire page, but because the labor and cost of that way was so great, they devised movable wooden types, perforated and joined one to the other by a thread. The legend, once started, found no lack of sponsors, and the typographical histories of the sixteenth century coincide more

OF THE various testimonies, those only are deserving of attention which are professed to be based on actual inspection of the alleged perforated wood type. Specklin (who died in 1588) asserts that he saw some of these relics at Strasburg.

16A 50a \$2 75

The precise time in which the art of printing was discovered by Laurens is not ascertained. From data collected it is evident that the first idea must have been suggested about the year 1428 or 1430. This conjecture is strengthened

8 POINT

18A 52a \$2 50

Printing was introduced into America at Mexico by the Viceroy Mendoza in 1536. The first book printed was the Escala espiritual de San Juan Climaco, of which no copy is known to exist; but the oldest American book now extant is the Manual de Adultos, dated 1540. The last four leaves are to be found in an excellent state of

6 POINT

20A 60a \$2 25

THE NAME of the earliest printer in America is a matter of question. Cambridge, Mass., is entitled the distinction of having the first printing press in North America. For this press the colony was mainly indebted to the Rev. J. Glover, a nonconformist minister possessed of a considerable estate who had left England to settle among his friends in Massachusetts. Some gentlemen of Amsterdam also gave towards

WHILST as fickle fortune smil'd,
Thou and I were both beguil'd.
Every one that flatters thee
Is no friend in misery.
Words are easy like the wind;
faithful friends are hard to find.
Every man will be thy friend
Whilst thou hast wherewith to spend.

8 POINT

15A 50a \$2 75

THEN let not winter's ragged hand deface
In thee thy summer, ere thou be distill'd:
Make sweet some phial, treasure thou some place
With beauty's treasure, ere it be self-kill'd.
That use is not forbidden usury
Which happies those that pay the willing loan;
That's for thyself to breed another thee,
Or ten times happier, be it ten for one;
Ten times thyself were happier than thou art,
If ten of thine ten times refigur'd thee:
Then, what could death do if thou should'st depart,
Leaving thee living in posterity?
Be not self-will'd, for thou art much too fair
To be death's conquest, and make worms thine heir.

6 POINT

15A 50a \$2 50

FROM fairest creatures we desire increase,
That thereby beauty's rose might never die,
But as the ripper should by time decease,
His tender heir might bear his memory:
But thou, contracted to thine own bright eyes,
feed'st thy light's flame with self-substantial fuel,
Making a famine where abundance lies,
Thyself thy foe, to thy sweet self too cruel.
Thou that art now the world's fresh ornament,
And only herald to the gaudy spring,
Within thine own buduriest thy content,
And, tender churl, mak'st waste in niggarding.
Pity the world, or else this glutton be,
To eat the world's due, by the grave and thee.

Card Font 5A 16a \$3 00
Circular Font 10A 32a \$5 00

The poetical temperament of Columbus is seen in all his writings, and throughout all his actions, and it spread a golden and glorious world about him, and tinged all things with its gorgeous colors. But it betrayed him into visionary speculation which subjected him to the sneers and cavillings of men of cooler and safer but more grovelling minds. Such were the conjectures formed on the coast of Paria; about the form of the terrestrial paradise; about the mines of Ophir, in Hispaniola, and the Aurea Chersonesus, in Veragua; and such was the heroic scheme of the

THE INVENTION OF PRINTING
Has always been recognized by men
of education as a subject of very great
importance: there is no mechanical
art, nor are there any fine arts, about
whose early history so many volumes
have been written. The subject is as
mysterious as it is inviting. There is
an unusual degree of obscurity about
the origin of the first printed books
and the lives and works of the early
printers. There are many records and
traditions which cannot be reconciled
of at least three distinct inventions of

NATURE IS FOND OF WHAT ARE CALLED
gift enterprises. This little book of life which
she has given into the hands of its possessors
is commonly one of the old story books bound
over again. Only once in a great while there
is a stately poem in it, or its leaves are made
grand and beautiful by being illuminated with
the glories of art. Such gifts however are not
confined to any particular walk of life, but on
the contrary the surprises are met with quite

6 POINT GERMAN NO 121

Der menschliche Fleiß hat die Erde angebaut, und den widerstrebenden Boden durch sein Beharren und seine Geschicklichkeit überwunden. Dort hat er dem Meere Land abgewonnen, hier dem dürren Lande Ströme gegeben. Zonen und Jahreszeiten hat der Mensch durcheinander gemengt, und die weichlichen Gewächse des Orients in seinem rauheren Himmel abgehärtet. Wie er Europa nach Westindien und dem Südmeere trug, hat er Asien in Europa auferstehen lassen. Ein heiterer Himmel lacht jetzt über Germaniens Wäldern, welche die starke Menschenhand zerriß und dem Sonnenstrahl aufthat und in den Wellen des Rheins spiegeln sich Asiens Neben. An seinen Ufern erheben sich schöne volkreiche Städte, die Genuß und Arbeit in munterem Leben durchschwärmen. Hier finden wir den Menschen in seines Gewerbes friedlichem Besitz sicher unter einer Million, ihn, dem sonst ein einziger Nachbar den Schlummer raubte. Die Gleichheit, die er durch seinen Eintritt in die Gesellschaft verlor, hat er wieder

6 POINT GERMAN No. 153

In der Regel soll man beim Papier die Sparsamkeit nicht zu weit treiben; sie ist nur zu entschuldigen bei Schulbüchern, Volksausgaben und dergleichen, wo oft Cents den Ausschlag in der Calculation eines Exemplars geben. Bei einem Buch, dessen Verkaufspreis aber ein angemessener sein kann, macht das bessere oder weniger gute Papier nur einen ganz kleinen Unterschied in den Herstellungskosten. Für einen guten Druck ist ein gutes Papier unumgänglich nothwendig. Es muß gleichmäßig stark gearbeitet sein, denn sonst würde beim Drucken der dicke Bogen übermäßig stark und der dünne nur schwach gefärbt. Der Stoff muß ein guter baumwollener oder leinener, kräftig, fest und doch mild sein, damit er die Farbe leicht annimmt; die Beimischung von erdigen Bestandtheilen ist immer nachtheilig. Da das Papier nach der Feinheit des Stoffes und der Schwere verkauft wird, so werden leider von vielen Papier-Fabrikanten geringwerthige Lumpen genommen, die sie nach einer gewaltsamen chemischen Bleiche nicht genügend reinigen und durch erdige Zusätze schwer machen. Abgesehen von dem Schaden für die Buchdruckerei, in ruinirten Schriften, sieht der Druck grau aus. Ein anderes, in neuerer Zeit vielfach benutztes Verfahren ist die Papierstereotypie. Statt die Schrift mit Gypsbrei anzugießen, bedeckt man sie mit einer Anzahl Blättern von Seidenpapier, die einzeln mit einer bindenden Masse bestrichen werden. Mit einer Bürste wird auf diese feuchte Papierbede so lange geklopft, bis die Schrift vertieft vollständig in dieselbe abgedruckt ist. Unter einer starken Pressung bei mäßiger Hitze wird sie langsam getrocknet,

6 POINT GERMAN No. 155

Zu einem guten Buche genügt es nicht allein, daß der Buchdrucker einen sorgfältigen Satz liefert, neue Schrift, eine gute Maschine und feine Farbe daran verwendet; alle seine Arbeit ist umsonst, wenn nicht der Besteller des Buches auch für ein gutes Papier Sorge trägt. Von Seiten der Besteller werden oft große Ansprüche an die Druckereien hinsichtlich der zu verwendenden Schriften gestellt und dann ein Papier geliefert, so voll von Knoten oder gar von Sand, daß die feine Bildfläche einer neuen Schrift nach wenigen Abzügen ruinirt ist und nach einigen Stunden die Lager und Zahnräder der Maschinen und die Farbwalzen voll von dem schmutzigen Abgang des Papiers sind. Oft wird auch ein so schwaches und dünnes Papier genommen, daß der Druck durchschim-

10 POINT GERMAN No. 155

In der Regel soll man beim Papier die Sparsamkeit nicht zu weit treiben; sie ist zu entschuldigen bei Schulbüchern, Volksausgaben und dergleichen, wo oft Cents den Ausschlag in der Calculation eines Exemplars geben. Bei einem Buche, dessen Verkaufspreis aber ein angemessener sein kann, macht das bessere oder weniger gute Papier nur einen ganz kleinen Unterschied in den Herstellungskosten. Für einen guten Druck ist ein gutes Papier unumgänglich nothwendig. Es muß gleichmäßig stark gearbeitet sein, denn sonst würde ein Bogen stark und ein anderer nur schwach gefärbt werden.

United States Signal Flags

36 POINT

PER SET \$1 25

24 POINT

PER SET \$1 00

Explanation of Weather Signals

Clear or Fair Weather.—WHITE, SQUARE FLAG. Print No. 1 in black. Displayed alone, indicates fair weather, stationary temperature; displayed with No. 4 above it, indicates fair weather, warmer; displayed with No. 4 below it, indicates fair weather, colder.

Rain or Snow.—BLUE, SQUARE FLAG. Print No. 6 in blue over No. 1 in black. Displayed alone, indicates rain or snow, stationary temperature; displayed with No. 4 above it, indicates rain or snow, warmer; displayed with No. 4 below it, indicates rain or snow, colder.

Local Rain.—WHITE AND BLUE, SQUARE FLAG. Print No. 7 in blue over lower half of No. 1 in black. Displayed alone, indicates local rain, stationary temperature; displayed with No. 4 above it, indicates local rain, warmer; displayed with No. 4 below it, indicates local rain, colder.

Temperature Signal.—BLACK, TRIANGULAR FLAG. Print No. 1 in black. Displayed in conjunction with other signals, as above described.

Cold Wave.—WHITE, SQUARE FLAG, BLACK CENTER. Print No. 5 in black. Displayed alone indicates temperature will fall 20° or more, to a minimum of 32° or less. When displayed with No. 1, indicates fair weather, cold wave.

Explanation of Wind Signals

Storm.—RED, SQUARE FLAG, BLACK CENTER. Print No. 10 in red over No. 5 in black. When displayed, indicates that storm of marked violence is expected. *Hurricane.*—Indicated by two Storm Flags displayed one above the other.

Cautionary.—RED, SQUARE FLAG, WHITE CENTER. Print No. 10 in red over No. 1 in black. When displayed, indicates that the winds expected will not be so severe. Well-found, seaworthy vessels can meet them without danger.

Easterly Winds.—RED PENNANT. Print No. 9 in red over No. 8 in black. When displayed above either Cautionary or Storm Flags, indicates northeasterly winds; when below, southeasterly; when alone, that special information of storms is to be obtained by calling on Signal Officer in charge.

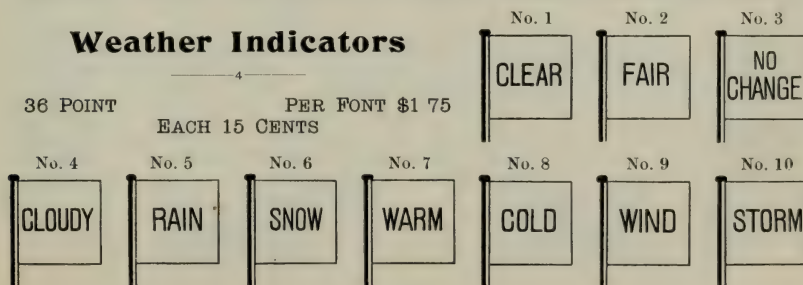

Westerly Winds.—WHITE PENNANT. Print No. 8 in black. Displayed above either Cautionary or Storm Flags, indicates northwesterly winds; below, southwesterly.

Copper Alloy Fine-Dot Leaders

12

These are used as a substitute for Dotted Brass Rule, and save the time spent in justification. Made on 6, 7, 8, 9, 10, 11 and 12 Point bodies. When ordering, state the type (if our make) they are required to line with, or send sample cap "H" or lower-case "m." The following example shows Fine-Dot Leaders lining with 8 Point Law Italic No. 120:

*Personally appeared, this.....day of
.....A. D. 189....., before me, a boy
known as.....
and deposed that, although he is not at present
able to.....correctly the words
....., it is not because he never
knew how.*

Notary Public.

The idea of making series of type pictures for embellishing advertisements was originated by the AMERICAN TYPE FOUNDERS' COMPANY.

That they have fully answered their purpose is proved by the extensive sale of these cuts. No series has been more popular than the **SPEAKERS**. They never fail to attract attention wherever used. They are life-like in attitude. In order to

extend the usefulness of the **SPEAKERS**, the **LISTENERS** have been designed as a good companion series.

SECOND SERIES. 40 cts. each

THIRD SERIES. 40 cts. each

FOURTH SERIES. 50 cts. each

WOOD TYPE

The following series are selected from our Complete Specimen Book of Wood Type, which will be forwarded on application. It contains the most up-to-date, and also all the standard styles of Wood Type, Borders and Ornaments.

SIZES OF FONTS

Wood Type is priced by the letter, and sold in various sized fonts, as under. Orders for less than a font are strictly net; font orders are subject to discount. For schemes of fonts see our Specimen Book of Wood Type.

3A cap font contains 75 letters.

3a lower case font contains 65 letters.

4A cap font contains 106 letters.

4a lower case font contains 90 letters.

5A cap font contains 120 letters.

5a lower case font contains 104 letters.

Figures are put up separately. Each font contains 26 characters, which includes two \$ signs.

Notice to Buyers...

N THIS Section of the Handy Book are shown the best lines of Printing Material and Machinery, covering all the requirements of the printing office.

As the largest buyer in the world of this class of goods, the American Type Founders' Company commands the best in the market at the lowest prices, and is in the best possible position to satisfy its customers.

Buyers of large or small outfits can always get the best money's worth from the American Type Founders' Company. Detailed estimates will be furnished on application to the nearest Branch upon receipt of information concerning the amount to be invested, terms required, and work to be done with such outfits.

FOR THE COMPOSING ROOM.

BODKINS.

No. 1, wood handle, needle steel, each \$.10

No. 2, wood handle, needle steel, each \$.10

TWEEZERS.

No. 11, nickel-plated, each \$.25

This is good and cheap, polished steel, Nonpareil points.

No. 5, nickel-plated, each \$.50

This is the best Tweezer procurable at the price, file point, steel, 4 inches long.

No. 7, nickel-plated, 4 inches long, each \$.75

No. 8, nickel-plated, 4 3/4 inches long, each85

These are the best made, tempered steel, nickel-plated, file-cut points and backs. No. 7 is 4 inches long; No. 8, 4 3/4 inches long.

No. 9. Self-Locking, nickel-plated, each \$.90

it points down and press between fingers gently, and it unlocks; hold it points up and bring points together, and it locks securely. Patented June 2, 1896.

The only Tweezer that can be carried in the pocket with comfort and safety. It locks and unlocks automatically. Hold

No. 3. Combination Tweezer and Bodkin, nickel-plated, each . . \$1 00

When Tweezer is in use the Bodkin folds into it. When Bodkin is required, pressure on the file-cut arc shown in cut brings it out easily, and when extended it locks securely, and is as firm as an ordinary Bodkin. This is the latest and most satisfactory combination. Patent applied for.

COMPOSING STICKS.

THE BUCKEYE.

Quick and easy to set; will not slip; lays flat; as secure as the Common Screw Stick, and easier to set than the Yankee Job Stick.

6 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . \$.90	14 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . \$1.60
8 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.00	16 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.80
10 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.20	20 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 2.20
12 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.40	24 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 2.60

YANKEE JOB.

6 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . \$.75	14 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . \$1.30
8 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . .80	16 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.45
10 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.00	18 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.60
12 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.15	20 ins. \times 2, $2\frac{1}{4}$ or $2\frac{1}{2}$ ins. deep . 1.75

COMMON SCREW.

Prices, same as for Yankee Job Composing Sticks (see above).

THE GROVER.

6 \times $2\frac{1}{4}$ inches \$.90	10 $\frac{1}{2}$ \times $2\frac{1}{2}$ inches (billhead) . \$1.60
8 \times $2\frac{1}{4}$ inches 1.00	12 \times $2\frac{1}{4}$ inches 1.40
10 \times $2\frac{1}{4}$ inches 1.20	16 \times $2\frac{1}{4}$ inches 1.80

Extra Clasps, 10 cents; extra Knees, 40 cents each.

PERFECT NEWS STICKS.

Style No. 1.
One depth only— $2\frac{1}{4}$ inches.

These Sticks are made for setting one measure only, either 13 or $13\frac{1}{2}$ ems Pica, and prevent all the annoyances due to variations in Sticks set inaccurately by careless compositors. It is undoubtedly the best Stick made for news measures.

Style No. 1 is made of best malleable iron; the handle and under side are japanned, so that the Stick cannot rust; the pan itself is milled out, the sides being absolutely square and rigid, and altogether the Stick is as perfect as could be desired.

No. 1. Malleable Iron, milled, 13 or $13\frac{1}{2}$ ems Pica \$.75

Style No. 2.

Style No. 2 is made of the best of steel, and the set bar or knee is riveted firmly to bottom and back of Stick. It is accurate in every respect.

These Sticks are made for 13 or $13\frac{1}{2}$ ems Pica measure, and are $2\frac{1}{4}$ in. deep.

No. 2. Steel riveted, 13 or $13\frac{1}{2}$ ems Pica \$.75

"C" SLOT STICK.

Has two entirely novel features: (1) The inside of face of the knee is adjustable, so that it can be squared up in case the knee wears; (2) The knee is in two sections, so that the Stick can be set to shorter measure without changing the full measure adjustment. See cut, which shows part of the knee at the left set for full measure, while the main part is set to a lesser measure.

6 ins. \times $2\frac{1}{4}$ ins. deep	\$1.15	10 ins. \times $2\frac{1}{4}$ ins. deep	\$1.45
8 ins. \times $2\frac{1}{4}$ ins. deep	1.25	12 ins. \times $2\frac{1}{4}$ ins. deep	1.65

STANDARD JOB COMPOSING STICK.

Sets instantly to Nonpareils or Picas, of the point system only, without the use of leads or quads, and once set cannot possibly slip.

	2 ins.	2¼ ins.	2½ ins.		2 ins.	2¼ ins.	2½ ins.
6 inches	\$1.75	\$1.85	\$1.95	10 inches	\$2.25	\$2.35	\$2.45
8 inches	2.00	2.10	2.20	12 inches	2.50	2.60	2.70

WOODEN POSTER STICKS.

With brass-lined ends, iron knee, and screw clamp.

20 inches	1.10	36 inches	1.50
24 inches	1.20	42 inches	1.80

COMPOSING AND MAKE-UP RULES.

Steel Composing Rules, 15 ems and under, each . . . \$.25

Add 5 cents to above from 15 to 20 ems, and 10 cents extra from 20 to 25 ems.

Nickel plating, 15 cents extra.

Steel Make-up Rules, 15 ems and under, each . . . \$.30

Set of 12 Steel Composing Rules, in leather case . . . \$1.50

COMPOSING STICK RACK.

This Rack holds twelve Sticks, and can be attached to the wall or any other convenient place. The Sticks are held securely, and are preserved from the damage liable to them when "kicking about."

Each \$1.50

KELSEY COPY HOLDER.

Price, each \$.75

PAGE CORD.

The real thing; 8-ply Charter Oak Cotton.

8 oz. balls, each \$.25

PRINTER'S EYE SHADE.

Per dozen \$1.50

Each15

CHALLENGE LAMP HOLDER.

A most convenient and safe attachment for holding a lamp over the compositor's case. It will be readily understood by reference to the cut that the fount holder A can be instantly raised from C to B, as shown by dotted lines, to adapt the position of the light to suit the compositor. Small thumb screws at the top of B and C, with

suitable recesses in A, retain the light perfectly stationary in any position.

Each \$.75

TYPE MEASURES.

Boxwood, triangular shape, the best	\$1.50
Patent 12-inch Cardboard Type Scale25
Lincoln Type Measure, steel tape, in German silver case, 24 inches long, each	2.00

PRINTER'S DIVIDERS.

Always useful in laying out margins and distances, imposing plate forms, etc. A great time saver.

Price, each	\$.85

No. 2, wrought steel, nickel-plated, small, each	.60

Malleable iron, japanned, each	.30
Hickory Shooting Stick, per dozen, 85 cents	each, .08

LITTLE GIANT LEAD AND RULE CUTTERS.

This cut illustrates the latest improvements in these well-known cutters.

Style of Nos. 12 and 18.

Nos. 1 and 3 are the well-known original Little Giants. No. 1 has single, and No. 3 double lever connections. Nos. 12 and 18 have accurate graduated beds and gauges at both front and back of knife, the front gauge being specially designed for cutting leads and rules rapidly, and is so constructed that the cut lead or brass drops off the bed without handling.

No. 1, gauges 12 inches	\$8.00
No. 3, gauges 18 inches (extra strong)	12.00
No. 12, gauges 12½ inches at back and 11½ inches at front, graduated to Picas	10.00
No. 18, gauges 18½ inches at back and 14 inches at front, graduated to Picas	14.00

NONPAREIL LEAD CUTTER.

Will cut leads and slugs six points thick, and, although not recommended as a rule cutter, will cut two-point brass rule. Has back and front gauges.

Leads can be cut very rapidly and easily on this cutter by holding the lever and the hand-hold on frame in right hand as in using hand shears.

Price \$4.00

UTILITY LEAD CUTTER.

The strongest cheap lead cutter made. A reliable cheap tool.

Price \$2.00

ELITE RULE BENDER.

The blade is tool steel and the cylinders of brass. Bends rule from one to six points in thickness. The end of the rule is firmly held in the grooves in cylinder, and can be twisted to any shape.

Price, with instructions for rule bending \$2.00

GRIFFIN HACK SAWS.

For Sawing
Brass, Steel or
Other Metals.

The saw blade is secured to the iron frame by two pins, and may be detached easily. When worn it is cheaper to put in a new blade than to re-file. One dozen extra blades are furnished with each frame. This is a useful tool in any printing office.

Eight-inch Griffin Hack Saw, medium teeth, with one dozen saw blades \$2.00

Extra blades, eight-inch, medium teeth, per dozen \$1.25

PLIERS

For Bending Brass Rule.

Flat-Nose
Pliers.

Round-Nose
Pliers.

Six-inch Round- or
Flat-Nose Pliers,
polished, each . . \$.50

PATENT UPRIGHT MITER MACHINE.

A strong, well-built, accurate machine. The cutting or shaving head has a positive up and down motion, and must cut as much at the bottom as at the top, as it cannot slip. The knife is regulated by set-screw. The sliding gauge is the best of its kind, enabling the operator to feed the rule up to the knife, but affords a positive check at the point where the desired length

is reached. The bed is graduated, and is made movable so that the whole cutting-edge of knife can be used. This machine is mounted in a strong, shallow, wooden box, which catches the shavings, and has at the front end an emery board on which the burr of the rules may be rubbed off.

With Sliding Gauge \$13.00
With Micrometer Point-System Gauge 20.00

GOLDING UPRIGHT MITERER.

This machine differs in principle from the Patent Miterer (described on this page) in this: the rule is held stationary, and the knife is fed up to it, while in the Patent Miterer the knife is stationary and the rule is fed to it. The knife of the Golding Miterer is movable, but it is pivoted in such a way as to enable it to make a positive downward cut the same at the bottom as at the top. The knife adjustment is specially good. The bed is graduated, and is made movable so that the whole cutting-edge of the knife may be used.

Price, boxed \$14.00

LITTLE GIANT RULE SHAPER.

The rule is held flat on the bed by the clamp (2). The gauge (5) is graduated to picas by notches, and is regulated by the pointer (4), which engages in the notches. Five steel cutting tools are furnished with each machine. The cutting tool is held in the head (1). By turning the wheel the cutter is moved back and forth over the rule, sinking deeper at each cut, and when it completes the cut it is lifted automatically, ready for the next cut. If the rule is thinner than 12 points, the head (1) may be brought down to the rule by moving the lever (3).

Any thickness of rule up to 12 point may be mitered. At each cut both sides of the miter are made, and join without further trimming. This machine is not designed for trimming the ends of leads and rules, and therefore does not supersede the upright miterer, but in offices where much mitering is done it will prove a time and rule saver, as it miters very rapidly.

Send for illustrated circular.

Price	\$35.00
Patent graduated gauge, extra	4.00

GOLDING RULE CURVING MACHINE.

This machine curves brass rule from one-quarter inch to eight inches in diameter by pressure exerted by the screw on curved brass plates, between which the rule is put at the proper place to get the required curve, as indicated by a scale engraved on the bed. Smaller curves can be made on this machine than on any other. An attachment is supplied for forming square corners as a substitute for mitered corners.

Brass rule for curving or bending should be annealed. All brass rule made by us can be annealed to order at a slight extra charge.

No. 1, curves one-quarter to four inches diameter	\$12.00
No. 2, curves three-eighths to eight inches diameter	18.00
Dies for forming square corners, per set	1.50

Sectional end view.

SMOOTH-LINED BRASS GALLEYS.

Inside they are perfectly smooth and free from screws. The lining is angle brass, and is soldered to the bottom plate, strengthening the sides, and protecting the wood rim from the action of lye and water. The head is supported by a strong strip of brass.

Rukenbrod Mailing Galley, brass bottom85

LAING PATENT GALLEY LOCK-UP.

Attachable to Any Kind
or Style of Galley.*

A satisfactory, simple, effective lock-up. It may be screwed on any galley; the side stick (which is not beveled) is attached to the lock-up, and has a parallel motion. It is locked or unlocked by pushing the lever up or down by means of a finger knob. The lock-up and the side stick are made of brass.

EVERYTHING FOR THE PRINTER

LINCOLN ALL-BRASS GALLEYS.

Shows the Galley locked at end and side.

Shows the Galley unlocked, with end lock detached.

A good galley for newspaper work. *Made to order* to hold any regular widths of matter in regular use in an office. The upper side or rim of galley is strongly hinged to the bottom. This hinged side is dropped when emptying on galley, and when matter is ready for locking up the side is raised and is held by a spring-catch at head of galley, and by the end clamp which locks the sides and end at the same operation. The catch is loosened by turning lever to the right. These galleys are about one inch wider than the width of column they are made to take.

12-inch News, all brass . . . \$2.00	24-inch News, all brass . . . \$3.00
16-inch News, all brass . . . 2.50	24-inch Book, all brass . . . 3.50

In ordering, give exact width of columns.

PATENT LINOTYPE GALLEY.

This new patent galley is made solely for linotypes, and is the only galley for holding linotype slugs without any side lock-up. A foot clamp is attached to each galley to hold up the matter in taking proofs. This galley will save all the trouble and the loss of time in handling side-sticks, getting quoins to fit, or foot slugs to keep the end line from falling over. One side of the galley is made lower, and the inside of the rims so tapered as to allow inserting and taking out the linotype slugs from the side very readily. The galley, being only one-half of an inch wider than the matter, is conveniently handled and can be placed on the stone, rack or case without taking up valuable space.

End view, 13 ems wide inside.

12 inch, all-brass News Galley, for 16 ems or under*	\$2.00
16 inch, all-brass News Galley, for 16 ems or under	2.25
24 inch, all-brass News Galley, for 16 ems or under	2.50
Extra foot clamps, each	.50

Other sizes made to order. Above prices include foot clamp.

*In ordering, give the measure of column width, as galleys are supplied to take one measure only, not exceeding 16 ems; also send a sample linotype slug.

MOVABLE GALLEY RACKS.

Regular Galley Rack
with Movable Galley Brackets.

Union Movable Galley Rack.

UNION MOVABLE GALLEY RACK.

The Union Movable Galley Rack holds 30 galleys, and is mounted on strong casters so that it can be moved at will to the most convenient position for doing the work in hand.

Union Movable Galley Rack, holds 30 galleys \$21.00

REGULAR GALLEY RACK.

The Regular Galley Rack is intended for placing against the wall. The brackets are secured on a very strong hard-wood frame.

Regular Galley Rack, for 6 galleys	3.00
Regular Galley Rack, for 8 galleys	4.00
Regular Galley Rack, for 10 galleys	5.00
Regular Galley Rack, for 12 galleys	6.00
Regular Galley Rack, for 15 galleys	7.50
Regular Galley Rack, for 20 galleys	10.00

For Galley Brackets, see page 821.

Three-tier Galley Cabinet with Galley Top, to hold Sixty-six Galleys.

Prices.

	Galleys held.	With Flat Top.	With Galley Top.	Boxing.
1 Tier,	20	\$ 8.00	\$14.00	\$.50
1 Tier,	30	11.5075
2 Tier,	40	15.00	25.00	1.00
2 Tier,	50	18.50	. . .	1.25

6 Tier,	132	. . .	62.00	3.00
9 Tier,	198	. . .	85.00	4.00

NOTE.—The shelves in the larger cabinets should be numbered, and the proof of the galley should be numbered to correspond with the number on shelf, thus saving all the time required to locate galleys that are not so numbered. Iron number plates, made for numbering shelves, can be supplied at the following prices, net: 1 tier (20 galleys), \$1.00; 1 tier (30 galleys), \$1.25; 2 tiers (40 galleys), \$1.50; 2 tiers (50 galleys), \$1.75; 2 tiers (60 galleys), \$2.00; 3 tiers, \$2.25; 4 tiers, \$3.00; 6 tiers, \$4.00; 9 tiers, \$5.00.

GALLEY CABINETS.

Particular attention is directed to the Galley Cabinets of larger capacity. They are very desirable in the larger offices, and are designed to carry an immense weight of type safely. All these cabinets are made of hard wood. All flat-top cabinets are made same style as the 1-Tier Cabinet illustrated below; all galley-top cabinets same as the 3-Tier Cabinet shown on this page.

The "Galley-top" Cabinets are of much stronger construction than the "Flat-top," and may be ordered with or without galley top, as desired, at the same prices.

One-tier Flat-Top Galley Cabinet, to hold Twenty Galleys.

HEMPEL IMPROVED QUOIN.

No. 1, small, per dozen pairs \$2.50
 No. 2, large, per dozen pairs 3.00
 Keys, each50

The Hempel Quoins are the standard, tested by time, and approved by those who use them. This is the latest improved quoin, made by the original inventor.

IMPROVED BROWER QUOIN.

No. 2. Large Size Brower Quoin, 4 in. long.

Has central racks and consequently will not throw type off its feet. Works smoothly. The key, of steel, with cut teeth, has a firmer and deeper hold than in the old style quoin.

No. O. "Little Samson," actual size.

The No. O, as illustrated, is the smallest wedge quoin ever made, and will prove very valuable for job printers and on occasions when lock-up must be made in small spaces.

No. o, smallest wedge quoin ever made, "Little Samson," per dozen \$2.00
 No. 1, medium size, per dozen 2.50
 No. 2, large size, per dozen 3.00
 Steel keys, all sizes, each50

UNION LOCKABLE QUOIN.

An exact duplicate of the original Hempel Quoin, with three notches cut in the central rib for the purpose of using the quoin in connection with the Patent Brower Lock, listed below.

No. 1, small, per dozen	\$2.50
No. 2, large, per dozen	3.00
Keys, each50

BROWER QUOIN LOCK.

Fig. 2. The Lock.

The sidewise projection shown in Fig. 2 engages in notches cut in central rib of Union Lockable Quoin, or in the rack teeth of the Brower Quoin (see above). The screw is then set up against the other half of the quoin, effectually preventing it from slipping. Quoins of the wedge principle are all liable, on long runs, to be loosened by the vibrations of the press. These locks make the lock-up doubly sure. They should be applied by the pressman after he has completed the make-ready and before the run is commenced.

No. 0, to fit No. 0 Brower Quoin, per dozen	\$2.50
No. 1, to fit No. 1 Brower Quoin, per dozen	2.75
No. 2, to fit No. 2 Brower Quoin, per dozen	3.00

No. 4, to fit No. 2 Union Lockable Quoin, per dozen	3.00
Screw-driver, to fasten quoin lock, each50

MIDGET SAFETY QUOIN.

Fig. 2.—This cut shows extreme expansion of six points when locked.

It is locked by a tap of a mallet, and occupies no more space in length when locked than when unlocked.

Can be used in a space 18 points wide by 120 points long, either outside or inside a form. It is absolutely safe, as when locked it rests against its corresponding flat surfaces, and the harder the surface it bears against the better.

Fig. 1 illustrates the method of unlocking.

Fig. 3 shows Midget Quoin unlocked.

This invaluable quoin may be used to lock up matter inside a brass circle or oval, or within a solid border, or in places where no other quoin of wood or metal can be used.

Midget Quoins are made of hard brass.

Price, per dozen, with key, net	\$2.00

IMPOSING TABLES AND MARBLE STONES.

Square-legged Imposing Table.

Square-legged imposing tables are made of soft wood, varnished and bolted together. Round-legged imposing tables are made of hard wood, cherry finish, and are bolted together. Tables over six feet in length have six legs (see illustration on next page). The larger tables have two drawers, one at each end, and the smaller one drawer, which pulls out both sides.

A "coffin" is a hard-wood frame which serves as a bed for the stone, protects its edges, and affords a rest for galleys when used for sliding off matter.

IMPOSING TABLES WITH LETTER BOARDS.

No better disposition of the space underneath an imposing table can be made than to use it for letter boards. If the type is dead it is shifted from the stone to the board without loss of time; if the matter is alive, it is handy for imposition.

No. 9. With 36 x 60-inch Marble Top; has thirty-two Letter Boards, each 17½ x 26 inches inside.

These tables are made in the most substantial manner, of hard wood, varnished, and strongly and firmly bolted together. The boards are made of hard wood, closed at sides and back, and are rabbeted in front to receive galley when sliding off type.

LABOR-SAVING FURNITURE.

No. 3. Single Case, with Partitions and Door.

This Labor-Saving Furniture is thoroughly oiled, and cut to the point standard. Every piece has the size stamped on the end.

Cases are made *with or without* partitions. The usefulness of the font is doubled by having it in a case with partitions.

A Single Case contains 560 pieces, divided into 10 pieces, each 10, 15, 20, 25, 30, 40, 50 and 60 ems long by 2, 3, 4, 5, 6, 8 and 10 ems wide.

A Half Case contains half the number of pieces held in a Single Case.

The Mammoth Case is described below, and is the most complete, well assorted and useful ever put on the market, as a study of its contents will demonstrate.

No. 1.	Half Case contains 280 pieces, with partitions	\$ 6.00
No. 2.	Half Case contains 280 pieces, without partitions	5.00
No. 3.	Single Case contains 560 pieces, with partitions	10.00
No. 4.	Single Case contains 560 pieces, without partitions	8.00
No. 5.	Double Case contains 1120 pieces, with partitions	18.00

No. 7.	Mammoth Case, designed for large offices, with partitions, no door (see description below)	40.00

MAMMOTH LABOR-SAVING FURNITURE CASE—Is specially designed for large offices, and contains the following assortment of selected furniture, from 10 to 160 ems long: 270 pieces each 2-line, 3-line and 4-line furniture; 225 pieces each 5-line and 6-line furniture; 135 pieces each 8-line and 10-line furniture—assorted in 10, 15, 20, 25, 30, 40, 50, 60, 70, 80, 90, 100, 120, 140 and 160 ems lengths. There is a larger proportion of the narrower and most-used sizes than of the wide furniture. Made only with partitions.

LABOR-SAVING FURNITURE, WITHOUT CASES.

Half Font of 280 pieces, in a box	\$ 2.75
Single Font of 560 pieces, in a box	5.00
Double Font of 1120 pieces, in a box	10.00

LABOR=SAVING LEAD RACKS.

Two-tier Wisconsin Lead Rack (see illustration above) \$6.00

Takes leads from 4 to 12½ ems (varying by ems), and from 13 to 60 ems (varying by ems), the lengths being stamped over each compartment. Compartments are eight inches high. Will hold 750 pounds of leads and slugs.

Four-tier Wisconsin Lead Rack 9.00

Has two compartments each for all sizes in the two-tier rack, and is similar in design and construction. Will hold 1500 pounds of leads and slugs.

Eureka Lead Rack (see illustration) 2.50

Boston Lead Rack, set of four (see illustration) 5.40

HANDY LETTER BOARD CABINETS.

For the storage and safe keeping of job work these cabinets are unri-

Handy Letter Board Cabinet with Sixteen Boards.

valued. Their cost will be saved in a few months by the prevention of pi. They occupy a floor space of 16×19 inches, with letter boards of 12×15 inches inside, and are made of hard wood throughout, in a solid and substantial manner. Boards are closed at sides and back, and are rabbeted in front to receive galleys. They are well-named "Handy." For job work within their size—and this the larger variety of such work—these small boards are much superior to the larger boards usually put under imposing tables, as it is a back-breaking job to get a form from these large boards when they are full of type.

It is distinctly an economy to place dead and live forms in such a receptacle as this, rather than to incumber useful space on an imposing stone, the type on which is always liable to damage. The protection they afford from dust is also worthy of consideration.

With 10 boards . . \$10.50
With 12 boards . . 12.00
With 16 boards . . 15.00

Other sizes made to order at proportionate prices.

HARD-WOOD LETTER BOARDS.

Made of selected stock, smooth and true, with closed sides and backs, rabbeted in front to allow matter to slide on galleys easily.

No. 1 fits two-third case stands; No. 2, three-quarter stands, and No. 3, full-size stands or racks.

Inches Outside.

No. 1, $21\frac{3}{4} \times 20\frac{1}{2}$ \$1.20

No. 2, $26\frac{1}{4} \times 20\frac{1}{2}$ 1.40

No. 3, $32\frac{1}{4} \times 20\frac{1}{2}$ 1.70

PRICE LIST OF CASES.

For illustrations of cases, see pages 804 and 805.

Shows triple, non-warpable, bottom.

Shows at AA how bottom is set into side and front rails, so that the case slides on the rails instead of the bottom.

cases slide much easier and with considerable less wear and tear.

Our cases all have patent "New Departure" three-ply bottoms, which prevent splitting, warping and shrinking. These bottoms are set into the side and front rails (see AA), so that the case slides on the side rails. As the grain of the side rails and of the case-runs in stands and cabinets run the same way, the

For Algebraic and Medical Signs.

Signs, Borders, Accents, Split Fractions, although most expensive, are usually stowed away in odd boxes of cap cases, and are rarely to be found when needed. "Quarter" Cases supply a means of keeping these valuable sorts where they can be found. They can be placed on a cap case, on a stand, or on the stone, convenient to hand of compositor. In setting mathematical work, foreign languages, dictionaries, and special catalogues, these "Quarter" Cases will prove invaluable. We show a few schemes for laying signs, fractions, etc., but various other uses for special purposes will suggest themselves to the "intelligent compositor."

The American Type Founders' Company makes the most complete assortment of signs, accented letters, etc., in the world. It is the only complete type-founding concern in the United States.

HARRIS RULE CASES.

Four Harris Rule Cases in a Full-size Blank Case. Price, \$4.90.

In HARRIS RULE CASES the rule cannot fall flat—must always stay on end. Pi is prevented, because each box is accurately adjusted for its special size—for instance, a 21-em rule will not go into the 20-em rule box. Generous provision is made for the smaller sizes—the most valuable sizes in a labor-saving font. The cases may be used in sets or separately, as Nos. 1 and 2 are complete in themselves. Four of them fit into a full-size blank case.

The rule referred to below is 2 point, which is the most used.

No. 1 Harris Rule Case holds two complete small fonts of Labor Saving Rule, each weighing 8 pounds, or 16 pounds in all. Each half of this case holds eighteen pieces each length from 1 to 8½ ems (varying by ems), and eighteen pieces each from 9 to 18 ems (varying by ems), and nine pieces each 19, 20, 21, 22, 24, 26 and 28 ems, besides boxes for right and left miters.

No. 2 Harris Rule Case holds one complete font of 16 pounds weight or less. It has compartments for thirty-six pieces each from 1 to 9 ems long (varying by ems), eighteen pieces each from 10 to 24 ems long (varying by ems), and eighteen pieces each of 26, 28, 30, 32, 34, 36 ems long, besides boxes for right and left miters. A large proportion of small lengths allowed for.

Nos. 3 and 4 Harris Rule Cases are designed to be used together to hold a font of rule suitable for a large office, weighing 32 pounds or less. Two and in some cases four boxes are used to hold the most-used sizes. Each case has its proportion of the small sizes, so that if it is desired to carry one case to a compositor's stand for use in rule work, the other is available in its regular place with a good working font. These cases have compartments for seventy-two pieces each from 1 to 9 ems long (varying by ems), thirty-six pieces each from 10 to 24 ems long (varying by ems), and eighteen pieces each from 25 to 36 ems long (varying by ems), and boxes for right and left miters.

Harris Rule Case No. 1, holds two 8-pound fonts	\$1.25
Harris Rule Case No. 2, holds one 16-pound font	1.00
Harris Rule Case No. 3, { used together, hold one 32-pound font }	1.00
Harris Rule Case No. 4, }	1.00
Full-size Blank Case, to hold four of above65

ILLUSTRATIONS OF CASES.

It is unnecessary to illustrate the most-used styles of Cases. Those illustrated here have exceptional merit.

CALIFORNIA JOB CASE.

Has fourteen boxes less on cap side than the regular Italic Job Case, thus giving more space for the cap alphabet. A more satisfactory case for the ordinary job font than the Italic Job Case, especially in three-quarter size.

Full size . . . \$.90
Three-quarter .80

IMPROVED JOB CASE.

Holds caps, small caps, lower case and figures, or a cap and lower case font (with figures) and an extra cap font. Will also hold three cap fonts, all with figures. Made full size only.

Price . . . \$1.20

YANKEE JOB CASE.

In two-third size this case is a necessity, but in full and three-quarter sizes it is inferior in utility to other job cases.

Full size . . . \$1.00
Three-quarter .85
Two-thirds .75

DOUBLE LOWER CASE.

A most useful case. In most job fonts the caps occupy as much space as the lower case, while ordinary job cases give the caps one-half the room allotted the lower case. In this case the space is divided equally between the caps and lower case. Made full size only.

Price . . . \$1.20

SPACE AND QUAD CASE.

This is an absolutely essential case in offices where economy of time and material is a consideration. Each case holds eight sizes of spaces and quads. Made full-size only.

Price . . . \$1.00

EVERYTHING FOR THE PRINTER

A handy receptacle for metal furniture. There are compartments for 1, 2, 3, 4, 5, 6, 8, 10, 15, 20, 25 and 50 ems. The double-depth case takes three layers of furniture; the single-depth case takes two layers. The latter can be put in a full-size case stand or rack, and the double-depth case is for use on top of a stand or cabinet, or a special place can be made for it under the stone. Made full size only.

METAL FURNITURE CASE.

Double depth \$2.00 | Single depth \$1.50

Although mostly sold for wood type, these cases are made so accurately as to be suitable for large Script fonts. The movable partitions are adjustable by Picas. Nothing injures expensive Script type so much as tumbling about in a case. The use of Script Cases will save type. Made in full and two-third sizes.

SCRIPT OR WOOD TYPE CASE.

Full size \$.90 | Two-third size \$.75

Has compartments for brass rule from 1 to 36 ems Pica, and from 1½ to 9½ ems Pica, with places for miters. Size outside, 7¾ x 15¼ inches. Four fit in a full-size blank case.

COMPACT RULE CASE.

Price \$.90

WOOD TYPE CASE.

No. 3 (Mammoth) Wood Type Case, 23 x 44 inches, with slotted sides. For special rack to hold this size case, see page 817.

CASE STANDS.

No. 6. Double News Stand, with Eight Racks. No. 11. Double Job Stand, with Racks for Twelve Full and Twelve Two-third Cases.

PRICE LIST OF CASE STANDS.

No. 1.	Single, without racks	\$2.75
" 2.	Single, with racks for 12 two-third cases	3.00

" 17.	Double City Stand, with racks for 30 full-size cases (see illustration)	9.50

No. 15. Double Stand, with Galley Rest, and Racks for Twenty-four Full-size Cases.

No. 17. Double City Stand. The upper cases project over the lower, bringing the caps nearer the hand. There is a shelf to hold a galley under the lower case, which can be pushed back to permit matter to be emptied on the galley.

NEW YORK SPACE=SAVING CASE STANDS.

New York Double Stand.

New York Quadruple Stand.
(See end view below.)

These are *space-saving, rent-reducing stands*. Two New York Double Stands, holding sixty cases in racks and four pairs cases on top, occupy eighteen square feet of floor space, as against thirty square feet occupied by two ordinary double stands, holding at most forty-eight cases in racks and four pairs cases on top—a saving of twelve square feet. Two Double City Stands occupy a floor space of twenty-five square feet as against seventeen feet occupied by one Quadruple New York Stand—a saving of eight square feet. This saving is obtained by making the racks correspond to size of cases exactly, bringing forward the cap cases so that they do not overhang at the back of stand (as they do on ordinary stands), and extending the lower cases several inches into the alley.

End view of New York Window and Quadruple Stands.

Other Points of Superiority.

The lower cases project into the alley several inches, affording the compositor ample leg room, and allowing him to get closer to the type. The angle of the lower case is just right for rapid setting.

The upper case is raised above the lower, and brought forward closer to the compositor's hand, while not obstructing the figure boxes of the lower case.

The cases are held on strong iron brackets, securely screwed to a hard-wood top, which is perfectly smooth, and very useful for storing tied-up matter or for other purposes.

The Window Stand is a rearrangement of the Double Stand, so that it occupies a square area and is very suitable for placing opposite a window.

New York Single Stand, with racks for fifteen cases	\$6.50
New York Double Stand, with racks for thirty cases	10.50
New York Quadruple Stand, with racks for sixty cases	18.00
New York Window Stand, with racks for thirty cases	10.50

AUTOCRAT CASE STAND.

This is a printer's stand or frame in its simplest, most compact and convenient form. The most prominent feature is a Galley Tray, under each lower case, where compositors can empty the sticks by simply pushing the lower case up sufficiently to expose the galley, after which the case is drawn back to its place.

Each Single Stand accommodates two pairs of news cases, fifteen full-size job cases and six news galleys. The Double Stand is made so backs of job cases come together, and will accommodate two pairs of

news cases, thirty full-size job or triple cases and six galleys. A large space on top, back of the brackets, may be used for storing live or dead tied-up matter.

Single Stand for 19 cases	\$ 8.50
Single Stand for 19 cases, with paneled ends and back	10.00
Double Stand for 34 cases	10.00
Double Stand for 34 cases, with paneled ends	11.00

CASE RACKS.

Made of hard wood, bolted together, and the higher racks are braced at the centre with iron rods to prevent spreading.

Full-size Cases.	Height.	Regular (see cut).	Closed Back and Sides.
Single, to hold 10 cases, 38 in.		\$5.50	\$7.75

WISCONSIN HARD WOOD CABINETS

With "New Departure" Cases.

Twenty-Case Galley-Top Wisconsin Cabinet.

and sixteen cases to order, though not recommended.

Although made of hard wood, cherry finish, these cabinets are sold at the same prices as ordinary cheap-looking stained cabinets. Three-quarter and full-size cabinets are furnished with California job cases, described on page 804, which are preferable to Italic cases, as they afford more room for the caps. The bottoms are made flush with the floor, to prevent pi from getting underneath. The sides are double paneled and very tastefully moulded. Double case brackets may be put on top of the flat-top cabinets, making a very convenient stand, the regular height from the floor. *Galley-Top Cabinets are kept in stock with twenty cases only, but can be furnished for twelve*

DOUBLE CASE BRACKETS, Style A, which fit on top of flat-top cabinets, to hold a pair of cases (see illustration of bracket, style A, page 821), per pair **\$1.50**

AMERICAN STEEL-RUN CABINETS

hold 50 per cent. more type in same floor-space occupied by Regular 20-Case Cabinets.

By substituting steel for wood in the runs, the awkward upper projections on the fronts of regular cabinet cases (which in the ordinary are put on to hide the wooden runs) are dispensed with, and ten more cases are got into the same space. Cases are easier to set out of, and *all cases are within easy reach of compositors.*

The cabinets are made of hard wood, polished, braced in centre to prevent spreading, and California job cases (giving one-third more room for caps by dispensing with two superfluous rows of boxes) are used instead of Italic cases.

The height of the 30-case cabinets is 53 inches; of the 40-case, 68 inches. Cabinets can be supplied any height, but very high cabinets cannot be recommended owing to the loss of time in getting the top cases out of them.

Attention is directed to the common-sense assortment of cases in these cabinets. In thirty cases there will be required some cases for holding cap fonts.

The illustration herewith shows the steel run used in American Cabinets. Screws are countersunk.

	Flat Top.	Galley Top.
30-case American Steel-Run Cabinet, with 25 two-third job and 5 two-third cap cases	\$35.00	\$38.00

40-case American Steel-Run Cabinet, with 30 full-size California job, 6 full-size cap, and 4 full-size triple cases	60.00	64.00

PORTER'S PATENT EXTENSION FRONT
STEEL-RUN CABINETS.

Notice the Extension Sides, the chief merit of this Cabinet.

Shows construction of runs in Porter Cabinets. The steel runs are secured between wood, the wood screwed to sides, and two iron rods are passed through as extra strengtheners.

The sides of these cabinets are extended four inches beyond the fronts of the cases. These extensions serve the printer in two ways: (1) A case near the top of a cabinet may be taken from its rack and placed in a more convenient position for setting from, and will be held by the extensions without withdrawing another case. This cannot be done on any other cabinet. (2) The extensions permit cases to be drawn out further from the racks than is possible in other cabinets, making it easier to set out of the rear boxes. In addition, these cabinets have all the best points of other cabinets, such as steel runs, "New Departure" cases, hard wood throughout, and are stronger than any other cabinets, as will be seen by examining the sectional illustration above.

The extension sides make it practicable to use higher cabinets, containing more cases in a tier, than can be advised where ordinary cabinets are used.

No. 1, with 25 full-size California job cases, one tier, height 45 in. .	\$43.00
No. 2, with 30 full-size California job cases, one tier, height 53 in. .	51.00
No. 3, with 40 full-size California job cases, one tier, height 68 in. .	68.00
No. 4, with 50 full-size California job cases, one tier, height 84 in. .	85.00
No. 8, with 25 full-size blank cases, one tier, height 45 in.	38.00
No. 9, with 30 full-size blank cases, one tier, height 53 in.	45.00
No. 10, with 40 full-size blank cases, one tier, height 68 in.	60.00
No. 11, with 50 full-size blank cases, one tier, height 84 in.	75.00

Porter Cabinets of greater height can be supplied if desired. As all the above cabinets have flat tops we do not list any double cabinets. A double 25-case (50 cases in all) will cost \$85; a double 30-case, \$100. Single tier, flat-top cabinets are always preferable to double, because it is easier to find positions for them. They are moved easier, and there is no saving in space by using double flat-top cabinets.

EVERYTHING FOR THE PRINTER

COMBINATION CABINET No. 1.

Made of hard wood, cherry finish. Contains 18 full-size California job, 18 two-third job, 2 pairs full-size news cases on top, 2 copy drawers, and 10 sort drawers with partitions. \$75.00

EAGLE CABINET.

Made of hard wood, cherry finish. Contains 40 cases in all, including 12 full-size California job, 2 each full-size triple and cap cases, 20 three-quarter California job cases, 2 pairs full-size news cases on top, and 2 copy drawers \$70.00

"AMERICAN-POLHEMUS" CABINETS.

All Hard Wood, Cherry Finish.

The object of the American-Polhemus Cabinet is to save time and space. Time is lost on the ordinary cabinets by stationing the compositor in front of twenty cases, all frequently in use by other men, who, when setting or distributing from them, keep the man at the cabinet idle. On the American-Polhemus cabinets the job cases are unobstructed, and the compositor stands at the back, where he cannot be interrupted. If he is setting solid matter he can empty his sticks, without walking a step, on a galley kept under his lower case, as the cases are held by the Patent Tilting Bracket and Galley Rest. Illustrated on page 815.

Front view of American-Polhemus Double Cabinet, showing Sort Drawers, Galley Top and Job Cases.

Back of Double Cabinet, showing arrangement of News Cases on the Patent Tilting Brackets.

Every inch of space on the American-Polhemus cabinets is utilized to advantage. The galley top or bank is a most useful addition. The space between the cases is used as a sort cabinet. The top is flat, and tied-up matter may be kept on it, as the iron case brackets admit of easy access to the space under the cases and galley top. The brackets which hold the cases project into the alley eight inches, giving the compositor plenty of knee-room, while saving floor space.

Single American-Polhemus Cabinet—Complete with 18 full-size California job cases, 1 pair of news cases, galley top, and 1 pair of patent tilting brackets.

\$35.00

Double American-Polhemus Cabinet—Complete with 18 full-size and 20 three-quarter California job cases, 2 pairs of news cases, galley top, 10 sort drawers, and 2 pairs of patent tilting brackets.

75.00

Triple American-Polhemus Cabinet—Complete with 18 full-size and 40 three-quarter California job cases, 3 pairs news cases, galley top, 10 sort drawers, galley rack, and 3 pairs of patent tilting brackets.

110.00

STEEL-RUN AMERICAN-POLHEMUS CABINETS.

All Hard Wood, Cherry Finish.

These cabinets are similar to the American-Polhemus Cabinets, illustrated on opposite page, except that the use of steel runs instead of wood runs increases their case-holding capacity without changing floor space or height.

- No. 5½. Double American-Polhemus Cabinet—Contains 18 full-size California job, 3 full-size triple, 4 full-size cap, 20 three-quarter California job, 5 three-quarter cap, and 2 pairs of full-size news cases on top, 10 sort drawers, a galley top, and 2 pairs of patent tilting brackets \$95.00
- No. 6½. Double American-Polhemus Cabinet—Contains 43 full-size California job, 4 full-size cap, 3 full-size triple, and 2 pairs of full-size news cases on top, a galley top, and 2 pairs of patent tilting brackets (*no sort drawers*) 95.00
- No. 7½. Single American-Polhemus Cabinet—Contains 19 full-size California job, 3 each full-size triple and cap cases, 1 pair of full-sized news cases on top, a galley top, and 1 pair of patent tilting brackets 47.00

WISCONSIN WINDOW CABINET.

Specially designed for placing in front of a window, as it does not obstruct the light, of which the cases on top get the full benefit. Two men may work undisturbed at the sides, while the job cases in front are convenient for other men. The top is flat, and useful for holding tied-up type.

These cabinets have the patent tilting bracket and galley rest, which enables a compositor to empty his stick without leaving the cabinet by simply tilting his lower case, as shown in the cut, thus exposing the galley.

PATENT TILTING CASE BRACKET.

Used on Wisconsin Window and American-Polhemus Cabinets.

B B (outline) shows bracket holding case in position for setting. Shaded cut shows bracket tilted up, allowing compositor to empty on galley below lower case, which is more clearly shown in cut of Wisconsin Window Cabinet printed above. These brackets are supplied with all American-Polhemus Cabinets.

Wisconsin Window Cabinet, with two pairs of Patent Tilting Brackets and eighteen full-sized California job cases, two pairs of news cases on top, hard wood, cherry finish \$36.00

ROWEN BORDER AND SCRIPT TYPE CABINETS.

Rowen Border Cabinet with Twenty Cases.

These cabinets supply the long-felt need of a proper receptacle for borders, keeping them in compact shape and preserving the face.

The cases in these cabinets are 10×12 inches inside, and are tilted sufficiently to keep the type on its feet. The borders or type are held between movable division strips, which are 18 points wide, while the slots into which these strips fit are set 6 points apart, so that they can be adjusted to hold 6, 12, 18, 24, 30, 36, 42, 48, 54, 60, or 72-point bodies, while such irregular and seldom-used bodies as 8 and 9 point may be carried in the 12-point drawers, or special strips may be procured for them.

For script type a quantity of metal pinch springs is furnished with each cabinet, for inserting between the different letters in a font, so that if all the letters "d" are removed, the pinch spring holds the letters "e" on their feet. The advantages of keeping delicate scripts in cases where the faces of the letters are not subject to friction and scratching will be apparent to all.

No. 1, 4 drawers, one tier, height 12 inches	\$ 8.00
No. 2, 6 drawers, one tier, height 16 inches	10.50
No. 3, 10 drawers, one tier, height 25 inches	16.00
No. 4, 16 drawers, two tiers, height 21 inches	25.00
No. 5, 20 drawers, two tiers, height 25 inches	30.00
No. 6, 30 drawers, two tiers, height 35 inches	45.00
No. 7, 40 drawers, two tiers, height 44 inches	60.00

Each case will hold 30 feet of 6-point, or 24 feet of 12-point, or 20 feet of 18-point, or 17 feet of 24-point, or 15 feet of 30-point, or 13 feet of 36-point borders.

WOOD TYPE CABINETS.

No. 5 Wood Type Cabinet, with Galley Top. Occupies nine square feet floor space, and affords one hundred and twelve square feet for storage of type.

Very substantially constructed of hard wood, cherry finish. The cases are slotted on the sides, and have movable strips which may be adjusted to Picas. The cases in the Mammoth Cabinet (23×44 inches) have a centre bar, and cases in the Regular Cabinet (23×32 inches) have no centre bar.

These cabinets afford the most economical method of keeping wood type. The top of cabinet is available for use in laying out lines. They save the time lost in climbing to shelves, and the wood type is kept clean and is less liable to warp.

		Flat Top.	Galley Top.

WOOD TYPE CASE RACK,

To hold twenty No. 3 Wood Type Cases (made to order) \$9.00

For prices of Wood Type Cases, see page 801. No. 3 Wood Type Cases are 23×44 inches over all, and the price is \$1.30 each.

Flat-Top Sixteen-Case Electro Cabinet.

ELECTRO AND CUT CABINETS.

These cabinets are filled with blank cases, and are made of polished ash, antique oak finish, with bronze case-pulls. The cases have extension backs. In addition to the ordinary use of the printer, these cabinets can be recommended to advertisers for keeping their wood cuts, etc., for keeping samples of hardware, confectionery, fancy stationery, for seeds, and many other purposes.

All sizes can be supplied with galley tops at an advance of \$3.00 on flat-top prices, but galley tops are not recommended except on 20-case cabinets.

PAPER AND CARD STOCK CABINETS.

Made very strongly of hard wood, cherry finish. High-priced papers and cardboard should be kept in a dust-tight receptacle, to prevent wastage and economize space.

No. 1, 12 drawers, each drawer holding 22½ × 28-inch cardboard, or smaller.

Price \$37.00

No. 2, 12 drawers, each drawer taking full sheet of 28 × 42 inches.

Price \$48.00

The cabinets are 48 inches high. The drawers are 2½ and 5 inches deep, and have movable partitions.

No. 1 Paper Stock Cabinet. Occupies 26 × 34 inches floor space.

No. 1 Specimen Cabinet, 26 inches wide, 42 inches high, and 19 inches deep.

SPECIMEN CABINETS.

Made in ash, with antique oak finish. These cabinets are handsomely made, and will be an ornament to any office.

The drawers have movable partitions, and are made in two depths—2½ inches and 5 inches. The No. 1 Cabinet is the proper height for placing a letter-copying press on.

The methodical classification and preservation of specimens in a cabinet enables customers to decide on what they want quickly, and in many cases suggests other requirements. Let the public see what you have to sell, and they will become buyers.

No. 1. 8 drawers, 26 ins. wide by 19 ins. deep by 42 ins. high . . . \$14.00
 No. 2. 12 drawers, 26 ins. wide by 19 ins. deep by 50 ins. high . . . 20.00

BOOKBINDERS' CABINETS.

Cases used in Bookbinders' Cabinet.

Made of hard wood, cherry finish, with bronzed pulls on each case. The cases are made in exactly the same style as printers' cases. These cabinets occupy a space of 20×20 inches,

and may be put on or under a bench. "A place for everything and everything in its place" is a rule bookbinders should live up to, and these cabinets enable them to do so.

Cabinets with 6 cases \$ 8.00
 Cabinets with 10 cases 12.00
 Cabinets with 15 cases 16.50

BOOKBINDERS' CASE (Half Cap Case), 16×16¼ inches, without bronze pull, each60

HANDY SORT CABINETS.

Handy Sort Cabinet, with thirty drawers.

Cabinet with 10 Handy Sort Drawers	\$12.00

Cabinet with 30 Handy Sort Drawers	35.00
Cabinet with 40 Handy Sort Drawers	47.00
Cabinet with 50 Handy Sort Drawers	59.00

These cabinets are fitted with serviceable sort drawers which should supplant the various cigar-box-tin-can arrangements which disgrace so many offices. The drawers are 8x20 inches over all, and two inches deep. The cabinets are very strong, made of hard wood, and remarkably low-priced. The drawers, which are also for sale separately, have movable partitions, and may be adjusted to the special requirements of any printing office. All drawers have strong bronze drawer-pulls, whether sold in cabinets or separately.

HANDY SORT DRAWERS.

Each. \$.90

Sort Cabinets made to order to fit any space, or to any dimensions, at proportionate prices.

BRASS LABEL HOLDER.

The utility of these Label Holders is apparent at a glance, especially when extra men are put on, as it enables them to locate the type quickly.

In use in the govern-
ment printing offices
of United States and
Canada.

automatic. Impression cylinder is covered with seamless vulcanized rubber, taking clean and sharp impressions.

With 18-inch bed, capable of proving four single-column galleys
at one impression, or large magazine pages \$300.00

With 24-inch bed, adapted for full-page newspaper proofs . . . 400.00

PRINTERS' SAW TABLE, With Shoot-Board Attached.

A very necessary machine in large printing offices. It will saw wood, metal or brass, and will trim wood and metal accurately from the merest shave upward. It affords the quickest and most accurate method of cutting slugs, furniture, thick brass rule and plates, and as it is fitted in the most complete manner with gauges, all cutting and trimming is done with perfect squareness and trueness. An attachment for sawing linotype slugs is furnished for \$15.00 extra.

This is a thoroughly well-built machine, equal to similar machines used by electrotypers, made of iron and steel, with accurate ad-

justable gauges. The saw is raised or lowered by means of a clamp-screw set under the table. The countershaft is attached to the saw and should not run less than four hundred revolutions per minute. The driving pulley is 7 inches in diameter, for 2½-inch belt. Size of table is 18×24 inches, height 40 inches, and floor space occupied 24×32 inches.

Attachment for cutting Linotype Slugs.

Saw table with shoot-board	\$85.00
Saw table without shoot-board	70.00
Attachment for sawing linotype slugs, extra	15.00

ENGRAVERS' TOOLS.

Six tools, sharpened for use, with handles, in box \$2.50

ENGRAVERS' WOOD.

Prepared to order, in the best manner. Prices are net.

Boxwood, per square inch	2 to 5 cents.
Rock Maple, per square inch	1 and 1½ cents.
Holly-wood Face, per square inch	1 cents.
Soft-wood Poster Tint Blocks, 27½×39¼ inches	\$1.25 each.

HORIZONTAL WROUGHT IRON STANDING GALLEYS.

Made to Order.

The Wrought Iron Standing Gallies, with columns running horizontally (see cut) have iron racks and all-brass tops. The brass strips screwed on top are L-shaped, making the partitions only a little wider than column width, but leaving enough room for the fingers to lift the type, thus reducing the width of the top, making it more convenient to reach the upper rows. The columns are made to any desired length and width.

The cut on this page is an illustration of the No. 6 size, which is twelve feet long, with iron racks for 32 full-size cases.

STANDING GALLEY WITH LETTER BOARDS.

Contains 20 hard-wood letter boards, size of each $24 \times 30\frac{1}{2}$ inches inside, and racks for 26 triple column galleys; or if galley racks are not needed, 10 letter boards, each 24×21 inches inside, will be furnished instead at the same price. The brass-top style is covered with a single sheet of finest hard-rolled brass, and all division strips are lined with brass. Length, 8 feet; depth, 27 inches. Height in front, 3 feet; at back, 3 feet 10 inches.

Prices: unlined, wood top, \$60.00; zinc-lined top, \$80.00; brass-lined top, \$90.00.

STANDING GALLEYS.

See description and prices on opposite page.

STANDING GALLEYS.

Made to Order.

See illustration on opposite page. The stand is always of wood, but the tops may be of wood, zinc or brass.

Buyers may have these made to any dimensions they desire, at prices proportionate to those quoted below for the sizes and styles commonly used.

The space underneath may be utilized in various ways. In place of the case racks, as shown in the cuts, galley shelves and racks or letter boards can be put in. In ordering Standing Gallies, or in sending for estimates of cost, it is necessary to be *explicit* as to measurements and other requirements.

The regular width of single columns is three inches; of double columns, six inches; but these may be varied. The column strips are made of the same material as ordered for the top.

WROUGHT IRON LONGITUDINAL STANDING GALLEY.

With All-Brass Tops.

These Standing Galleys are made in a substantial, workmanlike manner, entirely of brass and wrought iron. The top is covered with sheet brass, and screwed on the hard-wood top from underneath, leaving the surface perfectly smooth.

Wrought Iron Standing Galley, with All-Brass Top. This illustrates one 7 feet long and 26 inches wide.

Standing Galleys with columns running longitudinally are designed for dead matter, and are considered almost indispensable by those using them. Uniform distribution is guaranteed, as the compositor is compelled to take the type from the top, and gets it into the cases regularly; consequently the type gets an even wear, which cannot be attained by the old method. The front is provided with a channel or gutter for the water used in wetting the type to run off into a receptacle. *Any size made to order.*

Price, per single column, 26 inches deep, in banks not less than 5 feet long \$3.50

TYPE-HIGH GAUGE.

Much time may be saved in the press room if the maker-up will test all electrotypes, and have those that are high or low brought to the proper height by an electrotyper, or do it himself, before the form goes to press. The wise employer should insist on the use of this Gauge.

Price, each \$2.50

**THORNE
TYPE-
SETTING
AND
DISTRIBUTING
MACHINE.**

Type-setting machines, long regarded as an experiment, are now as much of a necessity in the average printing office as cylinder presses, and publishers or printers having any considerable amount of plain book or news composition cannot afford in these days of competition and hurry to rely upon slow, laborious and expensive hand composition, when this simple, reliable, and moderate-priced machine is available, which will produce the same work in a perfect manner, in half the time, and at less than half the expense of hand work.

The Thorne Type-Setting Machine, using perfect type, produces results typographically equal, if not superior, to the work of the hand compositor; so that not only are these machines now in successful use on news and periodical work, but they are likewise constantly employed in the production of books requiring composition of the most exacting character.

The processes of distribution and composition are combined in a compact and

simple machine of marvelous accuracy of construction, occupying but small floor space, and requiring little more power for its operation than a sewing machine. The different processes of the work are under the instant and ready control of the operators; the distributor may be operated or stopped without interfering with the work of composition, and the setting of type may continue so long as there is type for distribution. There being no time lost in distribution, composition may be carried on continuously should occasion require it, and it is a common practice to run machines with two sets of operators night and day.

Proficiency in operating the machine is readily acquired after short practice by printers, and no machinist is required in attendance, for all working parts are made interchangeable. When a part becomes worn or damaged it can be replaced by any one of average mechanical ability. The capacity of the machine is limited only by the proficiency of the operator, and the character of the work being handled; on book work from five to six thousand ems per hour are readily distributed and set, while on news work and work of similar nature from six to nine thousand ems are produced by expert operators.

Machines are constructed to handle any one size of type from Agate to Pica, and for book work are so constructed that the measure may be changed in a minute's time. They are adaptable for use in any language, and machines are now employed by English, French, Finnish, Hebrew and German printers to set the type of newspapers, books and periodicals published in these languages. In the classes of work for which it is designed the machine will earn its cost within a few months.

Price, complete with all fixtures, f. o. b. Hartford, Conn . . . \$1500.00

METALLIC TAPE COUPLERS.

This is a device for connecting ends of tape on presses and folding-machines, so that there will be no wear at the joined parts, as is usual on sewed ends, which wear and cause the tape to run crooked and throw paper out of register. The Metallic Tape Coupler outlasts other methods of securing the ends of tape, and keeps the tape running true. It can be put on in a few seconds by means of Parallel Pliers made for that purpose.

PRICE PER BOX OF FIFTY:

Gauge Pin Drawers (see page 835), each25

EXPLANATION OF NUMBERS.

No. 1 gauges are 12 Points high, with lip $\frac{1}{16}$ -inch long; No. 2, 15 Points high, $\frac{1}{16}$ -inch lip; No. 3, 18 Points high, $\frac{1}{16}$ -inch lip; No. 4, 12 Points high, short lip; No. 5, 15 Points high, $\frac{1}{8}$ -inch lip; No. 6, 12 Points high, $\frac{1}{4}$ -inch lip. All gauges with tongues are 12 Points high.

Extension Feed Guides.

The cuts show the method of securing the guides between platen and platen bail, so that sheets may be fed below the lower edge of a platen.

Golden Steel Gauge Pin.

Original Steel Gauge Pin.

Spring Tongue Gauge Pin.

This is the most satisfactory gauge pin made—it meets almost every requirement of the pressman.

Screw Adjusting Gauge Pin.

The prong should be inserted a quarter inch below the feeding line and forced snugly home. The base may be secured to the tympan with paste or glue if desired. The adjustment is got by means of the screw and nut with absolute precision and without weakening the hold of the pin to tympan.

Perfect Register Gauge Pin.

Pastes on like a quad, has a thin steel clip which strikes into tympan and prevents sheets from slipping under gauges, and is adjustable after pasting on.

Cylinder Side Guide.

Secured to feed-board by the sharp point shown in outline in cut, which is placed at the side of pillar, so that hair adjustments may be got by simply turning the pillar to the desired position. The bendable brass tongue is adjustable in every direction.

GAUGE PINS AND GAUGE PIN DRAWERS.

See page 834 for prices.

Flexible Side Gauge Pin.

May be placed directly under gripper finger without injury to gauge or displacing it. The sheet is fed to the curved spring arm. Made of fine thin steel, with teeth underneath to prevent sheet from getting under gauge.

Gauge Pin Drawer.

Screws on under the feed-board.

PRESS PUNCH.

This punch is about one thirty-second inch lower than type, and can be locked up in a type form, thus enabling printers to punch holes in stock at the same time it is printed, without extra expense. A piece of 2 Point brass rule should be cemented to the tympan sheet for the punch to strike on, and an opening left in the form opposite opening in base of punch to prevent it from becoming clogged. Made of best tool steel, tempered.

For $\frac{1}{8}$, $\frac{3}{16}$, or $\frac{1}{4}$ inch hole, each \$1.00

PRESS POINTS.

HALF SIZE.

FULL SIZE.

For inserting in wood furniture when sheets are printed for folding machine. Points are screwed into wood with wrench as far as the cross pin will allow, when they will be found to be correct height

Points, per dozen \$.75 | Wrench, each75

ROLLER SUPPORTERS.

The best bearers yet devised for job presses. They only take up a quarter of an inch of the inside space of a chase, ease the pressure of the rollers on the form, prevent over-inking, equalize the impression, and save the rollers from cutting, as they are $\frac{7}{8}$ -inch wide on top.

AMERICAN COUNTING MACHINE.

Has no superior for strength, accuracy, reliability. Can be set to zero, or any number, with the fingers with the greatest ease. The case may be screwed to the wall or on a table, and the lever can be set to any position. The figures are cast solid, nickel-plated, and are very legible.

Price \$10.00

DURANT COUNTER.

This counter gives perfect satisfaction. It is as reliable as it is strong, durable, and attractive.

No. 1, 4-dial, counts	10,000	\$ 8.00
No. 2, 5-dial, counts	100,000	10.00
No. 3, 6-dial, counts	1,000,000	12.00
No. 2, dial, with 4-inch gong, to give alarm at each 100		15.00

DOUBLE DIAL ALARM COUNTER.

This counter is so constructed that the lower dials show the number run like the usual counter. The upper dials are the alarm device, and can be set (instantly without taking from the case, by thumb-screw or key) to any desired number you wish to print, and when that number

is printed the bell will ring. To illustrate: Set the alarm on 600, if that is the number you wish to run, with lower dials on ciphers. First revolution of the machine the lower dials will show 1, and upper dials 599 or one less, and so on until 600 is run, when the upper dials will stand at (000) ciphers and the bell will ring. Any time you look at the counter it will show how many yet to run. Perfectly simple in construction. No more springs are used than in

an ordinary counter, and all are made of best piano wire. This counter has an iron case, and very legible figures.

No. 1. Double Dial Alarm, 5x8, 1/2-in. figures, registering 100,000 . \$15.00

ELM CITY BRONZING PAD.

This has become an article of necessity in the press-room; saves time and bronze, and insures clean work.

Large, $2\frac{1}{2} \times 6$ inches \$2.50
 Small, for light work, $2\frac{1}{2}$ inches square 1.50

BRONZING MITTEN.

A convenient appliance for bronzing. Made from sheep's wool, with strong cloth back, and is impervious to bronze.

Each \$.50

ADAMSON DISC COVER.

Makes Copying Inks Work Easy.

Cold iron and copying inks repel each other. To avoid trouble, slip an Adamson Disc Cover over your disc. It is made of special cloth, lined with rubber. Iron dries the ink, deadens it, wastes it. The cloth disc gives good distribution, becomes saturated with ink like a stamp pad, and saves 50 per cent. of ink. When job is done, lift off disc cover. Saves washing time, and all the ink in cover is available the next time you use it. In ordering, send the exact size of ink disc.

Send exact size of disc when ordering.

SUCCESS SAFETY BENZINE CAN.

Made of Brass.

This is a self-closing can. The flow of the fluid is regulated by pressure of the fingers upon the circular plate on the nozzle, and the valve operated by this pressure is so constructed that the flow can be regulated from one drop to a full stream.

The hands do not come in contact with the fluid. This can is of superior construction.

Quart can	\$.75
Gallon can	2.00

UNION SAFE BENZINE CAN.

This is patterned after the original benzine can, with the addition of a circular plate around the head, near the vent, by means of which the valve is opened without wetting the fingers. When pressure is removed it closes automatically. The head is attached to the can with a chain, so that it cannot be lost when unscrewed for the purpose of filling with benzine. Made of tin, enameled red.

Holds one quart, each \$.75

UNION STORAGE CAN.

For Holding Benzine or Oils.

It is strongly made of galvanized iron and is self-closing. There can be no evaporation, and no fluid can be spilled until the nozzle is opened by means of the spring. A very necessary article in all printing offices which are permitted to have one or more gallons of benzine on the premises.

Quite a saving in cost of benzine and oils will be realized by purchasing in the quantities held by these storage cans, besides avoiding the inconvenience of sending out at frequent intervals to get the ordinary benzine can filled up.

1-gallon can	\$2.00
3-gallon can	2.50
5-gallon can	3.00

EVERYTHING FOR THE PRINTER

FORM TRUCK.

Both the Form Trucks listed below are of malleable iron. The Union Form Truck is painted red.

The use of a form truck should be insisted on in every pressroom of any size, not only because it is a time saver, but because sliding chases along the floor is a source of frequent accidents.

Iron tire	\$3.00

MAHOGANY STEREOTYPE BLOCKS.

See page 841 for sizes and prices.

These Blocks are made of the best San Domingo mahogany, thoroughly seasoned, and are first-class in every detail. All blocks are made to order at short notice.

New Style Block, with Patent Side and End Hooks.

Important Points.—Do not order a set of blocks, nor make up a form of patent blocks for press, until you know the exact size of chase that must hold the blocks, and the thickness and position of its cross-bars. Ascertain also the exact size of paper for which the blocks are intended, and whether the leaves of paper, after printing, are to be cut or uncut, and to be sewed or stitched. In making up blocks, if paper is to be uncut and sewed, allow nothing for loss by waste on the fore edge; if it is to be side-stitched and trimmed, make suitable allowance for margin that will be concealed by wire stitching in binding.

Improved Plain Old Style Block, with Patent End Hook.

To get the price of blocks with head brass, but no end hook, take the price of the next largest size in Price-List on opposite page.

CAUTION—To Avoid Errors. In sending orders, give the size of each block outside, and also the size of largest and smallest plate to be worked, **measuring the back of the plate;** or add ¼ of an inch to the printing matter, as follows, viz.: if the matter is 3 x 5, the blocks should be 3½ x 5½ outside, the bevel on the plate being about ⅛. The hook and pinion will take ¾ with a little allowance for taking the plate free. All blocks are made ¾ inch thick, unless otherwise ordered.

IRON STEREOTYPE BLOCKS.

Made only in New Style, as per illustration on page 840.

CAUTION.—Before ordering iron blocks, read the directions for ordering and ascertaining dimensions of mahogany blocks on pages 840 and 841, which also apply to iron blocks. There are numerous chances for errors in ordering blocks. All blocks are made to order at customer's risk, as blocks are never carried in stock.

The dimensions of smallest and largest plates, and number of blocks required to a sheet, given on page 841 for mahogany blocks, also apply to iron blocks.

* Iron Blocks for platen presses have no end hooks.

STEREOTYPE SECTIONAL METAL BLOCKS

Consist of metal sections, made up of pieces 2×4, 2×8, 4×4, 4×8, and 8×8 ems Pica. Hooks

are inserted in the largest sections, which may be arranged on any part of the block, and can be adapted for bed and platen or cylinder presswork. With an assortment of the sections or furniture, the printer may, by a proper combination, prepare a set of blocks to take on a page of any size. To extend size of sectional block, in case there is a shortage of sections, metal

furniture not exceeding two ems Pica wide may be used.

are Made.

Every Ingredient used
in High-class Inks Made
in these Factories.

INKOLEUM.

A liquid preparation of world-wide fame for reducing and refining printing inks without impairing the color. It makes intractable inks work smoothly on discs, cylinders and rollers, and, mixed with caked inks, makes them useful again.

Per bottle, half-pound \$.50

CHESAPEAKE ECONOMY COMPOUND.

The Effective Ink Reducer for both Lithographic and Letterpress Inks

IT IS PURE.—Chesapeake Economy Compound is absolutely free from mineral petroleum products or acids of any kind, and is perfectly safe. Varnishes may be added, if required.

IT HELPS INKS.—Any kind or color of ink mixed with Chesapeake Economy Compound will not dry on forms or rollers, and will not skin when exposed to the air. Upon being mixed with ink, Economy Compound be-

comes thoroughly identified with it, and with less weight of ink a solid, sharp print is obtained. Inks mixed with Economy Compound will cover 30 per cent. more paper than if used without it.

IT PREVENTS TROUBLE.—Coated and surface papers will not pull if printed with ink mixed with Economy Compound, and the use of the Compound tends to prevent off-set and to make inks dry quicker on paper. It is not necessary, as a rule, to wash up rollers at night when inks are mixed with Economy Compound, as the inks will not dry on rollers. Economy Compound keeps lithographic stones in good condition, and inks mixed with it lift well from the stone.

1-pound cans	\$.75	25-pound kegs	\$13.75
5-pound cans	3.25	50-pound kegs	25.00
10-pound cans	6.00		

A FEW OPINIONS.

The Pioneer Press Co., St. Paul, Minn.: "Ship us 50 pounds Economy Compound, same as furnished heretofore."

Excelsior Printing Co., Chicago: "It gives the ink a gloss, and the ink does not off-set so much nor pull the surface off the paper. It is especially good for colored inks."

P. F. Pettibone & Co., Chicago: "We have been using Economy Compound in our press-room for some months, and find it a very fine article indeed."

EUREKA TYPE WASH.

The most effective powder preparation for removing ink from type rollers and plates. Does not injure brushes, corrode type, nor hurt the hands. Directions on every package. While its action is gentle, it is quite as effective for cleaning as the most powerful lye. One pound of powder will make eight gallons of washing fluid.

10-pound cans, each . . .	1.25
50-pound tubs, each . . .	5.00

HERCULES LIQUID OVERLAY.

A substitute for paper overlays, giving a finer, quicker make-ready, and saving lots of time and tedious work. It is put on thinly with a camel's-hair brush, and the first application should be allowed to dry before putting on another, if the first is not heavy enough. It dries very quickly. If the Liquid Overlay is put on too thickly, the overlay is reduced by scraping it with fine emery cloth.

4-ounce bottle, net \$1.25 | 8-ounce bottle, net \$2.00
Full directions with each bottle.

BURBANK'S EMBOSSING COMPOSITION.

This is an approved and satisfactory liquid chemical preparation for making counter dies for embossing, which, after exposure for a few minutes to light and air, hardens into a stone-like substance, making a perfect counterpart.

It is easily applied, according to directions printed on every can, and greatly simplifies and cheapens the process of embossing.

"BENTROVATO."

[TRADE MARK.]

Dispels Electricity from Paper on Printing Presses.

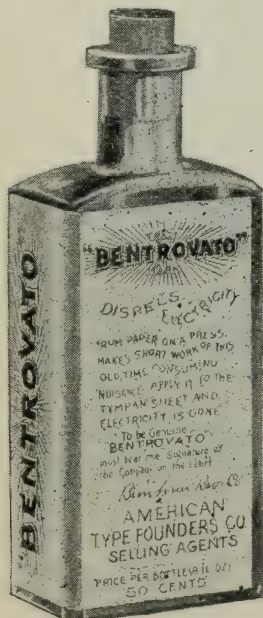

A chemical fluid preparation which, applied in a small quantity to the tympan sheet by means of a sponge, cloth or cotton waste, effectually dispels the electricity generated in cylinder presses—a difficulty which results in serious losses to printers.

In all offices where there is a tendency toward this trouble, a bottle of "Bentrovato" will prove as valuable as the proverbial "stitch in time."

"Bentrovato" is used in a majority of the larger printing offices throughout the United States.

American Type Founders' Co.: Please send me at once by American Express one bottle of "Bentrovato." I should not like to be without it, even if it cost \$10 per bottle. Our devil knocked over the first bottle you sent us. I bought it with no faith, simply because I was willing to try anything. Our paper was as if possessed by ten thousand devils. The trouble ended at once and completely with the use of the "Bentrovato."—WALTER B. SHEPPARD, publisher of the *Pan Yan Democrat* (founded in 1818).

Per bottle, net \$.50

INK AND ROLLER CABINETS.

A very necessary article of printing office furniture. The use of it will result in a saving of ink and rollers, which will speedily pay for the cost of cabinet.

WETTER NUMBERING MACHINE.

Actual size Style J.

Adapted to the requirements of every printer. Permits printing and numbering at one impression. Can be used on any make of press. Numbers automatically from the unit to its full numerical capacity. It can be used with or *without* the character "No." Other characters can be used to either precede or follow the figures. Produces figures as clean, smooth and distinct as a copper-plate. The following figures can be supplied in machines of five, six and seven wheels.

J 1234567890 **K** 1234567890

The 5-wheel style **J** machine occupies a surface space of $\frac{7}{8}$ inches in width by $1\frac{1}{4}$ inches in length.

J or K , five wheels, numbering up to	99,999	\$25.00
J or K , six wheels, numbering up to	999,999	28.00
J or K , seven wheels, numbering up to	9,999,999	31.00

Unless otherwise ordered, 5-wheel style **J** machine will be sent.

PRINTERS' TRUCKS.

Lay Printed Sheets on Trucks and not on the Floor, and thus Save Cost and Loss in Handling.

With platform 34 inches wide by 50 inches long, 11 $\frac{3}{4}$ inches high \$16.00

Special prices in quantities. Other sizes at proportionate rates.

Made of hard wood 1 $\frac{3}{4}$ inches thick, bolted, varnished. Center wheels, 9 $\frac{3}{4}$ inches diameter, 3 inches face. Caster wheels, 4 $\frac{3}{4}$ inches diameter, 1 $\frac{1}{4}$ inches face. Steel axle, 1 $\frac{1}{4}$ inches square, with steel braces 1 $\frac{1}{4}$ x $\frac{1}{4}$ inches. The T-shaped handle is of $\frac{7}{8}$ -inch round steel, and is quickly attached to or detached from two eyelets fixed at each end. Weight, 182 pounds; handle weighs 11 $\frac{1}{2}$ pounds.

In 1896 we sold 120 of these trucks on one order to Matthews-Northrup Co., Buffalo, for use in their printing department.

NEW YORK DRYING RACKS.

No. 1, 20 shelves,	each 24×36 in. .	\$14.00
No. 2, 30 shelves,	each 24×36 in. .	20.00
No. 3, 20 shelves,	each 28×42 in. .	20.00
No. 4, 30 shelves,	each 28×42 in. .	28.00

The No. 1 rack (the cheapest) gives a drying area of one hundred and twenty square feet, while actually using only six square feet of your costly floor space.

No. 1. New York Drying Rack.

CHICAGO DRYING RACKS.

No.	Feet.	
5, 12 shelves, each 2 × 2		\$14.00
6, 10 shelves, each 2 × 3		18.00
7, 10 shelves, each 2½ × 4		23.00

This rack is the most substantial movable drying rack made. Although it has fewer shelves than a New York, the extra space between the shelves is a distinct advantage, as on small jobs the sheets can be handled without moving the shelf on which they are placed. When not in use the shelves may be put out of the way as illustrated in cut.

The frames of both these racks are of hard wood, bolted together, and mounted on strong casters, so that they can be easily moved when loaded. The shelves of the Chicago Rack are framed all around with hard wood, while those of the New York Rack are framed on ends only.

No. 6. Chicago Drying Rack.

KÖRNER'S PATENT INTERLOCKING DRYING RACKS.

(United States Patent, No. 392,735; Canadian Patent, No. 28,739.)

These racks are for offices which work on long runs, for color work, for lithographers. They are used on *Puck* and *Truth*, and the American Lithographic Company has over 25,000 of them in its various establishments in New York City alone.

With these racks sheets are taken direct from the fly of the press, and may be stacked ceiling-high in a perfectly straight and rigid pile, which cannot be knocked over by accident, and with no more weight on the

bottom than on the top sheets. This pile is a most effective drying room, occupying only the floor space of one rack, and from the time the sheets are fed into the machine until ready for shipment they need not be handled. The interlocking device, which makes the pile straight and rigid, is shown in figure 2; each rack is firmly locked on its neighbor, but each slides with ease on the rack immediately below it. They save handling, all the time of that operation, and the consequent waste of paper through off-set, smearing, finger marks and tearing. In many cases these racks save expensive slip-sheeting. They circumvent electricity by receiving the sheet direct from the

fly. They insure evenness of temperature, and thereby assist in getting a perfect register on lithographic work. They save seventy-five per cent. of floor space over any other method of drying sheets, and from one to two per cent. of paper, and a vast amount of time. A further saving of time may be effected by placing the racks as they come from the fly-board on a printer's truck, made specially to take these racks (see page 841). A pile of racks can be moved quicker, safer and easier on the truck than a single armful can be moved by hand. The racks have hard wood sides with wide soft wood slats, and are very strongly put together.

NET PRICES.—Special Quotations made on Carload Lots.

These racks are made to order, and sizes will be varied to suit purchasers, at prices approximate to those quoted here.

CHANDLER & PRICE GORDON PRESS.

A most popular press, and over 8000 are in use. They are built to withstand both use and abuse. Side arms and shaft are made of forged steel, without seam or weld. Cam rollers are made of hardened tool steel. Impression throw-off is positive and easy to operate. The grippers are depressible, and cannot get under the rollers. Chase clamp is safe and instantaneous.

11×17 inches,	350.00
13×19 inches,	400.00
Ink fountains, for all sizes,	25.00
Steam fixtures, for all sizes,	15.00

One roller mould, six roller stocks, three chases, one impression wrench, one gripper wrench, and one hand-roller are included with each press.

PEERLESS PRESS.

Of well-established reputation, smooth running, noiseless, easy to make-ready on, easy to feed, easy to run by treadle, with an effective throw-off, well built, exceptionally strong, and with a powerful toggle movement. The throw-off is positive and easy, and convenient to handle. The platen is sustained in the centre by the toggle, and is strongest where platens are generally weakest, enabling the Peerless to do embossing and paper-box cutting and creasing, which taxes a press very severely. It is a fast press.

Three chases, six roller stocks, one roller mould, one impression wrench, one brayer, two sets roller trucks, are furnished with each press.

Extra chases cost: For 8×12 press, \$1.50; for 9×13, \$1.50; for 10×15, \$2.00; for 11×17, \$2.00; for 14×20, \$2.75; for 14½×22, \$3.00.

HARRIS AUTOMATIC ENVELOPE AND CARD PRESS.

Fastest Job Press.
Speed from 5000 to
12,000 per Hour.

The Harris Automatic is a self-feeding and self-delivering press of recent introduction but well-established reputation.

It prints cards and envelopes in one or more colors in first-class style, and will supersede all other presses on work within its capacity in offices where envelopes, cards, or tags, are printed in large quantities in runs of 3000 at a time and upward. It registers closely. It has an automatic throw-off, which causes it to cease taking impressions whenever the grip-

pers fail to grasp the sheet, thus effectively preventing waste of stock as well as offsets.

The printing is done from curved stereo. or electro. plates. Making ready is convenient and easy. It is possible to make-ready and run off 5000 envelopes in forty minutes. Distribution is abundant and effective. There is an adjustable ink fountain.

The capacity is from the smallest envelope corner to plates not exceeding 11 x 13 inches.

Prices, terms, circulars, etc., sent on application.

Selected from Letters Received from Users.

Public Printer, Washington, D. C.: "The Government Printing Office met an extraordinary demand during the last Presidential campaign, to the extent of printing 60,000,000 (sixty million) envelopes, which would not have been met, for lack of press facilities, had we not fortunately discovered the Harris Automatic Press, which reduced the cost of envelope printing from 35 cents to 11 cents per thousand. We use another Harris press in our job room, and find it convenient for *small runs*, which work we did not anticipate doing on it at time of purchase."

Merry & Nicholson Printing Co., St. Louis, Mo.: "We have produced work from engravings at the rate of from 8000 to 10,000 an hour, equal in quality to the finest press work we can turn out on job presses running at from 800 to 1500 per hour. One of the most noticeable features of the press is the saving of ink, owing to its superior distribution. We made a run of 42,000 envelopes on which we used an engraving $1\frac{1}{2} \times 2\frac{1}{2}$ inches, copied from a lithograph, and on starting we put a quarter pound of bronze blue ink in the fountain. When the run was finished there still remained almost half the ink in the fountain, and we used all the color the job required to make a first-class job."

The Brooks Company, Cleveland, O.: "We consider the Harris Automatic Press to be in every way a profitable investment. We have been using one since November, 1895, and it is all and more than you claimed for it. . . . Any intelligent feed-girl can run it, after form is made ready. We have printed 20,000 stamped envelopes at a speed of 7500 impressions or more per hour, spoiling but one envelope, and that because it was imperfectly made. We have printed over 800,000 candidate cards in lots of 5000 to 25,000 of a kind at one time."

The A. H. Pugh Printing Company, Cincinnati, O.: "It is very easy to make-ready, and the work we have been able to get out of it is simply astonishing."

Albert Datz, Jersey City, N. J.: "It is a big money-saver, doing the work previously done by four ordinary presses."

James Kempster Printing Co., N. Y.: "Capable of running over 50,000 impressions a day with little or no spoilage."

General Selling Agents, AMERICAN TYPE FOUNDERS COMPANY.

GALLY UNIVERSAL PRESS.

Excels all other types of platen presses because: (1) The bed and frame are cast in one piece, securing rigidity and keeping all shafts in line in spite of irregularities in floor or foundation. (2) The platen moves up squarely against the type form, giving a perfectly square impression. (3) The platen has nine supports, and is extra heavy, and is the only platen capable of sustaining the powerful impression necessary to secure the best results on large forms of cuts. (4) The impression can be thrown off instantly, the throw-off being controlled by a bar directly behind the platen. (5) The impression can be changed instantly all over the platen, varying from the imperceptible to an eighth of an inch. (6) The platen opens out widely, making it easy to feed paper into it. (7) The ink fountain is as efficient as the fountains on the highest grade cylinder presses. It is the most perfect fountain for a platen press ever made. (8) The operations of ink distribution and "inking" the form are distinct, and each performed by a separate set of rollers. In addition to the fountain ductor roller, there are four ink distributors (two of composition, two of iron) which supply two inking cylinders from which the three form rollers receive a fresh, distributed supply of ink at each impression. On all other types of presses the form rollers have to distribute the crude ink as it leaves the fountain. (9) The form rollers can be held against the inking cylinders for distribution, while getting up color, and need not touch the type form. (10) The ink fountain can be divided by partitions for printing two or more colors at one time. (11) The weight and strength are greater than in any other platen press, as it is designed to do work that cannot be safely attempted on any other type of press.

EVERYTHING FOR THE PRINTER

The Gally Universal is designed for use by the best class of printers. In the hands of competent pressmen the press is the most durable, and will do first-class work in perfect register longer than any other press. We can refer purchasers to presses which have been in constant use for twenty years, doing perfect work to-day, and bidding fair to give the best results for years to come.

The recent application of continuous-motion impression cranks and a new patented platen control have increased the speed on all sizes. Speed requirements vary with the kind of work. These presses will run smoothly at the following maximum speeds: 10×15-inch size, 2600 per hour; 13×19 inch, 1800 per hour; 14×22 inch, 1700 per hour.

The Gally Universal Press is made in three styles, which are described hereunder.

List prices of presses for letter-press printing, complete, with ink fountain, power fixtures, combination belt-shifter and brake, f.o.b. factory:

	Style One.	Style Two.	Style Three.
Quarto Medium, 10×15 inches inside chase .	\$350.00		\$450.00
Half Medium, 13×19 inches inside chase .	450.00	\$500.00	600.00
Half Super-Royal, 14×22 inches inside chase .	515.00	575.00	650.00

The following small parts are included with each press: Three chases, one roller mould (for which two chases will be substituted, if preferred), six form roller stocks, four distributor roller stocks, two ductor roller stocks, twelve roller wheels (six large, six small), two iron lateral distributors, two feed tables, one small and one large wrench, one socket wrench, one chase latch wrench, and treadle fixtures.

If treadle fixtures are not required, two chases will be sent in lieu of them.

Power fixtures include fixtures on the press only.

* See page 858 for price list of extras.

Boxing for export: Quarto Medium, \$7.00; Half Medium, \$10.00; Half Super-Royal, \$15.00, net.

DESCRIPTION OF THE THREE STYLES.

Style One.—This is the style described above.

Style Two.—Differs from Style One in having a double impression latch and a steel segment in the gear at the point that takes the strain of the impression.

Style Three.—This style is recommended to those who want the best press procurable for executing the finest class of cut, solid block and color printing, cold embossing and stamping. This style is also made in combinations and for special work, as described hereafter.

The style No. 3 Universal Press differs from Style No. 1 in the following particulars:

The driving shaft is extended to carry an extra outside floor support. The pulleys are intended to carry a 2½-inch belt on Quarto Medium and a 3¼-inch belt on larger sizes. The fly-wheel on Quarto Medium weighs two hundred pounds, and on the Half Medium and Half Super-Royal three hundred pounds each. The large gear-wheel has a section of best quality of steel welded into its periphery, in which are formed the impression teeth, *i. e.*, those teeth which are in engagement with the driving pinion and transmit the momentum of the fly-wheel to the cranks during the time of the "nip." The main shaft is of steel, with solid reamed bearing through the bed. The crank-pins are crucible steel, hardened and finely finished. The connecting rods are of forged machinery steel, very heavy, and bushed with phosphor-bronze where bearing on crank-pins. The bridge and platen are solid to each other—no pressure whatever being sustained by screws. Has double impression latch.

DESCRIPTION AND PRICES OF COMBINATIONS OF STYLE THREE FOR SPECIAL WORK.

COMBINATION B.—For letter-press printing and (in addition to all work that can be done on regular Style Three press, listed above) book-cover inlaying, and cutting and creasing. This combination is fitted with a movable ⅛-inch steel platen plate and a movable ⅛-inch brass platen plate, the latter for use in cutting and creasing.

Quarto Medium, 10×15 inches inside chase, complete	\$450.00
Half Medium, 13×19 inches inside chase, complete	626.00
Half Super-Royal, 14×22 inches inside chase, complete	676.00

Description and prices of other combinations on following pages (858, 859, 860).

GALLY UNIVERSAL PRESS—Continued.

Descriptions and Prices of Special Combinations of Style Three.

COMBINATION C.—For letter-press printing, hot embossing and printing on wood not exceeding one inch in thickness (in addition to all work that can be done on Combination B). This combination is fitted with a steam blank ($\frac{7}{8}$ -inch thick) with pipe connections, a movable $\frac{1}{8}$ -inch steel die plate on steam blank, a movable $\frac{1}{8}$ -inch steel platen plate, a movable $\frac{1}{8}$ -inch brass platen plate, a cast-iron platen blank, $\frac{1}{8}$ -inch thick, with tympan clamps attached, and a cast-iron platen plate $\frac{1}{2}$ -inch thick.

In ordering Combination C, it is necessary to state the average thickness of embossing dies. It is recommended that dies should not be more than $\frac{1}{4}$ -inch thick.

- * Half Medium, 13 × 19 inches inside chase, complete \$722.00
- * Half Super-Royal, 14 × 22 inches inside chase, complete 784.00

COMBINATION D.—For letter-press printing, printing on wood (not exceeding one inch in thickness) and cold embossing. This combination is fitted with a $\frac{7}{8}$ -inch movable platen blank and a $\frac{1}{8}$ -inch movable steel platen plate. Cutting and creasing can be done on this combination by adding a $\frac{1}{8}$ -inch brass platen plate, list prices \$10.00 to \$13.00 each.

- * Quarto Medium, 10 × 15 inches inside chase, complete \$474.00
- * Half Medium, 13 × 19 inches inside chase, complete 629.00
- * Half Super-Royal, 14 × 22 inches inside chase, complete 679.00

*IMPORTANT NOTICE.

The specifications given for preceding combinations may be varied to accommodate the requirements of purchasers. In ordering variations from above specifications be careful to state exact thickness of plates and blanks required, and fully describe the work to be done on the press ordered. Special combinations for other purposes made to order at prices proportionate to those charged for above combinations.

Price List of Attachments for Gally Universal Press.

	10 × 15 Press.	13 × 19 Press.	14 × 22 Press.
Ink fountain	\$20.00	\$25.00	\$25.00
Fountain partitions, each	4.00	4.00	4.00
Power fixtures on press only	10.00	10.00	10.00
Overhead fixtures, complete	25.00	30.00	30.00
Cast-iron chases	2.00	2.25	2.75
Wrought-iron chases	5.50	6.50	7.25
Roller stocks60	.65	.75

Gally Universal System of Ink Distribution.

The superiority of the Gally Universal system of ink distribution over disc distribution is demonstrated by this sectional diagram. *C* is the main distributing cylinder, and *S* is the secondary distributing cylinder. The composition distributors *e* and *e'* are revolving between the cylinders and two iron distributors *v* and *v'*, both of which have a lateral motion. *H* is a composition ductor roller, supplying ink from the fountain *F* to the distributing cylinder. All these are revolving constantly both when the form rollers 1, 2, 3 are on and off the form. Distribution never ceases. On disc presses, distribution is done by the form rollers and intermittently. For work requiring little ink the number of distributors in use may be reduced.

End view of Gally Universal Ink Fountain.

End view of system of distribution.

Gally Universal Ink Fountain.

R is the fountain cylinder, moved by a ratchet lever and regulated at will. *A* is a steel blade, *e* is rubber packing, and *a* is a very thin strip of steel against which the screws (*T*) are set. The rubber (*e*) furnishes an elasticity which prevents the blade from binding, while giving a perfect cut-off. There is a tendency to bind in all fountains in which the regulating screws press directly against the knife.

GALLY UNIVERSAL EMBOSSEING PRESS.

These are the largest embossing presses made, and combine strength, power, speed and facility for handling work easily in a degree unequaled by any other press. They are designed for extra heavy hot or cold process embossing, and book-cover stamping ("smashing"). Full particulars with detail of construction are given in a special catalogue, the cover of which is an exquisite example of the embossing art as well as a severe test of the capacity of the press.

Prices of Press Only.

No. 1.	21 $\frac{1}{4}$ × 22-inch bed-plate	\$800.00
No. 2.	24 × 26-inch bed-plate	900.00

Prices of Extra Attachments.

Steam blank, complete, with pipe connections, for No. 1 embosser, with steel die plate	\$105.00
Steam blank, complete, with pipe connections, for No. 2 embosser, with steel die plate	118.00
Steel platen plate for No. 1 embosser	19.50
Steel platen plate for No. 2 embosser	26.00
Cast-iron platen blank for No. 1 embosser	19.50
Cast-iron platen blank for No. 2 embosser	26.00

Each press is complete with power fixtures on press.
 Each press is furnished with three chases (or one cast-iron bed blank in lieu of chases, at option of purchaser), two feed tables, one wrench, one belt-shifter, and one brake.
 Gross weights, boxed, of embossing presses are: No. 1, 3400 pounds; No. 2, 4300 pounds.
 Boxing for export: No. 1, \$10.00; No. 2, \$15.00, net.
 Prices are f. o. b. factory.

GALLY UNIVERSAL PAPER BOX CUTTING AND CREASING PRESS.

See "Paper Box Making" at foot of this page.

The most satisfactory presses for cutting and creasing paper boxes. Immensely strong, easy to operate, with speed limited only by capacity of feeder. They will not stall on the heaviest impression. They are built on the same general lines as the Gally Universal Embossing Presses, and have extra steel-gibbed locks on under edge of the platen to prevent deflection of the platen under unequal strain. The platen, which has a throw-off, is set to height of type unless otherwise ordered. Both sizes are double geared.

Prices, with Brass Platen Plate and Power Fixtures on Press.

No. 1.	20 × 30 inches inside chase	\$700.00
No. 2.	23¼ × 31 inches inside chase	900.00

Prices are f. o. b. factory.

Each press is furnished with a ⅛-inch brass platen plate, three chases, two feed tables, one wrench, one belt-shifter and one brake.

Boxing for export: No. 1, \$15.00; No. 2, \$20.00, net.

FOLDING PAPER BOX MAKING.

The process of making folding paper boxes is simple. The stock used is manilla board, made specially for the purpose. A cutting and creasing press is the same as an ordinary printing press, except that it is larger, has to be stronger, and does not require an inking apparatus. The shape of a box having been decided on, a form is set up with steel cutting and brass creasing rules—the former to cut out waste margins and to make slits, and the latter to crease or score the lines on which the stock in the box must bend when set up for use. It is usual to cut and crease as many boxes at one time as can be cut out from a full-sized sheet. The box leaves the press flat; it is then folded once and glued on one edge, and delivered flat. Any printing required is done before cutting and creasing. Any good compositor will understand the process after reading above explanation and examining a folded paper box. The gluing is done by a machine of moderate cost.

THE GOLDING JOBBER.

This press can be bought with or without a number of attachments, such as an automatic brayer fountain, a duplex distributor (which is placed below the bed of the press and furnishes a fresh supply of ink to the form rollers after they have passed downward over the form), a chromatic attachment, and a counter for registering the number of actual impressions, the prices for which are given separately below.

Price of Press Only.

Inside of Chase.

No. 6, 8×12 in.	\$200.00
No. 7, 10×15 in.	275.00
No. 8, 12×18 in.	350.00
No. 9, 15×21 in.	450.00

Prices of Complete Press

With automatic brayer fountain, duplex distributor and power fixtures.

Inside of Chase.

No. 6, 8×12 in.	\$245.00
No. 7, 10×15 in.	335.00
No. 8, 12×18 in.	420.00
No. 9, 15×21 in.	520.00

Shows style of Nos. 6, 7 and 8 Golding Jobbers.

The prices of all Golding Jobbers for letter-press printing include three machine rollers complete, extra set of roller cores, extra set of roller wheels, two chases, ink plate, hand roller, wrench, treadle and brake.

Prices of Attachments and Extras.

When not ordered complete, any of the attachments or extras wanted will be charged at the following prices:

	No. 6.	No. 7.	No. 8.	No. 9.
Fountain and automatic brayer	\$25.00	\$35.00	\$40.00	\$50.00
Duplex distributor	12.00	16.00	20.00	24.00
Chases	1.25	1.50	1.75	2.25
Counter made to attach to press (counts to 10,000)	10.00	10.00	10.00	10.00
Pearl ink fountain	9.00	9.00	9.00	9.00
Power fixtures	12.00	14.00	14.00	15.00
Boxing	4.00	5.00	6.00	8.00

GOLDING ART JOBBER.

This press is built on the same general lines as the Nos. 6, 7 and 8, illustrated above, but is heavier and stronger; has gear-wheel inside the frame; has impression adjustment at back of bed instead of at back of platen; has four form rollers and a duplex distributor (the latter placed immediately under bed, so that ink on rollers is re-distributed before the rollers return over the type form); throw-off by means of an eccentric shaft instead of by wedges; and the automatic brayer fountain covers the full length of the disc instead of half of it. This press is also supplied with the half-length automatic brayer fountain, if desired.

No. 18 Golding Art Jobber, 12×18 ins., complete with power fixtures \$500
 No. 18 Golding Art Jobber, 12×18 ins., with half-length automatic brayer fountain, and power fixtures 470

CHROMATIC ATTACHMENT for No. 7 Jobber, including full-length fountain, \$65.00 additional to price of complete press; for No. 18 Art Jobber, having full-length fountain, \$50.00 extra.

PEARL PRESS.

Light running presses, without side-arms, very rapid, easy to feed, and handy to make-ready on. They are practically noiseless, easy to keep in repair, and specially desirable in offices that have no power. The No. 1 has three drawers and the No. 3 two drawers in their stands.

Nos. 1, 3 and 5 have no throw-off.

No. 1, 5×8 in.
inside chase . \$70.00

No. 3, 7×11 in.
inside chase . 110.00

No. 5, 9×14 in.
inside chase . 165.00

Pearl Presses, Nos. 1, 3 and 5.

Pearl Presses, Nos. 11 and 14.

No. 11, 7×11 inches
inside chase . \$135.00

No. 14, 9×14 inches
inside chase . 200.00

The prices of Nos. 11 and 14 include full-length fountain and throw-off.

Steam Fixtures.

For No. 1 \$8.00
For No. 3 9.00
For Nos. 5 and 11 . . . 12.00
For No. 14 14.00

Pearl Ink Fountains.

Nos. 1, 3 and 5, each . \$9.00

THE ADAMS HAND CYLINDER PRESS.

A substitute for the Washington Press. All "pulling" of the lever is dispensed with. It is simply a question of rolling the bed under the cylinder and back again, and the sheet is printed. From one-third to one-half more sheets can be printed in the same time that can be done on the Washington, and with little expenditure of strength.

Each press complete with felt blanket, inking apparatus, roller frame, one cast roller, and one extra roller core.

6-Column Folio—bed, 24×35 inches; weight, 975 lbs.	\$225.00
7-Column Folio—bed, 27¼×40½ inches; weight, 1100 lbs. . .	240.00
8-Column Folio or 5-Column Quarto—bed, 28¾×43 inches; weight, 1280 lbs.	260.00

Speed, 300 to 400 per hour.

PILOT HAND LEVER PRESS.

Pilot Press

6½×10 inches in- side chase	\$35.00
Ink Fountain	10.00

One chase, one set of covered rollers, and one wrench supplied with each press.

OFFICIAL HAND LEVER PRESSES.

No. 3, 5 × 7½ in.	\$25.00
No. 4, 6 × 9 in.	35.00
No. 6, 8¼ × 12½ in.	60.00

One chase, one set of covered rollers, and one wrench supplied with each press.

WASHINGTON HAND PRESS.

Platen.	Bed.	Price.
14 × 18 inches . . .	17 × 21 inches	\$150.00
16 × 21 inches . . .	20 × 25 inches	175.00
20 × 25 inches . . .	24 × 29 inches	200.00
23 × 31 inches . . .	25 $\frac{3}{4}$ × 34 $\frac{3}{4}$ inches, for 6-col. folio	200.00
23 × 35 inches . . .	26 $\frac{1}{2}$ × 39 inches, for 7 col. folio	225.00
25 × 39 inches . . .	28 $\frac{1}{2}$ × 42 inches, for 8-col. folio or 5-col. quarto	250.00
27 × 43 inches . . .	31 $\frac{1}{2}$ × 47 $\frac{1}{2}$ inches, for 9-col. folio	275.00

With Patent Rolling Bed.

The Patent Rolling Bed runs on rollers instead of sliding, and thus much exertion is spared the pressman, and the work is done quicker.

Platen.	Bed.	Price.
23 × 35 inches . . .	26 $\frac{1}{2}$ × 39 $\frac{1}{2}$ inches, for 7-col. folio	\$250.00
25 × 39 inches . . .	28 $\frac{1}{2}$ × 43 $\frac{1}{2}$ inches, for 8 col. folio or 5-col. quarto	275.00
27 × 43 inches . . .	31 $\frac{1}{2}$ × 47 $\frac{1}{2}$ inches, for 9-col. folio	300.00
29 × 43 inches . . .	33 × 48 inches, for 6-col. quarto	325.00

Above prices include two pairs of points, one wrench, one sheepfoot, pair of bearers, and one extra frisket.

As a rule, we can supply second-hand Washington Hand Presses of all sizes on demand.

IMPROVED COUNTRY PROUTY.

Square sides, patent 'square drop-bed and throw-off. Self-inking. The cylinder rolls over the type form after taking the sheet from the feed-board. The rollers follow the cylinder over the type form.

	Size, inside bearers, in.	Weight, pounds.	Price.
No. 1, 7-column folio	27 × 37	3600	\$600.00
No. 2, 8-column folio	27½ × 43½	4000	700.00
No. 3, 6-column quarto	32½ × 46½	4600	800.00

The above prices include well fountain, rubber blanket, set of cast rollers, set of extra cores, and patent throw-off and impression lock. All boxed and on board cars. Steam fixtures, \$15.00 extra.

ARMY PRESS.

This is the lowest priced press on which a newspaper of small circulation can be printed. The cylinder is stationary, but adjustable for impression by regulating screws at each end. The bed and form pass under the cylinder, and an impression is taken at each forward and backward movement.

To print one page, 6-column folio, 14 × 20 inches	\$ 60.00
To print one page, 7-column folio, 16⅝ × 22¾ inches	85.00
To print one page, 8-column folio, 19¼ × 25½ inches	120.00
To print two pages, 5-column folio, 19½ × 26 inches	125.00

Two chases, six patent quoins, roller frame and cast roller, oiler and wrench, go with each press.

IDEAL HAND CYLINDER PRESS.

The type form on this press is stationary. The cylinder is moved over the tympan by link belts running over sprocket wheels at each end of the press, and it prints a sheet at each forward or backward movement. The cylinder is made of steel, and is held firmly to the tracks

by truck-wheels which run in a groove on the under side of the tracks. The boxes which hold the cylinder at each end, and in which it revolves, are connected by a stretcher rod running above the cylinder, which prevents side friction. The impression is regulated by four screws—two on each side—which raise or depress the bearers on which the cylinder runs. An effective inking apparatus is supplied, but is extra. A number of Ideal Presses are in use, and intending purchasers may gather how satisfactory they are to the users by reading the following extracts from a great many commendatory letters received:

"My wife ran off 300 an hour on it the first day it was put up." * * * "With it our inexperienced pressman has made the following speed: 750 impressions in 75 minutes; 475 in one hour; 100 in 11 minutes. We run a regular lick of 100 every 15 minutes, or 400 per hour." * * * "We can run an edition in one-half the time and secure a better print than on our Washington." * * * "The presswork done by the 8-column Ideal is good. . . . The press is so simple that the veriest novice can set it up, and so light running that a boy may operate it with ease." * * * "It is far superior to my old Washington for speed and quality of work."

No. 1. 8-col. folio or 5-col. quarto, size of bed, $28\frac{1}{2} \times 43$ inches . \$200.00

No. 2. 9-col. folio or 6-col. quarto, size of bed, $33\frac{1}{8} \times 48\frac{1}{4}$ inches . 225.00

No. 1. Floor space, 31×55 Weight, 700 lbs. Shipping weight, 975 lbs.

No. 2. Floor space, 35×60 Weight, 800 lbs. Shipping weight, 1100 lbs.

Frisket for No. 1 extra, \$6.00; for No. 2, \$6.50.

IDEAL INKING APPARATUS.

Attaches to the side of press; has a drop-table, which allows the roller to pass from distributor to the form without lifting, and without touching furniture or chase; has automatic vibrator.

No. 1. For 8-column folio or 5-column quarto \$30.00

No. 2. For 9-column folio or 6-column quarto 32.00

CAMPBELL COUNTRY HAND CYLINDER PRESS.

- No. 2. Bed, 33×48 inches. Form, 28×44 inches. Standard size for 9-column folio and 6-column quarto \$800.00
 No. 3. Bed, 30×43 inches, Form, 25×39 inches. Standard size for 8-column folio and 5-column quarto 700.00

A rubber blanket, one set composition rollers, extra set stocks, tapes, wrenches, boxing and shipping, are furnished with these presses.

Tight and loose pulleys and belt shifter for power, \$15.00 extra.

The Campbell Country Hand Cylinder forms a class by itself, and occupies, without a satisfactory rival, the entire field between the Washington hand press and the power cylinder. Thousands are in use, and it has proved a stepping-stone to fortune for a great number of publishers during the past thirty years. It is constructed on the same successful mechanical principles as are used in building the more expensive power cylinder presses, and power fixtures may be added at a small cost. The wear of type on this press is much less than on that class of presses which are constructed on the crude principles of a proof press.

Testimonials Selected from Hundreds Equally Favorable.

J. H. Wilcox, Portsmouth, Va.: "You are mistaken as to my having purchased a Campbell Hand Cylinder Country Press in 1890. I bought one in 1886, and I take great pleasure in saying that it has proved in every way most satisfactory. One small man can turn it continually for hours with ease. It does not get out of order except through negligence, and it is very simple in its operation. This press, I believe, is about sixteen years old, if not older, and it will probably last another sixteen years, if not longer."

Theo. P. Wilson, Winchester, Mass.: "The Campbell Hand Cylinder Country Press purchased from you in August, 1889, has given the utmost satisfaction during its over two years of constant service. I have not spent a cent for repairs, and consider it as good as when first set up. The press is now run by water-power, and can print 900 papers per hour. The *Star* I consider one of the cleanest printed papers in this section."

Paragraph Publishing Co., Mamaroneck, N. Y.: "We take great pleasure in saying that the Campbell Hand Cylinder Press purchased of you in September, 1890, has proved in every respect a first-class machine. Although intended to be run by hand, we have been running our press by power for the last three months at an average speed of 840 to 900 per hour. As the press has no springs, we consider this a performance with which we are pleased, and of which you have reason to be proud."

T. H. Harter, Middleburgh, Pa.: "I have been using a Campbell Press for four years, and take pleasure in recommending it to the trade. For simplicity, durability and ease on type it cannot be excelled. My issue of 1600 (6-column quarto) is turned off in two-and-a-half-hours, including all stops, and the press hasn't been out of order since I had it, with the exception of the fly-spring breaking. I would not trade it with any press on the market for a country office."

Irwin H. Bardman, Schueneville, Pa.: "The Campbell Hand Cylinder Country Press I purchased June 4, 1888, has been in use ever since, and has not cost a penny for repairs, and is always ready for work, and is one of my best friends in the office. I do not believe that the press can be excelled for simplicity, durability and convenience. It runs very easy by hand, but I drive it with a gasoline engine."

COTTRELL TRIUMPH COUNTRY PRESS

With Patent
Air Springs.

Adapted for printing newspapers, pamphlets, posters, circulars, and all classes of commercial printing. Conforms in construction, design, durability and finish to the high reputation of the manufacturers.

The press is supplied with patent air springs, the resistance of which is increased or decreased according to the speed of the press. It is well-known that the faster the speed the greater strength of spring is required. The patent air spring covers these requirements. If the press is running at five hundred per hour, the spring can be easily regulated for that speed; and if running at fifteen hundred per hour, the proportionate increase of spring can be obtained, and so up to the highest speed of which this press is capable. The air spring is provided with an automatic throw-off that releases the pressure when the press is stopped, and the pressman can move the bed to and fro without compressing the spring. When the press is started, the spring is applied automatically.

The patent hinged roller-frame permits of the rollers being instantly uncovered for removal or other purposes without unscrewing the sockets. The rollers can be taken out and put back without changing their set. The well-fountain is used, being easily regulated and cleansed, and it is set high, giving easy access to the form. The distribution is ample—two three-inch rollers, covering the full form. The bed has four supports while under impression, thus securing a clear, even impression. The shoes, tracks and rollers are of hard steel. The gearing is accurately cut, which, together with the registering rack and segment, insures perfect register.

The Triumph Press is built with table, rack and cam distribution, or with the rack and cam distribution, as per illustration on this page.

The Triumph Press can be fitted to run by hand power, when so desired. Tapeless delivery furnished, when required, at an extra charge.

Sizes and List Prices with Rack and Cam Distribution.

	Size of bed inside bearers.	Size of form covered by rollers.	List Price.
No. 3	26 × 37 inches	22 × 33 inches	\$1000.00
No. 5	33 × 47 inches	28 × 44 inches	1100.00

Steam fixtures, extra, \$50.00. Tapeless delivery, extra, \$75.00. Table, rack and cam distribution, extra, \$75.00.

Price includes rubber blanket, wrenches, two sets of roller stocks, roller moulds, boxing and shipping.

COTTRELL MONARCH TWO-ROLLER PRESS.

Air Springs. Tapeless Delivery. Back-Up Movement. Hinged Roller-Frame.

**With Two Rollers
Covering Form**

It has many advantages and improvements, including patent air-springs, patent tapeless delivery, back-up movement, hinged roller-frame, and iron steps and feeder's stand, and in its manufacture quality is placed first and cost afterward.

It is a press of excellent design, of the best materials, of high speed, but by manufacturing them in large quantities, and building but two sizes, the price is put within the reach of the printer of moderate means.

It is a fast press—1600 per hour is easily possible on the larger and 2000 on the smaller size.

It has four bearings under the bed for extreme rigidity and strength, and steel tracks and steel rollers. There is a heavy flange on the ends of the cylinder as an added element of strength.

The patent air spring forms an easy cushion for the bed in passing the centers, is under perfect control, and can be readily adjusted for the different speeds. The air spring has a new automatic throw-off, so that in turning over the centres by hand the spring is not compressed.

The patent back-up movement is a great convenience and a labor-saver.

The patent hinged roller-frame permits the form rollers to be instantly uncovered for removal or other purposes without unscrewing the sockets. The rollers can be taken out and put back without changing their set.

The well fountain is used, being easily regulated and cleaned. It is set high, giving easy access to the form.

Furnished with table and rack and cam distribution at an extra charge, or only with rack and cam distribution as illustrated.

Size of bed inside of bearers.	Size of form covered by two rollers.	List Price.
No. 3, 26×37 inches	22×33 inches	\$1500.00
No. 5, 33×47 inches	28×44 inches	1800.00

Table distribution, \$75.00 extra.

Price includes hard-packing or rubber blanket, wrenches, two sets of composition roller stocks, roller moulds, countershaft, two hangers, two four-speed cone pulleys and driving pulley, boxing and shipping.

COTTRELL PARAGON JOB AND NEWSPAPER PRESS.

With Two Rollers
Covering a Full Form

The side frames rest upon and are fastened to a substantial bed-plate, thus insuring stiffness and rigidity of construction. The side frames are changed in design, the flanges projecting inward, and are massive in appearance.

The girt is cast solid with the bed-plate, and carries a pair of substantial rollers adjustable in their box bearings. These rollers operate in connection with extra steel tracks beneath the bed, which, with the ordinary ribs, sliders and tracks, form four separate bearings directly beneath the "impression," making any spring in the bed an impossibility.

The patent air spring, as applied to the press, forms an easy cushion for the bed in passing the centers, and can be readily adjusted for the different speeds.

In connection with the air spring is an automatic throw-off, which permits of the press being turned by hand without compressing the spring. This device is entirely automatic, and does not require any attention.

These presses are supplied with the well-fountain, placed high above the bed, to admit of easy access to the form. The roller frames are hinged in such a manner as to enable the pressman to open them in an instant, leaving the form rollers free for removal. The roller bearings are made adjustable in every direction.

The sheet delivery is tapeless, and fingers of the fly are adjustable transversely to suit position of delivery wheels and nature of sheet to be delivered. The ends of the cylinder are flanged to increase its rigidity.

The Paragon Press is supplied with table, rack and cam distribution, as illustrated on this page, at an extra charge, or with rack and cam distribution.

	Size of bed inside bearers.	Size of form cov- ered by two rollers.	List Price.
No. 5	33×47 inches	29×43 inches	\$1900.00
No. 6	33×50 inches	29×46 inches	2000.00

No. 8 }	37×54 inches	34×51 inches	2500.00

Table distribution, \$75.00 extra.

Price includes hard-packing or rubber blanket, wrenches, two sets of composition roller stocks, roller moulds, countershaft, two hangers, two four-speed cone pulleys and driving pulley, boxing and shipping.

**A Reliable
Low-Priced
Perfecting Press.**

This press is designed for newspapers with a circulation which cannot be handled satisfactorily on flat-bed cylinders, but which could not profitably utilize high-priced and more elaborate perfecting presses. The Pony Web can be worked economically, will do work equal to a press costing twice as much, and can be depended upon for durability, based on good materials and good workmanship.

This Pony Web Press is complete with stereotyping apparatus, make-up tables and chases, and will print four-page or eight-page papers of either 6 or 7 columns, or 7 or 8-column sizes, at a speed of from 10,000 to 12,000 per hour.

Prices, terms and full particulars sent on application. Can be built to order for special work at moderate additional cost.

THE CRANSTON NEWSPAPER PRESS.

Two-Roller, with Rack and Pinion Distribution.

See illustration on opposite page.

Built of the best material; furnished at a moderate price; put to practical tests; it has proved by constant use to be an economical press to buy. The runners on both track and table are steel; the shafts, rolls, studs, shoes and wearing parts are also steel. All gears and racks are cut from the solid. The press is provided with air springs, tapeless delivery, noiseless gripper motion, continuous fly cam, adjustable feed guides. The fountain is placed high on the stands, thus giving easy access to bed of press. The form rolls are made of wrought iron pipe, and are of large size, easily placed in position and adjusted. There is a brake, a fountain cover, reel rod for blanket and tympan, and a guard for distributing rack. Distribution is controlled by cam movements.

An additional charge for table distribution.

Each press is furnished with overhead fixtures complete (except when furnished with hand power only), blanket, wrenches and one set stocks, also one extra set stocks and iron steps.

THE CRANSTON IMPROVED NEWSPAPER PRESS.

Two-Roller, with Rack and Pinion Distribution.

The Improved Newspaper Press has been materially changed in construction and general appearance. All racks and gears have wide faces and are cut from the solid. The press has air springs; tapeless delivery—wheels adjustable to any size sheet; patented device for controlling motion of sliders; patent stop and reversing motion; noiseless gripper motion; continuous fly cam; feed guides that are capable of the finest adjustment; large size form rollers; long register rack and segment; deep fountain; cover for fountain; convenient arrangement for adjusting fountain roll; cylinder distribution.

Every convenient feature that the price at which it is offered will permit is put on this press, effecting a saving of time and labor for which the Cranston presses are well and favorably known.

Each press is furnished with overhead fixtures complete, blanket or hard packing, wrenches, iron steps, two complete sets stocks—one set cast with composition ready for immediate use.

THE CRANSTON PATENT IMPROVED TWO-ROLLER PRESS.

For description, etc., see opposite page.

THE CRANSTON PATENT IMPROVED TWO-ROLLER PRINTING PRESS.

For Fine Book, Commercial and Newspaper Printing.

See illustration on opposite page.

This press is carefully made in every detail. The stock and finish are unexcelled. The tracks are wide, and provided with steel rolls and runners. The wearing parts, shafts, knuckles, shoes, studs, are of steel. The gears and racks are cut from the solid, and have wide faces. The press has air springs; patent silent slider motion, which insures uniform travel of the sliders with the table; patent stop and reversing motion; improved feed guides; patent adjustable side-guide leaf on feed table, which can be set for the greatest precision of register.

The fly is operated by a silent motion, the cam having a continuous surface.

The fountain basin is deep, and will carry a large supply of ink. It is placed high on the stands, and easy access is thus given to the bed of the press.

The Cranston combines the essential features: great strength, unyielding impression, fine distribution, exact register, with convenience in adjustments and make-ready. It is operated with light power, and cannot but give satisfaction both in quantity and quality of work produced.

Each press is furnished with overhead fixtures complete, blanket and hard packing, wrenches, iron steps, and two complete sets stocks.

THE CRANSTON IMPROVED BOOK AND NEWSPAPER PRESS.

Two-Roller, with Rack and Pinion Distribution.

The Improved Book and Newspaper Press has all of the features which made the Improved Newspaper Press the best newspaper press in the market, and in addition has a separate heavy cast iron base plate which gives additional strength and solidity to the machine, and makes it possible to run it at a higher rate of speed without jar or injury to the press.

It is especially designed for fine book, newspaper and general job printing. For accuracy of register and convenience of making ready, it is unexcelled. The workmanship and wearing qualities are unsurpassed.

No. 3½, 33 × 48 inches, inside bearers; 28 × 44 inches, matter covered; length of base, 7 feet 7½ inches; width of base, 5 feet 3½ inches; weight boxed, 10,000 pounds \$2200.00
Table distribution, extra 100.00

Each press is furnished with overhead fixtures complete, blanket or hard packing, wrenches, iron steps, two complete sets stocks—one set cast with composition ready for immediate use.

THE CRANSTON-VICTOR TWO-ROLLER TWO-REVOLUTION PRESS.

For description, etc., see opposite page.

THE CRANSTON-VICTOR TWO-REVOLUTION PRESS.

Two=Roller.

See illustration on opposite page.

The track has wide runners, laid with steel. The table has three supports—two in the track, one on a center bearing placed on the girt—thus giving three continuous bearings through the line of impression without interference of a third track. Cylinder and lifting shafts, rolls, shoes, knuckles, are of steel. The smaller parts are built with a view to the greatest possible wear.

The mechanism for lifting the cylinder is simple, effective, and controlled by cam movements. No strain and no wear. Steel bearings.

The press has air springs; patent device for controlling motion of sliders; all gears and racks have wide faces, and are cut from the solid; distribution unfailing; large size form rollers, with bearings convenient and secure, easily placed in position and as easily removed; fly cam with continuous surface; deep fountain basin; arrangement for adjusting fountain roll; cover for fountain; adjustable bearers; hardwood feed table; patent improved feed guides and side-guide leaf on feed table; patent stop and reversing motion; automatic leaf-lifting device for preventing the tongues or guides from catching and tearing the tympan while reversing press; arrangement for throwing reel wheels on or off while making ready.

The movements are all conveniently and easily adjusted, and positive in their action.

The speed of this press is all that can be obtained from any press of corresponding size and style.

The Cranston Presses.

These presses have always been built on high-grade lines. The motto of the maker, painted conspicuously in the factory, "First learn to do a thing well, then learn to do it quickly," has been consistently carried out, and it can safely be affirmed that the Cranston presses are unexcelled in fine workmanship, true mechanical principles, and superior materials, all which result in durability, smoothness, and general satisfaction. The new series of 1897 have numerous up-to-date improvements, and some sizes have been changed for the better convenience of printers. The numerous users of Cranston presses will be more than pleased with the new series.

THE CRANSTON-VICTOR COMMERCIAL PRESS.

Two-Revolution, with Four Rollers.

For description, etc., see opposite page.

THE CRANSTON-VICTOR COMMERCIAL PRESS.

Two-Revolution, with Four Rollers.

See illustration on opposite page.

Various methods of engraving having been developed, and their utility practically demonstrated, the demand has been created for a press that will bring out delicate lines of half-tone, process, etched, photo-engraved plates, and work of this description, giving that clear and distinct impression without which the best results are not attainable from such plates. The new Victor Two-Revolution Four-Roller Commercial Press is especially designed for this class of work. Possessing as it does the patented features of our larger sizes, it is, like them, solidly constructed, giving an *unyielding impression* and an *ample inking surface*. Its size is convenient and sufficiently large to meet all demands for work of this class, while the speed provides for rapid production. Many features are embodied in this press for convenience in make-ready, etc. The distribution is a complete system, by means of which every particle of inking surface is *evenly* and *thoroughly* covered. The movements are easily adjusted and positive in their action. The cam has a continuous surface and the sheets are laid lightly on the table without smut or offset. Adjustable fly-fingers. The height of the press is such that it can be fed from the floor, and it is built with special reference to convenience in working about it. Its register is *faultless*. This press is the result of careful study, and embodies suggestions from practical printers regarding the requirements for printing this special work. The very satisfactory results obtained from those in use prove conclusively that the Victor will meet all requirements made upon it.

The speed is equal to all reasonable demands for fine printing.

Size.	Inside Bearers.	Matter Covered.	Length of Base.	Width of Base.	Weight, Boxed.	Price.
No. 2A .	25×38 in.	. 22×34 in.	. 6 ft. 5¾ in.	. 4 ft. 5¾ in.	. 7500 lbs.

Each press is furnished with overhead fixtures complete, blanket or hard-packing, wrenches, two complete sets stocks.

A Wise Purchase.

The No. 2A Cranston-Victor Press is a money-maker. Fine job printing, from small circulars to any size within its capacity, can be done at high speed and with the finest results. In a printing establishment doing general work of all grades this press will prove exceedingly useful and profitable. Its construction and features are such that making ready can be done quickly. It takes in a great range of work which cannot be so profitably printed on a larger press.

THE CRANSTON-VICTOR FOUR-ROLLER TWO-REVOLUTION PRESS.

THE CRANSTON=VICTOR TWO=REVOLUTION PRESS.

Four=Roller.

See illustration on opposite page.

The entire frame of the press is solid and compact. The tracks on both the table and runners are wide, laid with steel, and the rolls traversing on them are of the same material accurately gauged to size. The lifting mechanism for the cylinder is a direct cam motion, plain in construction, smooth running, operated with light power, requiring no weight. The shafts, cams, knuckles, studs, rolls, shoes, and all wearing parts, are of steel, and built with view of greatest possible resistance to wear. The shoes are securely fastened and doweled to the rack hangers. The cylinder has heavy flanges. The impression surface is strongly braced and supported. The press has hard-wood feed table; fly cam with continuous surface. Ample provision is made securing distribution and register.

This is a press that can be easily handled, with movements plain and direct in action, adjustments readily and conveniently made, resulting in the greatest economy of time and labor.

This press is provided with a trip, which may be thrown on or off at any point of the stroke of the bed.

The reciprocating motion of the table is controlled by air springs which are simple and effective, having a plain valve which is in itself direct acting without any complicated attachments. The sheets are delivered to the fly by the tapeless delivery. The down-delivery attachment gives a positive and unfailing delivery of sheets on the fly table.

As far as practicable on all our presses, the adjustments are made with thumb nuts.

The sliders are attached to the table by our patent slider motion, and uniformity in travel thereby insured.

The patent feed guides and adjustable side-guide leaf on feed table can be adjusted with the utmost precision without leaving the feeder's platform. Reel wheels are readily thrown on or off while making ready.

The patent stop and reversing motion enables the feeder to stop the press instantly at any desired point, and run it backward, thereby effecting economy of time and labor, as he has absolute control of the press without leaving his position.

The automatic leaf-lifting device prevents the tongues or guides from catching or tearing the tympan while reversing press.

Size.	Inside Bearers.	Matter Covered.	Length of Base.	Width of Base.	Weight Boxed.	Price.

TRIBUNE NEWSPAPER FOLDER.

All Iron Frame. Working parts Steel and Iron. All Movements Positive. No Sprocket Chains. No Lost Motion.

This is a folder of the highest grade of construction and efficiency, without a superior for its purpose on the market, and sold at such moderate net prices as to make so-called "cheap" folders highly expensive in comparison—durability and reliability considered. It has no make-shift devices. It folds on the same principle as the high-grade book machines. The simplest folder made.

Made in one size only, 36×48 inches, which takes in any size sheet, whether folio or quarto, from 22×32 to 36×48 inches. Paster and trimmer can be furnished at time of purchase or added afterward. Made with three- and four-fold deliveries. Three-fold work is delivered in a receiving box, while four-fold work is delivered in a packer, as shown in illustration.

In the hands of a competent operator it will fold ordinary sixteen and thirty-two page work.

Weight about 900 pounds. Power required, about one-tenth of one horse power. Speed, 3000 folio or quarto sheets per hour.

List Prices.

For hand feed	\$400.00
Paster and Trimmer	25.00
Fixtures for attaching to press, net	50.00 extra.
Two and four-page inseting attachment, net	100.00 extra.
Two and four-page covering attachment, net	100.00 extra.
Circulars and discounts on application.	

UNIQUE IRON-FRAME FOLDER.

Built by the maker of the Bennett Economical Folder, shown on opposite page, to overcome the objections to wood-frame folders.

For hand feed or attachable to any cylinder press, front or back delivery.

To fold sheet 32x44 inches, three- and four-fold, with Paster and Trimmer for eight-page work \$300.00

To fold sheet 36x50 inches, three- and four-fold, with Paster and Trimmer for eight-page work 300.00

Fifth or Post-Office Fold . . . 75.00

Hand Feed and Attachable in one machine 50.00

Attachments for Front-Delivery Press 25.00

Floor space of 32x44-inch folder is 40x56 inches; of 36x50-inch folder, 46x62 inches.

BENNETT ECONOMICAL FOLDER.

Has a strong, wooden frame, with working parts of iron. Delivers at third and fourth folds, and can be changed without stopping machine. Has pasting and trimming attachment for eight (8) page work. Built in hand-feed, or attachable to any cylinder press, front or back delivery. All journals are of tool steel, with journal boxes three diameters long, hung in self-adjusting pivot hangers, making it possible to remove any fold roll, driving or rock shaft in a few moments and replace in line, and there is not a gear on the machine but can be reached conveniently, and removed easily. All adjustments are made by screw, each tape tightened independently, drop of fold blades can be regulated by the "turnbuckle" adjustment to one-hundredth of an inch. There are side guides to insure accuracy in folding, whether a sheet comes from a press or feed-board.

No extra charge for press fixtures in attachable machines, except for front-delivery press.

32×44 (6-Column Quarto), or 36×50 (7-Column Quarto), including Paster and Trimmer	\$240.00
Folio Supplement Attachment, with Paster	50.00
Quarto Supplement Attachment, with Paster	85.00

Hand Feed and Attachable in one machine	50.00
Attachments for Front-Delivery Press	25.00

THE BENNETT COUNTRY QUARTO FOLDER.

This machine is exactly the same as the Economical Folder, except that, instead of regular packing boxes at the third or fourth fold, it has a packing box at the fourth fold and a drop box at the third fold.

6 or 7-Column Quarto, including Paster and Trimmer	\$200.00
Hand feed or attachable to press.	

HERCULES SPECIAL GAS AND GASOLINE ENGINE.

2½ horse power Hercules Special Gas Engine.

The superiority of a good gas engine to a steam engine in economy, convenience, safety, cleanliness and availability at a moment's notice is conceded by all, and more especially in offices where the use of power is intermittent; because with steam power, if used only at short intervals during a day, steam must always be kept up, and the fire and boiler constantly watched, while with a gas engine one turn of the wheel and your power is available, and when done with all expense ceases. With the gas engine there is no dirt, no coal, no engineer, no noise, no smoke, no annoyance, no danger.

The Hercules Special is a modern gas engine, built on the same substantial and durable lines as a first-class steam engine, held in a solid, heavy frame of No. 1 grade iron, with all working parts of bronze or forged steel, highly finished, with automatic governor, sight feed lubricators, and adjustable oilers.

The principle of construction is designed to get the maximum power with the minimum consumption of

gas, and the consumption is automatically regulated to correspond with the power used. If only ½-horse power is used, then the consumption of gas is about one-fifth as much as if the maximum power of the engine was in use. The consumption of gas is about fifteen cubic feet per horse power (actually used) per hour.

The gas is ignited by either an electric spark generated by the contact of two heavy, hardened steel electrodes, which are easily adjusted while engine is running, or by means of a heated metallic tube, or by both methods.

When Used as a Gasoline Engine.

The gasoline, which may be of a cheap grade (74° test), is fed from a tank placed at a distance, and connected with the gas chamber on the side of engine. The gas passes into the mixing valve, and combines with the requisite quantity of hot air to secure perfect combustion, full power, and no smell. Full directions for making and placing gasoline tank and connecting same are sent with the engine. The gasoline engine consumes about one-eighth of a gallon of gasoline per horse power per hour, and the consumption is in proportion to the power used.

2½ horse power (actual) \$185.00

Send for descriptive circular.

When required, the Hercules is supplied with the necessary appliances for operating by both gas and gasoline.

EVERYTHING FOR THE PRINTER

EMMERICH BRONZING MACHINE.

Over one thousand of these excellent machines are in use, and all give satisfactory results. They apply the bronze, polish and remove the superfluous powder, and deliver the sheet, bronzed side up, at a speed of two thousand on the smaller sizes. They are self-adjusting for all thicknesses of paper. They are made to be belted to a main shaft, and are equipped with belt shifter and tight and loose pulleys.

FOR STOCK ROOM AND BINDERY.

PEERLESS GEM PAPER CUTTER.

Superior in every detail and in the leverage, cutting with greater ease to operator, and returning from cut with the least possible exertion, owing to their perfect balance. The frame is stronger, heavier and better braced; the knife thicker and deeper, insuring a truer cut and longer life; the lever is adjustable; the balance weight is now hung inside the frame, thus saving floor room. There are split back gauges, side gauges, and a front enameled measuring gauge. Unexcelled in construction, materials used, and finish.

Compare details of construction given below with those on other cutters.

30-inch, cuts 30 $\frac{1}{4}$ inches	\$175.00
32-inch, cuts 32 $\frac{1}{4}$ inches	200.00

PEERLESS GEM PAPER CUTTERS.

**23-INCH
PEERLESS GEM
CUTTER.**

No other cutter of this size, or about this size, equals the new 23-inch cutter. It weighs 725 pounds, unboxed; has $4\frac{1}{2} \times \frac{3}{8}$ -inch knife, and $1\frac{3}{4}$ -inch knife bar. Built on the Peerless-Gem principle, it has leverage of maximum power and easy return, and all the features of the 25-inch Peerless Gem Cutter. It is not possible to build a better cutter for the money asked.

The balance weight is hung inside the frame, thus saving floor space and removing an annoying obstruction.

23-inch, cuts $23\frac{1}{4}$ in. . . \$100.00

Style of 23-inch Peerless Gem Cutter.

**25-INCH
PEERLESS GEM
CUTTER.**

Excels all other cutters of its size in weight, ease of cut, strength, durability and finish. It is built on the same design as the Peerless Gem in all points, except that the lever is fixed instead of movable. The weight is 825 pounds, unboxed; has $4\frac{1}{2} \times \frac{3}{8}$ -inch knife; $1\frac{3}{4}$ -inch knife bar. The best money's-worth ever offered in a 25-inch paper cutter.

The leverage both while cutting and returning is perfect, reducing the exertion of cutting to a minimum.

The balance weight is hung inside the frame to save floor space.

Style of 25-inch Peerless Gem Cutter.

25-inch, cuts $25\frac{1}{4}$ in. . . \$125.00

CLIPPER PAPER CUTTER.

Designed for cutting small work, such as labels, circulars, etc. Has a patented reversible clamp, which cuts very narrow strips and leaves no marks on the paper. The lever is pulled forward to cut. Quality of construction is A1.

Cuts and squares 12 inches \$40.00

UTILITY PAPER CUTTER.

With Iron Stand.

Iron stands are made for each size, and are recommended where bench room should be saved.

A thoroughly well-built cutter, without a superior of its size. Has side and back gauges, and a patent reversible clamp which cuts very narrow strips without marking the paper.

ADVANCE LEVER PAPER CUTTER.

Its special feature is the arrangement for taking up the wear in slideway, in which the knife bar moves, by means of steel gibs controlled by set screws.

22½-inch \$90.00
25-inch 110.00
30-inch 165.00
33-inch 200.00

ADVANCE POWER CUTTER.

The Advance Power Cutter is fitted for hand or steam, is solidly built, the frame is firmly stayed by two substantial cross-braces, upon which is bolted the arch that supports the center of the bed, making it perfectly rigid and firm under pressure of clamp or knife. It is fitted with the interlocking back gauge and clamp, by which paper may be cut to within half an inch of the knife. It has brass figured rules in bed, back and front. The throw-off is automatic and stops the knife instantly; it may be thrown off at any point, thus obviating possible waste of paper through error. The knife has a dip-cut, which will be duly appreciated by all requiring a power paper cutter.

The slideways in which the knife-bar moves is faced with steel gibs secured and adjusted by means of three set-screws on each side, so that any wear in the slideways may be taken up quite easily.

This is a very convenient style of cutter, as it will be found to be a very effective and easily operated hand power cutter at times when other power is not available.

30-inch, squares 30 inches	\$300.00
33-inch, squares 33 inches	350.00

PEERLESS POWER PAPER CUTTER.

A powerful, compact, well-built cutter. The clamp is operated by two worm-screws, which give it great firmness. Has interlocking back gauges and clamp, side gauges and measuring gauge. All movements are positive, all adjustments easy and rapid.

Cuts 36 inches square	\$650.00
Cuts 40 inches square	800.00

CHALLENGE POWER CUTTER.

This cutter is provided with side gauges, back and front; an extra reversible side gauge for front table; split back gauge; interlocking back gauge and clamp, for cutting narrow widths; brass figured rules in bed, back and front. The slideways on which the knife bar moves are faced with gibs controlled by set screws, so that all wear in the slideways may be taken up.

30-inch, squares 30 inches	\$400.00

40-inch, squares 40 inches	750.00

BROWN'S POWER PAPER CUTTER.

Self Clamp or Hand Clamp.

This cutter is supplied with automatic clamp or with hand clamp. It is a modern cutter, immensely powerful, rapid and accurate, and has every convenience demanded on a first-class cutter. The back gauge may be had interlocking or solid, and is moved by a "rapid-transit" device. The knife can be stopped at any point. The knife may be started by lever at side or by treadle lever. Patent floating fingers attached to back gauge prevent the thinnest paper from getting under gauges, while leaving the bed free from objectionable grooves.

SHERIDAN'S IDEAL CUTTER.

This cutter embodies the result of sixty years of labor and experience. Has all the desirable features of the well-known "Auto." Cutter, with the advantage that both clamp and knife are drawn down from both ends with no reverse motion of gear, thus securing an absolutely noiseless machine, with a positive and very powerful automatic clamp motion. All gears are cut and all shafts of steel.

AUTOMATIC KNIFE GRINDER.

Knife grinders have become a necessity in large printing offices, as well as in offices remote from grinding establishments, as in the latter the saving not alone of the cost of grinding, but of expressage, delays, and extra knives will very soon pay for the cost of a knife grinder.

Two styles are made. In the light pattern, as illustrated on this page, the slide or knife holder is moved by hand against the emery wheel, which is turned by power.

The weight of the 32-inch size is 550 pounds, boxed. The tight and loose pulleys are six inches in diameter, and should run at 1100 revolutions per minute.

The grinder is adjustable for flat or concave grinding. The emery wheels are eight inches in diameter with three and one-half inch face, and can be used up almost entirely. Extra wheels cost \$4.00 each, net.

In ordering light or heavy pattern grinders it is necessary to send accurate description of knives to be ground. Knife holders are made to suit any knife without extra charge.

HEAVY PATTERN AUTOMATIC KNIFE GRINDER.

In this style the knife holder is moved by power, and reverses automatically. The knife holder can be set at different angles from the emery wheel, which has a flat face with the corners rounded off. If the bed is set at a right angle to the emery-wheel spindle, the knife moves back and forth against the face and is ground a flat bevel; if it is set at any other angle the rounded corner will do the grinding and the bevel will be concave. This feature will be appreciated by those who prefer a flat, stout edge for rough work, and a thin, concave edge for fine work. The emery wheels are twelve inches in diameter with four-inch face, and can be used up almost entirely. Extra wheels cost \$7.00 each, net. The tight and loose pulleys are eight inches in diameter, and should run at 800 revolutions per minute. Weight of the 108-inch grinder is 1800 pounds. A perfect water attachment is supplied, the water being delivered in any desired quantity on the bevel of knife by means of a brass centrifugal pump.

CUTTING STRIPS

For Hamilton's Patent Cutting Stick, described below.

Under 38 inches, per dozen, net	\$.25
38 inches and not exceeding 54 inches, per dozen, net40

HAMILTON PATENT CUTTING STICK.

Consists of a main body piece (A), made to fit the groove of your paper cutter. The body piece has a groove or recess in it, which holds a small strip (B) one-quarter of an inch square. This removable strip is the cutting surface, and is held in place by a steel clamp (C), which is drawn up by the bolts (D). The cutting strips, being square, can be used on four sides, thus giving the same amount of service as the large-size sticks heretofore used.

SEE THAT B?

A is the body piece made to fit groove in cutter.

B is the cutting strip on which knife strikes. It is one-fourth inch square, and is just as effective as if it was one and one-quarter inch square, also cheaper, and always fits.

C is steel clamp which holds the cutting strip and prevents warping.

D is the screw which grips the clamp to the body piece.

HOW TO ORDER.

1. Give size square the main body piece is to be. Be particular on this point, and see that groove in cutter is accurately measured. 2. Give length of stick. 3. State how far from front edge of stick the knife strikes. 4. State whether knife cuts from right to left or left to right. In ordering cutting strips give the exact length required. All strips are cut to a standard uniform gauge, and are sure fit.

MONITOR TABLE SHEARS.

Style of 34-inch Extra Heavy Monitor Table Shears.

Two styles are made: No. 1, 32-inch, for general use, and No. 2, 34-inch, extra heavy, for work that demands greater power. The knife, gauges and method of operation are the same on each style. The knife-bar head is adjustable laterally and vertically, and another adjustment at the head enables the knife bar to be swung either way, so as to secure its perfect alignment with the bed, and insure a perfect shear cut. The screws holding the knife-bar head are $1\frac{3}{8}$ inches in diameter, and are turned at an angle of 55 degrees, which prevents the knife bar from springing. The clamp is parallel, and descends upon the whole length of sheet at once when the foot is placed on the clamping treadle. The gauge is operated by a hand wheel attached to a geared pinion and rack. The rack is of steel. One revolution of the hand wheel moves gauge four inches. The table is scored both ways, and is provided with side and end adjustable gauges.

No. 1, all iron, 32 inches	\$110.00
No. 2, all iron, 34 inches, extra heavy	150.00

SUCCESS
CARD
CUTTER.

A well-made, reliable cutter, with movable side and front gauges.

12-inch knife	\$10.00
-------------------------	---------

BOSTON CARD CUTTERS.

With Accurate Gauges.

No. 24.
With 24½-inch blade

These cutters have iron frames and polished hard-wood tables. The Nos. 12 and 24 sizes have accurate front, side and back gauges. The front gauge is operated by racks and pinions which hold the gauge securely at each end, and move it exactly parallel with the knife. No clamp is required, as the knives have a drawing cut, which keeps the sheet straight.

No. 12. With 12½-inch blade.

The No. 12 size will cut any length of sheet in two or more cuts, as

the standard that holds the knife bar is on its inner side in line with the cutting edge, as shown in the cut.

The No. 8 size has a reversible gauge, which may be used either at front or back.

BATES AUTOMATIC NUMBERING MACHINES.

These very superior machines operate consecutively, duplicate and repeat, and the changes are made instantaneously by simply moving the pointer on the dial. The figures are cut in steel, and print perfectly. The movement of the figures is entirely automatic from 1 to the full numerical capacity of machine. The figures receive ink automatically from a thick felt pad. The mechanism, materials and finish are unsurpassed. All parts are interchangeable, and the operation is noiseless. Weighs about 16 ounces.

MONITOR PAGING AND NUMBERING MACHINE.

For Treadle or Steam Power.

A reliable, well-constructed machine, with steel numbering heads, which by changing a single hand screw will number consecutively or alternately from 2 to 4 to 6, and so on, or from 1 to 3 to 5, and so on, or by the use of a repeating wheel fastened by a single hand screw will repeat a number any desired number of times. The table is adjustable up and down. The foot-power machines are made with journal boxes, so that power fixtures may be added at any time.

	For Power and Treadle.	For Treadle.
With one four-roll steel figure-head	\$225.00	\$175.00
With one six-roll steel figure-head	235.00	185.00
With one four-roll and one six-roll steel figure-head	285.00	235.00

Prices for machines for power include countershaft and hangers. If these are not required, the prices of power machines will be \$30 additional to prices of treadle machines.

STEEL PAGING AND NUMBERING FIGURE-HEADS.

Four-roll, to number 10,000, \$50.00	Six-roll, to number 1,000,000, \$70.00
Five-roll, to number 100,000, 60.00	Extra repeater 3.00

Prices of numbering heads include one repeater. Styles of figures sent on application.

ACME STAPLE BINDERS.

**The Only
Staple Binders
Which Will
Not Clog.**

The No. 6 Acme Wire Staple Binder does a greater range of work, and does better work, than any other staple binder. At one stroke of the treadle it drives, clinches and releases the staple, each operation being independent, though continuous. It holds two hundred and fifty staples at a charge, and round or flat and fine or coarse staples may be used. Staples are fed automatically to driver by positive pressure on both legs, and clogging is prevented by a device which effectually

prevents more than one staple getting under the driver at a time. The clinch is perfect on any thickness. There is ample room for putting in and taking out work, as the driver arm lifts more than an inch above the table after each clinch. There is a long space under the arm for calendar work. The treadle has a positive movement. Every machine is furnished with a strong iron stand. Will bind to a thickness of $\frac{1}{4}$ inch.

The No. 4 Acme is very similar in appearance to the No. 6, and will stitch the same thickness on ordinary paper, but it uses only round fine

Acme Staple Binder No. 6.

For treadle, with flat and saddle tables.

staples, which cannot be used successfully on coated or filled paper unless such work is light. This machine is specially adapted for stapling the average run of pamphlets, calendars, sample work, etc. It does both flat and saddle-back work. It has the device for prevention of clogging, and the clinching is done by the pressure of the blade while driving the staple. Holds two hundred and fifty staples at a charge.

Prices of Acme Treadle Staple Binders.

No. 6 Acme Wire Staple Binder, capacity $\frac{1}{4}$ -inch and under, on all paper, for round or flat wire, with table and treadle complete	\$40.00
No. 4 Acme Wire Staple Binder, capacity $\frac{1}{4}$ -inch and under, on ordinary paper, for round fine wire only, with table and treadle complete	27.00
No. 1, as described and illustrated below	6.00

Staples for Acme Binders.

For Acme Binder No. 6: No. 21, $\frac{1}{4}$ -inch round; No. 22, $\frac{5}{16}$ -inch round; No. 23, $\frac{1}{4}$ -inch flat; No. 24, $\frac{5}{16}$ -inch flat—per box of 5000 of one size	\$1.25
For No. 4: No. 21, $\frac{1}{4}$ -inch round, and No. 22, $\frac{5}{16}$ -inch round—per box of 5000 of one size	1.25

ACME STAPLE BINDER

No. 1.

The most satisfactory low-priced staple binder made. *It will not clog*, as only one staple can get under the driver at one time. The frame swings on a pivot, and lifts high enough to give ample room for putting in and taking out the work—an advantage not obtainable on other low-priced staple binders. It holds one hundred staples at a charge. Binds $\frac{1}{4}$ -inch and under. The staple is fed automatically under the driver, which descends and drives it through the paper, the pressure clinching the staple tight on the under side. Uses flat staples only.

Price	\$6.00
Staples: No. 23, $\frac{1}{4}$ -inch, flat; No. 24, $\frac{5}{16}$ -inch, flat—per box of 5000 of one size	1.25

**SURE SHOT
STAPLE BINDER.**

The most reliable binder for office use. Holds one hundred staples at a charge. Works on the same principle as the Acme No. 1, described on page 903, but has no lever. Binds from two to fifty sheets.

Price \$3.00
Staples: No. 23, $\frac{1}{4}$ -inch; No. 24, $\frac{5}{16}$ -inch—per box of 5000 of one size 1.25

**BREECH LOADER
STAPLE BINDER.**

Only one size of staples in a box.

This is a handy machine for office use. Can be put to a great variety of uses. Binds paper or pamphlets from two to fifty sheets with wire staples; holds one hundred staples at a charge, feeds them out automatically, inserts them into the work, and clinches them on the under side.

Price \$3.00
Staples: C, $\frac{3}{16}$ -inch; D, $\frac{1}{4}$ -inch; E, $\frac{5}{16}$ -inch—per box of 1000 . . .50

HERCULES WIRE STAPLE BINDER.

For Hand or Treadle.

Treadle.

The cheapest treadle staple binder. Binds paper to thickness of $\frac{1}{4}$ -inch. Staples can be inserted three inches from margin. No table is supplied. The machine is screwed on a bench, and the treadle is screwed to the floor, connecting by means of a rod and spring.

Price, with treadle	\$10.00
Staples: F, $\frac{3}{16}$ -inch; G, $\frac{1}{4}$ -inch; H, $\frac{5}{16}$ -inch; K, $\frac{3}{8}$ -inch—per box of 5000 of one size	1.25

OTHER STAPLE BINDERS.

No. 9 Staple Binder binds through paper $\frac{1}{4}$ -inch thick, complete with table and treadle	\$36.00
No. 8 Saddle Back Staple Binder takes $\frac{3}{16}$ -inch staples only; designed for saddle-back work, but will take flat work by adding flat table; with saddle back only, \$30.00; with flat and saddle-back tables	31.50
Lightning Staple Binder No. 1 staples through $\frac{1}{4}$ -inch paper; No. 2 staples through $\frac{7}{16}$ -inch paper; each complete with treadle	24.00

WIRE STAPLES.

The prices for staples for the wire staple binders illustrated on pages 902, 903 and 904 are given under the description of each binder. The following are the prices of staples for the binders not illustrated:

For No. 9 Staple Binder: Staples No. 1 $\frac{1}{2}$, $\frac{3}{16}$ -inch long; No. 2, $\frac{1}{4}$ -inch long; No. 3, $\frac{5}{16}$ -inch long—per box of 5000 of one size	\$1.25
For No. 8 Saddle Back Staple Binder: Staples No. 1, $\frac{3}{16}$ -inch long, per box of 5000	1.25
For Lightning Staple Binder No. 1: Staples No. 7, $\frac{3}{16}$ -inch long; No. 8, $\frac{1}{4}$ -inch long; No. 9, $\frac{5}{16}$ -inch long—per box of 5000 of one size	1.25
For Lightning Staple Binder No. 2: Staples No. 10, $\frac{3}{8}$ -inch long; No. 11, $\frac{7}{16}$ -inch long; No. 12, $\frac{1}{2}$ -inch long—per box of 5000 of one size	1.25

PERFECTION WIRE STITCHERS.

Perfection Stitchers, as shown on this and following pages, have for a number of years given invariable satisfaction with a minimum of trouble. They are exceedingly well made and strong. The adjustment from one length of staple to another is accomplished by changing a pin from one hole on dial plate to another.

These stitchers take wire from spools and make staples from round or flat wire of any desired length within the capacity of each machine. There are over 10,000 staples of the length used on an ordinary pamphlet in one pound of No. 25 wire.

PERFECTION

"G"

WIRE STITCHER.

**Steam Power
or Treadle.**

Capacity, two sheets to almost $\frac{7}{8}$ -inch. Large trough and flat table. Uses 20 to 28 gauge wire.

Perfection "G," for steam or treadle power \$250.00

PERFECTION

“C”

WIRE STITCHER.

For Steam Power Only.

Specially adapted for pamphlet binding, stitching calendars, and all work up to one-fifth inch. Extra long saddle and flat table. Takes 23 to 30 gauge wire.

Perfection “C” Wire Stitcher, for steam power only \$150.00

PERFECTION
"A"
WIRE STITCHER.

Hand or
Foot Power.

The cheapest satisfactory stitcher of this class now on the market. Is adapted for work varying from two sheets to one-fifth inch in thickness. May be used with flat table or saddle, with wire of from 23 to 30 gauge. The saddle is extra long.

Perfection "A," for hand or foot power \$90.00

No. 7 NEW PERFECTION WIRE STITCHER.

This machine has all modern improvements. It sets automatically for all thicknesses of work. The patent table is changeable from flat to saddle, or vice-versa, without removal. There is an extra length of space between clinchers and frame to accommodate large calendars and extra large publications. Constructed expressly to stitch heavy work with light wire, without change of parts, although heavy wire can be used if desired. Has the roller-feed device in its latest improved form, and patent supporting and clinching devices which are unexcelled.

Will stitch from one sheet to $\frac{3}{4}$ -inch, and will run wire as fine as No. 25.

Price, complete,
\$300.00

PRICE LIST OF WIRE.

Subject to Change Without Notice. Discount on Quantities.

The success of every wire stitching machine depends largely on the quality of the wire used. This wire is the best procurable. A spool holds five pounds of wire. No. 25 is sold per spool at twenty-five cents per pound. Wires Nos. 10 s, 30 s and 60 s, are for Thompson machines only.

Gauges of Wire.		100 Pound Lots.	500 Pound Lots.	1000 Pound Lots.

MONITOR AUTOMATIC WIRE STITCHER.

These stitchers do a range of work from two sheets to work $1\frac{3}{8}$ -inch thick.

ADJUSTMENTS.

—There are only two adjustments: 1. The quantity of paper to be stitched is put in the thickness gauge, and the hand wheel at left of gauge is turned until the jaws clamp the paper tight. 2. Turn the hand wheel at right of machine to obtain proper length of staple, then turn the thumb-screw on the feed lever at the left to the same point on the scale.

WIRE STRAIGHTENER.

—A patent wire straightener is attached to the combination slide, and by moving the lever in the direction the wire is desired to go it will respond invariably.

ACCESSIBILITY.

—All the working parts are in plain view under a glass-faced front. By lifting the glass front you reach the parts. There is a swinging table which is a great convenience for some classes of work, and can be removed instantly if desired.

WIRE USED.

—No. 0 uses flat wire, $19 \times 21\frac{1}{2}$, only; No. 3 uses

Nos. 25 and 27 round wire, unless specially ordered for flat wire, when it takes Nos. 20×25 flat and 25 round; all other Monitor Stitchers use No. 25 round and No. 20×25 flat wires.

Style of No. 1 Monitor Wire Stitcher.

No. 0, complete, capacity $\frac{1}{4}$ to $1\frac{3}{8}$ inches	\$550.00
No. 1, complete, capacity 2 sheets to $\frac{3}{4}$ -inch	400.00
No. $1\frac{1}{2}$, complete, capacity 2 sheets to $\frac{1}{2}$ -inch	300.00
No. 2, complete, capacity 2 sheets to $\frac{3}{8}$ -inch	200.00
No. 3, complete, capacity 2 sheets to $\frac{1}{4}$ -inch	150.00

**TENNIS BOOK
SEWING
MACHINE.**

Designed for stitching blank books of every kind, and pamphlets and books not exceeding a thickness of $\frac{3}{8}$ inch. Will sew through back or centre, making stitches one-inch, half-inch or quarter-inch long. Books sewed by this method are durable, and open perfectly. Sample work sent to us will be stitched and returned.

For foot power, with stand and table \$60.00

For steam power, with variable speed, stand and pulleys, complete 70.00

Prices are strictly net f. o. b. factory.

HAND STABBING MACHINE.

For stabbing pamphlets, receipt books, etc., by hand or foot power. Built of iron, and made to fasten to a bench or table. The position of the needles can be easily and quickly changed, as they move laterally in a slot, and are held by set screws.

For hand power . \$25.00

For foot power . . 50.00

Needles, per dozen 3.00

UNION TABLETING APPARATUS.

Fig. 1.

Fig. 2.

In this apparatus paper is held for padding without the use of screws or clamps. The trough (Fig. 1) is V-shaped, and is held at an angle which holds the paper snugly against the sides and the iron base-plate, which forms the bottom of the trough when it is tilted up. The paper in the trough is held under pressure by a heavy iron weight or brick; the trough is tilted up, and is lifted away, leaving the iron base-plate, paper and iron brick as in Fig. 2. The advantage this method has over the tablet presses using clamps is that, by buying extra base-plates and iron bricks an unlimited number of piles of paper may be put up without waiting for the drying of the cement; thus the capacity of this apparatus surpasses that of other apparatus used for a like purpose, and is equally as well adapted for use in both large and small establishments.

Complete, with trough, base-plate and hollow iron brick, size $8\frac{1}{2} \times 8\frac{1}{2} \times 18$ inches; capacity, 6000 sheets	\$7.50
Extra iron bricks, hollow, each	2.00
Extra iron bricks, solid, each	3.00
Extra iron base-plates, each75

GOLDING TABLET PRESS.

The paper is put in the V-shaped trough between boards, and, after sufficient pressure has been applied by the screw in the end of a hinged clamping frame, the latter is swung over, exposing the underside of the paper for cementing. Pads from 2×2 inches up to full capacity of the press may be blocked. The No. 2 press has a hinged bracket by which it is screwed to a bench, and which permits the paper to be held in a perpendicular position after clamping.

No. 1, will hold 2000 sheets, any size up to 6×12 inches	\$6.00
No. 2, will hold 5000 sheets, any size up to 8×16 inches	12.00

BINGHAM & RUNGE HERCULES ELASTIC PADDING GLUE.

An elastic, tough, quick-drying preparation, which is applied hot after melting in an ordinary glue pot, and, while entailing more labor, gives better results than the liquid glue. Does not adhere to the edges of sheets as they are removed from the pad, thus preventing tearing of pages in invoice and letter copying books. The color is bright red. Put up in pails, with directions for use on each.

5 pounds in pails \$1.50
10 pounds in pails 3.00

BINGHAM & RUNGE LIQUID PADDING GLUE.

Made in Red, Purple, Green and Colorless.

The Bingham & Runge Padding Glue was the first put on the market, and it has always maintained its reputation.

The best materials are used in its composition, and on this account it does not get rancid.

A quart will cement about 100,000 sheets of note size.

No. 4 PUNCHING AND HAND EYELETTING MACHINE.

Can be Used for Eyeletting by Hand by Substituting
Punches for Eyelet Sets.

Punch and
Die.

This is the proper machine to use with eyeletting machines shown on following pages. Except on cloth, good work cannot be done unless the hole is punched out *clean* before eyeletting. The No. 4 Machine will do work up to $\frac{3}{8}$ -inch diameter (No. 3 Calendar Eyelet), and has a reach of $6\frac{1}{2}$ inches back of plunger, and an adjustable gauge for all kinds of work.

By removing the punch and die and substituting an eyelet set, this machine may be used for eyeletting by hand feed, and will do perfect work.

No. 4 Punching Machine, with Treadle, and one Punch and Die	\$20.00
Extra Punch and Die, per pair	2.50
Eyelet Set, per pair	2.50

COMBINED EYELET PUNCH AND SET.

An indispensable tool in the printing office. Punches the hole and sets the eyelet. Takes only one size of eyelet (No. 2 Skirt).

Price, complete	\$2.25
Eyelets, per box of 100050

Sizes of punches and
dies corresponding
with eyelets made.
Order by number.

SELF-FEED FOOT POWER EYELETTING MACHINES With Removable Roadways.

THE VICTOR

Has a reach from eyelet set to back of arm of $6\frac{1}{2}$ inches, and will set an eyelet in the centre of a square of 13 x 13 inches. Will set eyelets in paper, metal, leather, cloth, etc.

The eyelet roadway or feed channel is made to feed but one size eyelet; if other size eyelets are used on machine, an extra roadway is necessary. When ordering machine, specify by name the eyelet for which machine is to be fitted. If extra roadways are wanted, be particular to state the size of eyelet to be used. It takes only a few moments to change one roadway for another on machine.

The Victor is easy to operate, weighs 30 pounds, is 14 inches high, 15 inches deep, and is a perfect working machine and very durable.

No. 2. The Victor, with one roadway	\$40.00
Extra roadways, each	14.00
Power attachments, extra	40.00

In ordering, send samples of eyelets to be used, as the roadway will feed only one size of eyelet. An extra roadway is required for each size of eyelet.

THE ROYAL

Differs from the No. 2 Victor in the reach only, which is 9 inches, setting eyelets in a square of 18 x 18 inches.

It weighs 45 pounds, is 15 inches high, 16 inches deep, and is a perfect working and very durable machine.

No. 3. The Royal, with one roadway	\$45.00
Extra roadways, each	16.00
Power attachments, extra	40.00

In ordering, send sample of eyelet to be used, as the roadway will feed only one size of eyelet. An extra roadway is required for each size of eyelet.

THE PETIT.

This is not recommended for the general work of printing offices and binderies, but is perfectly adapted to special work requiring eyelets not exceeding $\frac{3}{32}$ -inch inside, known as No. 1 "C. Z." It will take the smallest eyelet, $\frac{1}{16}$ -inch inside, known as "D. E."

It is a perfect feeding machine, 12 inches high, 9 inches deep, weighs only 17 pounds, and is very easy to operate.

No. 1. The Petit, with
one Roadway \$30.00
Extra Roadways, each . 12.00

EYELETS.

The largest eyelet used is "No. 3 Calendar," smallest is "D. E.," $\frac{1}{16}$ -inch inside. The eyelets

in most common use are "No. 3 Calendar" and "No. 2 Skirt" (as illustrated). The prices of eyelets in large quantities vary from time to time, and special quotations will be given when required.

No. 3 Calendar Eyelets, per box of 5000 \$3.75
No. 2 Skirt Eyelets, per box of 10,000 4.50

Special quotations for larger quantities.

SIZES OF EYELETS.

The following cuts show exact size of each eyelet when set in the material eyeleted. Smallest quantity sold 10,000 in one box, except No. 3 Calendar, which is put up in boxes of 5000. They are also packed in bulk cases containing 250,000 of any size.

The heavy figures under cuts indicate the size of punch and die to be used with eyelets.

See page 915 for Punching Machine.

HAND EMBOSSING PRESS.

**For Embossing
Monograms,
Crests, etc., on
Envelopes and
Stationery.**

Embossed work on envelopes, note paper, menus, and other fine stationery, is the most stylish form of printing. The process is simple. Dies cost from \$1.00 to \$5.00, according to elaboration of design. Dies are made of steel. The counter is usually made of bristol board, thin rubber cloth and thin paper, and is fastened to bed-plate with glue or gum arabic. The inks are made from dry colors, mixed with white damar varnish. The ink is smeared over the die, and the face of the die is cleaned of ink, and polished by rubbing on paper. Bronzed effects are obtained by embossing with varnish instead of ink, and dusting on the bronze; superfluous bronze is taken off by dusting with a brush. Any printer can do this work, and thus add a lucrative department to the business.

This press is the best made, and is used by all the leading houses.

Large Press, with one Die-Box and Counter	\$75.00
Small Press, with one Die-Box and Counter	60.00
Extra Die-Boxes, each	4.00
Extra Counters, each	3.00

Boxing, \$1.50, net.

Those who have use for one press are advised to purchase the large size, as the other will only take small dies. Largest die taken on large press, 5x4 inches; on small press, 4x3 inches.

FAST GOLD LEAF LETTERING AND STAMPING PRESSES.

Made in two styles. No. 1, illustrated here, is the best press of its kind for small stamping or embossing. Size of platen, 12x12 inches; size of head, 11x11 inches. The wheel at top carries the screw that raises or lowers the head, and the set screw at front binds it firmly. Can be supplied with 19 $\frac{1}{4}$ or 26 inches between uprights.

Three stamp-holders, varying sizes; one large chase, one large and small plate for electros and brass work, one atmospheric gas heater, set of band holders, and assortment of steel fillers for chase, go with each machine.

The No. 2 Press, for gas, gasoline or steam, is specially recommended for printing badges. In this press the bed does not slide, and the platen is raised or lowered by screws set in the side frames. Size of head, 12x12 inches; size of platen, 13 $\frac{1}{2}$ x13 $\frac{1}{2}$ inches. Takes work 14 inches wide and any length.

The head will allow a change of six inches in thickness. One type holder with chase, two plates for electros, one set of fillers, and an atmospheric gas heater, go with each machine. Cheap, accurate and powerful, and indorsed by the users.

No. 1 Stamping and Embossing Press,
for steam, gas or gasoline.

No. 1, complete, as described	\$150.00
No. 2, complete, as described	75.00

Catalogue of Embossing Dies sent on receipt of 25 cents.

CARVER & SWIFT POWER STAMPING PRESS.

Prints and Embosses at One Impression.

The die is held in a double-jawed chuck on bed of press; immediately over the bed in its vertical position is a counter-block, driven up and down by connection with a powerful toggle. The counter is made in the same way as on the hand-stamping press, as described on opposite page. The ink fountain is at rear of press, having a continuously revolving roller which serves to keep the ink "alive." An oscillating arm carries the distributor, which supplies ink to the die on its backward and forward motion. As the die travels forward, it passes under the wiping plate, around which a web of manilla wiping paper is carried. The contact with the wiping paper removes all ink from the surface of the die, leaving it only in the engraved parts. The bed travels to a vertical position, where it is automatically locked and held for the impression. The sheets are fed to gauge pins as on a job press, and thus at one feeding the most beautiful results are produced.

Perfect register is insured for burnishing bronzed work by the fact that the machine is provided with an automatic lock, which holds the bed in position while the impression is made.

Any properly engraved die from one line, or monogram, up to commercial dies measuring three and one-half inches by eight inches, can be successfully stamped.

The speed is a matter most generally determined by the operator, and while a general average would be about nine thousand impressions per day, the machine has a record of seventeen thousand in less than eleven hours.

The machine weighs about four thousand pounds and occupies a floor space of three feet nine inches by four feet six inches, exclusive of projecting feed boards.

Stamping press, complete, with countershaft and hangers with friction clutch, wide face pulley and three-step cone pulley, three-step cone pulley for main shaft, two large and two small ink fountains, three counter-blocks, one set each of plush and composition rollers, f. o. b. factory \$1650.00

**STIMPSON LEVER AND TREADLE
ROUND-HOLE PERFORATOR.**

In every respect a perfect and superior machine, in keeping with the reputation of the makers, and well worth the price asked.

Perforates 10 inches, with treadle \$40.00

**FRANKLIN
HAND PERFORATOR.**

Perforates 10 inches, and is provided with gauges on both sides, so that the sheets may be turned and fed in again, making a continuous perforated line of twenty inches. The pins make round holes, like the perforations on a sheet of postage stamps. Fifteen holes to an inch.

Hand Perforator, 10 inches \$25.00

TREADLE PERFORATORS.

We list on this page two grades, each of which accomplishes the same work, the difference in prices indicating differences in workmanship and durability.

Standard Grade Treadle Perforator.

Round-hole perforators, with removable pins, with accurate gauges, and the best procurable at the price, meeting the requirements of the average binding and printing office.

Standard Grade, perforates 20 inches, with treadle	\$ 75.00
Standard Grade, perforates 24 inches, with treadle	100.00
Standard Grade, perforates 28 inches, with treadle	125.00
Standard Grade, perforates 24 inches, for power	150.00
Standard Grade, perforates 28 inches, for power	175.00

FRANKLIN TREADLE PERFORATOR.

Mounted on a stand resembling a proof-press stand, with large drawer.

Franklin, perforates 20 inches	\$50.00
Franklin, perforates 24 inches	60.00
Franklin, perforates 28 inches	70.00

STIMPSON ROUND-HOLE PERFORATING MACHINES.

This illustrates the 25, 30 and 36-inch Stimpson Perforators.

This is conceded to be the best line of perforators made in the world. Nothing has been neglected in the way of good material, good workmanship and accurate adjustments, and consequently they do the best work, and wear longer than any other perforators. For those who keep a perforator in constant use an investment in one of these perforators will prove the most profitable, and will be found to keep up a perfect standard of work for many years. Power may be applied to any size.

These perforators are made to make two sizes of perforations—No. 60 gauge (15 holes to an inch), and No. 65 gauge (18 holes to an inch). The No. 65 gauge is the most satisfactory for checks, bonds, drafts, stubs and labels.

No. 60 Gauge.

No. 65 Gauge.

	No. 60 Gauge.	No. 65 Gauge.
20-inch machine, on substantial box-frame iron pedestal	\$150.00	\$160.00
25-inch machine, as per illustration	225.00	240.00
30-inch machine	300.00	325.00
36-inch machine	400.00	435.00

Power attachment for any of these machines, \$125.00 extra.

PEERLESS ROTARY PERFORATORS.

For Power.

A thoroughly-tested, successful rotary power perforator, cutting six or less separate lines of perforations at a time, and provided with adjustable striking cams for skipping the perforations any distance, from the usual lengths of stubs to very short spaces. When the skip is as short as half an inch special fitting must be done, at a small extra expense. Accurate gauges, easily changed, are provided. The sheets deliver themselves after perforation into a lay-box, taking up very little room, and stacking the sheets regularly. Sheets are fed to machine as into a ruling machine.

Not the least remarkable feature is the form of the perforations, which are *cut out* of the paper cleanly, without any trace of burr, in oblong holes instead of the usual round holes. The machine will perforate a single sheet of manifold paper (without the usual aid of a thicker sheet) or heaviest manilla paper.

The oblong perforations are the distinctive feature of this machine. There is no displacement or swell of the paper along the perforated lines, and the clean cut of every hole, the absence of all burr, and the ease with which the paper separates through the perforations, commend the machine to all who aim to do the best grade of work.

This perforator is in use in a majority of the first-class manufacturing stationers and printing houses, and is built thoroughly well. All parts are interchangeable.

Price, with 6 pairs of cutters and 1 scoring cutter and die, f. o. b.

Chicago, net \$350.00

STYLE 2-B HICKOK HAND STRIKER RULING MACHINE.

Designed for small shops, where ruling is not done very rapidly, and where, therefore, the ink has time to dry (though the carrier is short) after the paper has passed under the pens and before it drops into the receiving box at feeder's feet. So far as material and workmanship are concerned, there is nothing better made than Style 2-B. The difference between it and the higher-priced rulers is simply in the number of parts used. Striking is accomplished on this machine exactly as it is on the Style 1-A ruling machine. Paper drops into receiving box.

STYLE 1-A HICKOK HAND STRIKER RULING MACHINE.

Described on opposite page.

Style 1-A Ruling Machine is for use in shops where there is considerable faint or cross ruling, thus economizing the time of automatic strikers used in the same shop. It may also be used in small-sized binderies, where there is not sufficient work for an automatic striker machine. The operator turns the hand crank with the left hand, thus operating the machine by hand, while with the right hand the pen-beam is tilted up and down, doing hand striking. Power may be applied, and steam attachments are furnished to order at an extra charge. Style 1-A is as perfectly built in every part as the most expensive automatic striker ruling machine. The difference in construction is simply leaving off the striker parts and some other necessary pieces required on an automatic striker machine.

STYLE 1 SINGLE BEAM AUTOMATIC STRIKER RULING MACHINE.

Style 1 is used for faint or cross-lining when the striker is not operated, and also for down ruling from cross or head lines when the automatic striker is used for the purpose of leaving unrulled head spaces by automatically raising the pens from the paper and allowing them again to descend upon the paper, the pens beginning to rule immediately upon touching the paper at a cross head line, and again being automatically raised from the paper and lowered upon the paper again successively at distances prearranged by the positions of the cams, which are adjusted by the operator, who sets them in the circular-revolving cam-head. This machine is for use on all classes of job ruling.

The illustration shows the combined lay-boy and receiver—a device for receiving the paper (after it is ruled) in the lower portion of the machine. Gears are used in setting the striker—friction devices being avoided because gears are more positive in the correct delivery of both speed and power.

Prices.

2-B, with new Monitor standards, patent beam, patent pen rest, two 32-inch and two 26½-inch clamps, arranged to deliver paper in receiving box at feeder's end of machine (steam fixtures not included—\$15 extra, if required) **\$190.00**

FOR MAILING DEPARTMENT.

THE HORTON MAILER.

Patented May 11, 1894.

This is the best label-pasting mailer. It is quicker and more exact, because all its movements are positive. It is so simple that it can be worked rapidly and efficiently by the inexpert, while experts have addressed with it at the rate of 170 per minute. It is operated, as illustrated above, by one hand, leaving the other entirely free to manipulate the papers or wrappers.

It guides and thoroughly pastes the slip, scrapes off all surplus paste, and sticks the label cleanly and firmly. The knives are thin and adjustable, with two cutting surfaces, and can be easily sharpened. The arrangements for adjusting knives with each other and regulating tension of knives are very exact.

It is very strongly made, and is the most durable of mailers.

The Ladies' Home Journal, Philadelphia, circulation 275,000: "The Horton Mailer cuts and pastes the slip on the *Journal* or wrapper more thoroughly than the machines we have been using. . . . We do not believe it has an equal on the market to-day."

Price, with extra knives, paste strainer, screw driver and oiler,
net \$20.00

The exact size is 12 inches long by 3 inches wide by 5 inches high, and the weight is $2\frac{3}{4}$ pounds.

EVERYTHING FOR THE PRINTER

RUKENBROD MAILER.

New Style—All Metal.
With Bell Attachment.

This mailer prints direct on the paper or envelope, clearly, and as rapidly as paper can be put under the platen. It is the best mailer of its class. Each address is brought under the platen automatically, and bell quads may be used which will ring an alarm bell when the papers for any town are all addressed, whereupon the next town wrapper address is printed. Each mailer is provided with two platens, one for two-line address and one for three- and four-line addresses. No other mailer of its class will print a four-line address.

All metal mailer (as per illustration), net \$12.50

RUKENBROD MAILING GALLEY.

Wood rim, zinc bottom . . . \$.60	Galley reglet, per hundred . \$.30
Wood rim, brass bottom85	Bell quadrats, per hundred . 1.00

MUSTANG MAILER.

This mailer prints directly on the paper or envelope. The platen and its frame moves automatically, printing one address at a time. It will print three-line (8 Point) addresses.

The Mustang Mailer occupies a space 37 inches in length and 4½ inches in width, and is made wholly of iron without springs or complications of any kind. Speed is regulated solely by the speed of operator in passing the papers to and from the mailer.

The mail list is made up in galleys ten ems Pica wide on the inside.

Each galley holds seventy-five addresses. The weight of the machine is fifteen pounds, and of the galleys one pound.

Price \$10.00

MUSTANG MAILING GALLEY.

Zinc bottom \$.50	Brass bottom \$.75
------------------------------	-------------------------------

THE ACME MAILER.

A good low-priced mailer, of which a great many are in use. It is built on the same lines as most of highest priced mailers.

Price, net \$15.00

ECONOMY WRAPPER PASTER.

Patent applied for.

The paste fountain has a perforated bottom through which the paste reaches the top sheet of a pile, which may contain four hundred sheets. As the top sheet is drawn off, the next is pasted automatically and instantly,

and so on. Wrappers are pasted as fast as they can be drawn from the pile.

It saves all the time of "laying out" and applying paste with a brush, fifty per cent. in paste, and a great deal of space, as three or four hundred wrappers occupy no more table room than one, and you can wrap on top of the pile, as indicated in the cut.

NEWSPAPER PASTER.

This is a tight brass box, with a handle, in which paste is put. In the bottom of the box a revolving wheel is placed which carries the paste out in a thin line to the sheet to be pasted. This wheel can be regulated to give a fine or coarse feed, as required.

The paster is carried in the hand between the thumb and forefinger while the sheets are being folded.

Price, complete, including two wheels and two gates \$3.50

MISCELLANEOUS SUPPLIES.

Fastening, closed.

HAMILTON NEWSPAPER FILE.

Made of cherry, finished in oil, with brass fastenings and polished steel thumb-screws. The method of opening and closing this file is novel and simple. The clasp end of file has a flat-headed thumb-screw (see cut), which is passed through a slot, and by giving the screw a quarter turn the file is securely locked. When the head is turned parallel with the file it opens instantly.

Price, each \$1.25

The following sizes are made :

To hold sheet 20 inches long.
To hold sheet 22 inches long.
To hold sheet 24 inches long.
To hold sheet 26 inches long.

To hold sheet 28 inches long.
To hold sheet 30 inches long.
To hold sheet 34 inches long.
Other sizes to order.

HOLLY-FACE TINT BLOCKS.

Most useful for the rapid setting up of tint forms. These blocks have a beautiful, perfect, smooth surface, and print solidly.

1-line wide, per foot	\$.10	10-line wide, per foot	\$.48
2-line wide, per foot12	12-line wide, per foot50
3-line wide, per foot15	15-line wide, per foot66
4-line wide, per foot20	18-line wide, per foot75
5-line wide, per foot22	20-line wide, per foot80
6-line wide, per foot24	24-line wide, per foot85
8-line wide, per foot36		

Larger pieces squared up, any size desired, at 1 cent per square inch.

LABOR-SAVING TINT BLOCKS.

These consist of strips of engraver's maple, with polished face, cut to even Picas and Nonpareils in width. A font consists of two pieces each 1, 1½, 2, 2½, 3, 3½, 4, 5, 6 and 8 ems Pica wide, all 8 inches long. All the printer has to do to make a tint is to set his panel to even Picas, select a tint strip of same width, and cut it the desired length.

Price, per font \$1.00

THE SURGUY NEW HOT AIR STEREOTYPING APPARATUS.

The furnace and casting box are combined. One fire of coal, wood or gas will melt metal and dry matrix simultaneously or separately if preferred, as metal pot is detachable. Each apparatus will make thin or type-high plates.

Price of Apparatus and Outfit.

	Size 8½x14 inches.	Size 12x20 inches.	Size 18x26 inches.
Combined furnace and casting box	\$33.00	\$45.00	\$85.00
Iron bars, spacings and cores for type-high casts	10.00	13.00	15.00
Iron shoot-board and plane	9.00	12.00	15.00
Iron miter box and metal saw	8.00	10.00	12.00
Beating brush	3.00	3.00	3.00
Steel gauges for thin plates, small tools, blankets, brushes, prepared matrix paper, directions, etc.	7.00	7.00	10.00

Price, when ordered complete \$65.00 \$90.00 \$140.00

The 8½x14-inch apparatus will stereotype a form of 7½x10 inches. It is too small to use with wood or coal, and is fitted with a gasoline attachment, or gas may be used. The 12x20-inch apparatus will stereotype a form of 10x18 inches. The 18x26-inch apparatus will stereotype a form of 16x24 inches, taking in a standard six-column page of a newspaper.

PREPARED MATRIX PAPER.

Size, 12x19 inches, per dozen, by express	\$.50
Size, 19x24 inches, per dozen, by express	1.00

CROWN ENGRAVING PLATES.

(PATENTED.)

Made by the Hoke Engraving Company.

A Crown Engraving Plate consists of a thin, dark, steel plate, covered with a soft, white composition. By means of special tools, used after the manner of pens, the drawing is made by cutting through the composition to the dark surface of the steel plate, which shows the drawing as it will appear when printed. No apprenticeship is needed. Anyone able to draw can do the work. Speed is gained by practice. Three or four tools and a scraping brass is all that is required for ordinary work. After the drawing is finished, a stereotype cast is made from it and the cut is ready for the press. The quickness and cheapness of the process are apparent. Any stereotype foundry can cast the plates, but for those who desire to do their own casting we have special simple and cheap stereotyping outfits suited to every line of work.

This process is suitable for rapid newspaper illustration. A cut may be got ready inside of thirty minutes.

This is also a good process for color work. The plate having been engraved and a cast taken, the composition is removed by washing until only a thin film remains; as many additional casts can now be taken as there are to be colors. The design appears upon the face of these casts, and it is an easy matter to cut away on each block the portion not wanted.

Price List and Telegraph Code.

The telegraphic code will be found convenient when plates are wanted in a hurry.

Size.	Net Price.	Tel. Code.
3 × 4 inches	per dozen, \$ 4.50	— — —
3½ × 5 inches	per dozen, 6.50	Breton.
4 × 6 inches	per dozen, 9.00	Church.
5 × 6 inches	per dozen, 11.00	Dore.
5 × 8 inches	per dozen, 15.00	Errett.
6 × 10 inches	per dozen, 21.60	Frost.
8 × 10 inches	each, 2.50	Gaul.
10 × 12 inches	each, 3.25	Hart.
10 × 18 inches	each, 4.25	Inness.
12 × 16 inches	each, 4.75	Johnson.

18 × 20 inches	each, 8.25	— — —

A credit of 15 per cent. allowed for used base plates returned in good order, freight prepaid.

Appliances for Engraving on the Crown Engraving Plates.

Hoke Engraving Tools, set of four, with scraping brass . . .	\$2.00 net.
Hoke Engraving Tools, each50 net.
Tracing Needles, for transferring drawing upon the composition of plate, each15 net.
Circle Former, for describing circles of all diameters, each75 net.
Plategraph, for tracing from drawing or print, reducing or enlarging the work	12.50 net.

Air Tools for Removing Dust from Plates.

Bulb Blower, operated by hand	1.00 net.
Foot Blower, operated by treadle, with stand and pump . . .	20.00 net.
Foot Blower, without stand	15.00 net.

PANELED BACKING FOR ELECTROTYPES.

The Only Backing That Will Not Warp Under Any Circumstances.

These paneled blocks are made in two-foot lengths, and put up in any width desired. They usually are ordered with half-inch variations. This is the only perfect backing for large cuts.

Price, per square foot \$.20

Special prices for large lots or regular supply. *Made to order only.*

BACKING FOR ELECTROTYPES.

Made from selected, well-seasoned stock, and kiln dried. This is supplied to any height desired, planed perfectly smooth and flat on both sides, uniform in thickness, and free from knots or waste. It is put up in boxes, each containing 100 feet, cut in 2 feet lengths, assorted widths, $2\frac{5}{32}$ -inch high, for use without replaning, and $\frac{7}{8}$ -inch high for replaning with Daniels Planer before use, but can be supplied to order to other thicknesses if required. The use of this backing results in saving of space, and absence of waste.

Birch, per square foot, in boxes of 100 feet. \$.10
